

HELLO THERE, SACK-CHUM

Navigating Menus

Having options is important, and you have two when it comes to navigating menus in LittleBigPlanet 3. Move the left stick or press the directional buttons to highlight options, and then press ● to confirm the selection. To cancel an option or return to a previous menu, just press ■. See how easy that is?

Behold, Your Pod!

Your sack person has a special place to call home and connect to the whole of the LittleBigPlanet 3 experience. It's called the Pod, a room with a controller sitting smack-dab in the middle of the screen for your sack person to access the all-important Pod Computer. All your sack person needs to do is stand in front of it and press ● to start exploring.

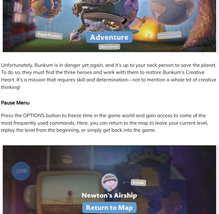

CONTROLLING YOUR SACK PERSON

Move the left stick to the left or right to guide your sack person in the chosen direction. Moving the stick more moves your sack person at a faster speed, while moving the stick less makes them move more slowly.

You can also move your sack person into the background or foreground, as each level has many different layers. Just move the left stick up away from you or back toward you to change your sack person's position in this way.

Your sack person is a born jumper. Tap ● to make your sack person nimbly catch just a hint of air, or hold ● to create larger leaps. Your sack person can also grab any soft object, like a sponge, when you press R2. While grabbing said object, they can push or pull it left or right. Tap ● while tugging to really have your sack person put their back into it.

Sack folk tend to be pretty emotional, so don't be afraid to show how you really feel! You can bring all kinds of emotions into play with your sack person by pressing the directional buttons. Press ↑ to cause to spark a desire to dance, and then press it additional times to intensify it. Press ◆ for a Happy Mood, ◆ for a Sad Mood, ◆ for a Scared Mood, and ◆ for an Angry Mood.

Your sack person's hand motions match their reaction. Hold R1 and move the left stick to control the left arm's movements, and hold R2 and move the right stick to control the right arm.

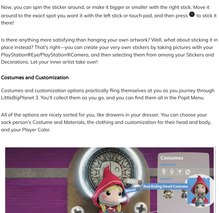

You can also tilt your whole wireless controller to move your sack person's head. But wait, that's not all you can do! Your sack person has another secret talent: dancing. Just click L3. If that's the left stick), and then tilt the wireless controller around to make your sack person boogie.

PLAY

Play is where you can find all kinds of fun things to do. Stave off boredom, test your skills, check out what the rest of the LittleBigPlanet 3 community has been doing, or continue on your grand adventure.

Adventure

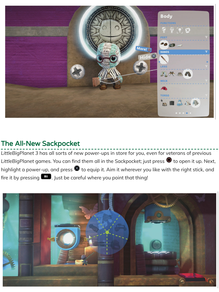

Bunkum is a world where creativity thrives. It's been in danger before, but this problem was solved, thanks to the work of three now-mythical heroes: Toggle, Oddsock, and Swoop.

Unfortunately, Bunkum is in danger yet again, and it's up to your sack person to save the planet. To do so, they must find the three heroes and work with them to restore Bunkum's Creative Heart. It's a mission that requires skill and determination—not to mention a whole lot of creative thinking!

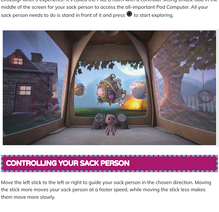

Pause Menu

Press the OPTIONS button to freeze time in the game world and gain access to some of the most frequently used commands. Here, you can return to the map to leave your current level, replay the level from the beginning, or simply get back into the game.

Just Popit!

On your journey through LittleBigPlanet 3's Adventure Mode, you're going to need a whole lot of tools and customization options. That's where the Popit Menu comes into play. Just press ● to open it up. Here, you can choose to customize your character, check out your ever-burgeoning collection of Stickers and Decorations, view objects you have Hearted, test other players, or retry a level from the latest Checkpoint.

Let's Play with Stickers

Your sack person loves to play with stickers, and they can be important when you're on a mission, too. When you choose Stickers and Decorations from the Popit Menu, highlight a sticker, and press ● to select it.

Now, you can spin the sticker around, or make it bigger or smaller with the right stick. Move it around to the exact spot you want it with the left stick or touch pad, and then press ● to stick it there!

Is there anything more satisfying than hanging your own artwork? Well, what about sticking it in place instead? That's right—you can create your very own stickers by taking pictures with your PlayStation®Eye/PlayStation®Camera, and then selecting them from among your Stickers and Decorations. Let your inner-artist take over!

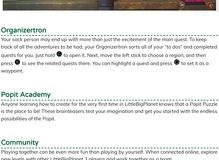

Costumes and Customization

Costumes and customization options practically fling themselves at you so you journey through LittleBigPlanet 3. You'll collect them as you go, and you can find them all in the Popit Menu.

All of the options are nicely sorted for you, like drawers in your dresser. You can choose your sack person's Costume and Materials, the clothing and customization for their head and body, and your Player Color.

The All-New Sackpocket

LittleBigPlanet 3 has all sorts of new power-ups in store for you, even for owners of previous LittleBigPlanet games. You can find them all in the Sackpocket: just press ● to open it up. Next, highlight a power and press ● to equip it. Aim it wherever you like with the right stick, and fire it by pressing R2. Just be careful where you point that thing!

Organizertron

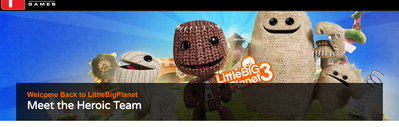

Your sack person may end up with more than just the excitement of the main quest. To keep track of all the adventures to be had, your Organizertron sorts all of your "to dos" and completed quests for you. Just hold ● to open it. Next, move the left stick to choose a region, and then press ● to see the related quests there. You can highlight a quest and press ● to set it as a waypoint.

Popit Academy

Ancient wisdom and knowledge are contained within the Popit Academy, a place where you can learn how to become a master creator. Your Grandmother's House and Tutorial Pause is the place to be! These brainteasers test your imagination and get you started with the endless possibilities of the Popit.

Community

Playing together can be even more fun than playing by yourself. When connected online, explore new levels with other LittleBigPlanet 3 players and work together as a team.

Welcome Back to LittleBigPlanet

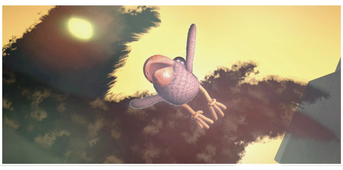

Meet the Heroic Team

Your sack person is on a special quest—but they're not alone! That's because several talented companions, once thought to be mythical, are coming together to help your sack person accomplish what they've set out to do. Ready to meet the heroes?

SWOOP

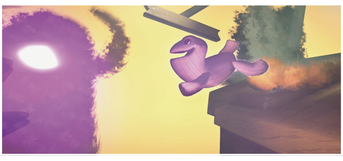

Swoop is a bird with a special ability. Can you guess what it is? (Here's a hint: Swoop has wings.) That's right, Swoop can fly! When obstacles are approaching too rapidly to avoid, Swoop has the speed to get past them by swooping with R1. Swoop can also grab onto objects—even another character—and take flight. Simply land Swoop on an object, press R1 to grab it, press ✕ to fly, and then release R1 to drop the object when the time is right.

ODDSOCK

Nobody knows exactly what Oddsock is, but one thing is certain: he has the agility to bound through levels with surprising ease. This doesn't mean Oddsock is invincible, but whenever you're stuck on a level, Oddsock is likely to be the one who can get you moving again. He can leap dramatically off of walls, jump the farthest, and slide down vertical walls with impressive speed.

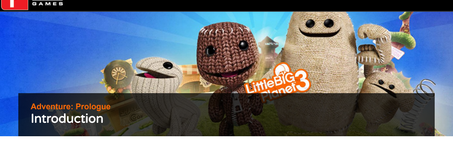

TOGGLE

Toggle can be big or small, heavy or light, strong or fast. That kind of versatility is pretty rare, which is why Toggle is such a useful character to have around. Just press L1 to switch between big Toggle and little Toggle whenever you want. Big Toggle is heavy enough to weigh down spring platforms, pull heavy objects downward, and walk underwater. Little Toggle, on the other hand, can fit through tiny spaces and run along the surface of water because he's very lightweight. Experiment with whatever move combinations you can come up with as you switch between the two... you might just get more done than you think!

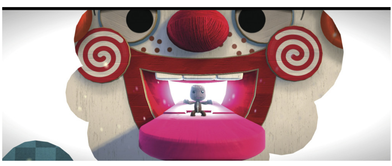

Adventure: Prologue

Introduction

Since LittleBigPlanet 2, the Craftverse has been merrily chugging along and creating with gusto. Indeed, things are so peaceful, it practically feels like a waking dream. This is how you find your sack person, blissfully tumbling down through the clouds...

A WARM WELCOME BACK!

Rightward Bound

Your sack person had better stretch out those little limbs upon landing. You wouldn't want to pull a loose thread now, would you? Upon arriving in LittleBigPlanet, send your sack person off to the right to start exploring. Press the Action button ( ) to bound over any obstacles in the way.

Dress For Success

No need to gad about the Craftverse in the same threads you start with. It's easy and satisfying to change up your appearance using the Popit. Press

to open the Popit, highlight "Customize Character," and press

.

Now you are free to peruse Costumes and Materials, along with head to toe accessories. Press

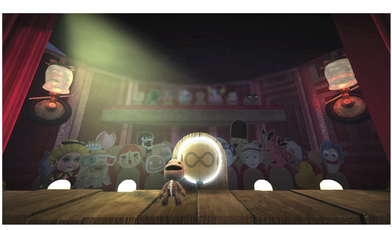

L1

or

R1

to switch between pages and outfit your sack person however you please! Throughout your adventure, there are a multitude of opportunities to increase the Popit wardrobe.

Hurry on up and scurry on up to the right, where a stage is missing its star: you!

Expressing Yourself

Lacking a voice is by no means an excuse not to make your sack person's feelings known. Use the directional buttons to change your sack person's mood. Press

to be happy. Press

to be angry. Press

to be sad. Press

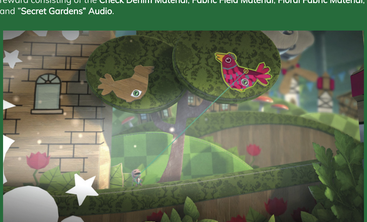

to be scared. Pressing a directional button more than once increases the intensity of your sack person's emotional expression.

After hitting the mark and receiving applause and fanfare, your sack person is headed back off to the right.

The moment your sack person plops down back in the familiar surroundings of Da Vinci's Hideout, you discover someone else is watching your sack person's adventures, too... but who?

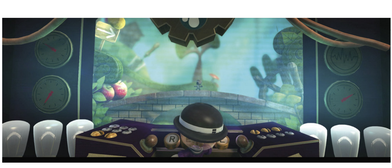

STICKER SUCCESS!

Once you have acquired the Chicken Sticker from Acing the Even Bosses Wear Hats Sometimes... level, return to this very spot! Slap them into the two sticker puzzle positions amid the treetops. Stamping each one releases its own pair of Prize Bubbles, for a total reward consisting of the **Check Denim Material**, **Fabric Field Material**, **Floral Fabric Material**, and **"Secret Gardens" Audio**.

It seems this mysterious observer is quite excited to meet your sack person "in the fabric," so to speak.

Manning a complicated array of controls, the observer makes some accidental changes to the weather before successfully teleporting your sack person—and a good chunk of Da Vinci's Hideout—through a mysterious portal to an uncharted new planet: Bunkum!

THE LEGEND OF BUNKUM

Newton's the name of your sack person's apparent abductor. He's pleased as punch to show his good intentions, however. He offers a warm welcome to Bunkum, a planet thriving with creativity pushed into the atmosphere by its pumping Creative Heart.

Long ago, before the Negativitron, a trio of villains sucked up all the creativity in Bunkum. Three heroes emerged with speed, power, and grace to defeat the Titans, and restore Bunkum. However, a prophecy foretells doom at midnight, and Newton needs your help!

Donkey Kong Country: Tropical Freeze

Video Game Guide for Donkey Kong Country: Tropical Freeze for Wii U. Includes 100% walkthrough, all puzzle pieces, all KONG letters, all puzzle pieces, all secret exits, all secret areas, all bonus rooms, all boss battles, and more!

Donkey Kong Country: Tropical Freeze is a 2D platformer developed by Retro Studios and published by Nintendo for the Wii U. It was released worldwide in February 2014. The game features Donkey Kong and Diddy Kong as playable characters, with Dixie Kong and Cranky Kong as unlockable characters. The game is known for its challenging gameplay, beautiful graphics, and memorable soundtrack.

Prologue: Lost Kong Treasure

Pelican Pier Lowlands

Pelican Pier Lowlands is the first world in Donkey Kong Country: Tropical Freeze. It is a tropical island with a pier, a beach, and a jungle. The world is divided into 4 levels and 1 boss battle.

Walkthrough Chapter 3

Timpot Towers

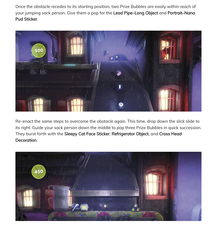

Here at the apex of Stitchem Manor, the legendary Tea Tin is just within reach. But just because she's out of exploding cats doesn't mean Nana Pud is through, not by a long shot. Better get a move on before the mattress and tables another crack at the wooden hero.

BLOWING AGAINST THE WIND

Even amid the winds of this wicked storm, your Pumpinator is capable of showing its power. When the elevator has come up, jump over to the tiny little left corner to grab the **Bunbeat Wallpaper Material** and **Lead Pipe-Corner Decoration** from within their Prize Bubbles.

Proceeding to the right, two more Prize Bubbles lie straight in your path and easily yield the **Complex Wallpaper Design Material** and **Vacuum Hose 2 Decoration**.

Note the blue gear attached to the obstacle ahead. Blowing it with the Pumpinator shifts the obstacle all the way to the right. However, its chains pull it back into place after a few moments. Use the Blue Bounce Pads within this window of time to shoot up and land on top of the obstacle. Brilliant!

Once the obstacle recedes to its starting position, two Prize Bubbles are easily within reach of your jumping sock person. Give them a pop for the **Lead Pipe-Long Object** and **Portrait-Nana Pud Sticker**.

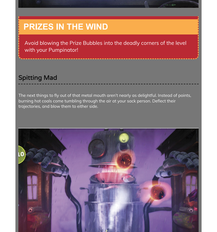

Re-enact the same steps to overcome the obstacle again. This time, drop down the stick side to its right. Guide your sock person down the middle to pop three Prize Bubbles in quick succession. They burst forth with the **Sloppy Cat Face Sticker**, **Refrigerator Object**, and **Cress Head Decoration**.

After your sock person lands, two more Prize Bubbles sit to the left and award the **Cat Tail Sticker** and **Furnace Door Decoration**.

GET IT WHILE IT LASTS

Be on the lookout for **Collectible** stuff that you can pop for Prize Bubbles then for the **Vacuum Hose 2 Decoration** and **Metal Step Pipe Object**. The monsters attack from Nana Pud's massive automaton quickly breaks apart the ground beneath your sock person, leaving the Prize Bubbles out of each afterwards. Hesitating for a moment means replaying the level to get another chance at it.

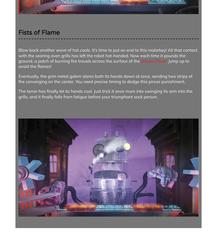

While running ahead, don't be too shaken up by the sudden intrusion of a metal fist that smashes up the ground. No worse for wear, scurry around indoors for the next door. The elements are soon bearing down once more, though, when the mechanical menace tears the roof off the room.

Take cover to the left for a Prize Bubble offering the **Portrait-Flowers Sticker**.

Drop down to the Checkpoint, and then leap along a jam slide through two Prize Bubbles. The **Vacuum Hose Port Decoration** and **Cake Tin Decoration** they cough up are a nice gift before the confrontation that follows.

HEARTLESS TIN MAN

At last, the automaton we've been hastily removing your sock person meets itself. A ghastly combination of pots, piping, and all other manner of kitchenware has been assembled into an antagonistic automaton!

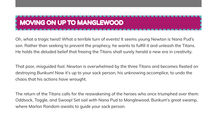

POUND FOR POUND

Beware the mighty fists that threaten overhead, as the rampaging robot slams them down with lethal consequences.

Pumped And Piping Hot

Keep the Pumpinator in your sock person's soft little hand at all times during this battle. It's absolutely integral to success.

Locate the two big blue gears on either side of the stage. Keep them spinning to heat up the oven grills below, while also continuously moving side to side and avoiding being squished.

After you're ducked a few fists striking the ground, the padded platform transforms into a row of glowing Blue

Scoring Sack over Fist

Nana Pud's gargantuan maniac is tired of mucking about, and it's ready to sweep the floor with your sock person. Avoid fear for it to slam its fist to the ground, and then begin sliding it to the left or right. Press to launch your sock person airborne with the Blue to avoid being struck down.

Pounded that you've kept the oven grill-race and hot, the angry automaton's hand is sure to be scorched. Even its metal construction can't withstand the heat!

The robot is positively homing at the mouth. Among the Score Bubbles it spews are three Prize Bubbles offering the **Grease Stain Sticker**, **Rasher of Bacon Decoration**, and **Cutlery 2 Material**.

PRIZES IN THE WIND

Avoid blowing the Prize Bubbles into the deadly corners of the level with your Pumpinator!

Spitting Mad

The next things to fly out of that metal mouth aren't nearly as delightful. Instead of paints, burning hot coals come barreling through the air at your sock person. Deflect their trajectories, and blow them to either side.

Put Your Hands Together

Don't confuse the clapping of robotic hands for applause! It's trying its hardest to squish your sock person like a bug. Bounce over them before they slam together, then wait for the robot to take another swipe with a single arm. Keep the oven hot in the meantime, since you can't be sure which side the attack begins from.

Dodging the powerful palm once more and letting it slam into the hot grill causes the titanic threat to shudder again in pain and spit out Score Bubbles and Prize Bubbles. Be sure to nay the Tin Toy Object, "It's Alive" Audio, and Gas Cooker Knob Object they offer.

Fists of Flame

Blow back another wave of hot coals. It's time to put an end to this malarkey! All that contact with the searing-warm grills has left the robot hot-headed. Now each time it pounds the ground, it's capable of burning the towels across the surface of the Jump up to avoid the flames!

Eventually, the semi-metal-gauze slams both its hands down at once, sending two strips of fire converging on the center. You need precise timing to dodge this period punishment.

The terror has finally let its hands cool. Just trick it once more into swinging its arm into the grills, and it finally falls from fatigue before your triumphant sock person.

MOVING ON UP TO MANGLEWOOD

Oh, what a tragic twist! What a terrible turn of events! It seems young Newton is Nana Pud's son. Rather than seeking to prevent the prophecy, he wants to fulfill it and unleash the Titans. He holds the detailed belief that freeing the Titans shall surely herald a new era in creativity.

That poor, misguided fool. Newton is overwhelmed by the three Titans and becomes fodder on destroying Bunkum! Now it's up to your sock person, his unknowing accomplice, to undo the chaos that his actions have wrought.

The return of the Titans calls for the reawakening of the heroes who once triumphed over them: Oddsock, Toggle, and Swaysail Set sail with Nana Pud to Manglewood, Bunkum's great swamp, where Morton Random awaits to guide your sock person.

Now that everything is in order, it's time to put the finishing touches on the place. Add some flair by painting the walls, hanging pictures, and placing decorations around the room. Once you're done, you'll have a fully furnished home that you can be proud of.

Accessorize Your Apartment

Before moving in, decorate the place to your liking. Add some personal touches to make it feel like home. Hang pictures, add some plants, and maybe even paint the walls a different color.

Ha-Scaffing, Coming Through!

Ha-Scaffing, Coming Through! is the first Decoration Task in Accessorize Your Apartment.

Ha-Scaffing, Coming Through! is the first Decoration Task in Accessorize Your Apartment. It requires the player to place a Scaffold in the Living Room. The task is unlocked after completing the Finishing Touches task.

Upon completion of the task, the player will receive 1,000 coins, 1,000 experience points, 10 energy, and 1 hour of time. The task also unlocks the Decorations feature.

The Scaffold can be moved around the room by dragging it with the mouse. It can be placed in any location that is not already occupied by another object.

Once the Scaffold is placed, the task will be marked as complete. The player can then move on to the next task in Accessorize Your Apartment.

Ha-Scaffing, Coming Through! is a simple task that introduces the player to the basics of decorating their apartment. It is a good way to get started with the Decorations feature.

Hang Pictures

Hang Pictures is the second Decoration Task in Accessorize Your Apartment. It requires the player to hang a picture on the wall in the Living Room. The task is unlocked after completing the Ha-Scaffing, Coming Through! task.

Upon completion of the task, the player will receive 1,000 coins, 1,000 experience points, 10 energy, and 1 hour of time. The task also unlocks the Decorations feature.

The picture can be moved around the wall by dragging it with the mouse. It can be placed in any location that is not already occupied by another object.

Once the picture is placed, the task will be marked as complete. The player can then move on to the next task in Accessorize Your Apartment.

Hang Pictures is a simple task that introduces the player to the basics of decorating their apartment. It is a good way to get started with the Decorations feature.

Assemble Shelf

Assemble Shelf is the third Decoration Task in Accessorize Your Apartment. It requires the player to assemble a shelf in the Living Room. The task is unlocked after completing the Hang Pictures task.

Upon completion of the task, the player will receive 1,000 coins, 1,000 experience points, 10 energy, and 1 hour of time. The task also unlocks the Decorations feature.

The shelf can be moved around the room by dragging it with the mouse. It can be placed in any location that is not already occupied by another object.

Once the shelf is placed, the task will be marked as complete. The player can then move on to the next task in Accessorize Your Apartment.

Assemble Shelf is a simple task that introduces the player to the basics of decorating their apartment. It is a good way to get started with the Decorations feature.

Paint Time

Paint Time is the fourth Decoration Task in Accessorize Your Apartment. It requires the player to paint the walls in the Living Room. The task is unlocked after completing the Assemble Shelf task.

Upon completion of the task, the player will receive 1,000 coins, 1,000 experience points, 10 energy, and 1 hour of time. The task also unlocks the Decorations feature.

The walls can be painted by selecting a color from the paint can and then clicking on the walls. The player can choose from a variety of colors.

Once the walls are painted, the task will be marked as complete. The player can then move on to the next task in Accessorize Your Apartment.

Paint Time is a simple task that introduces the player to the basics of decorating their apartment. It is a good way to get started with the Decorations feature.

Decorate Desk

Decorate Desk is the fifth Decoration Task in Accessorize Your Apartment. It requires the player to decorate the desk in the Living Room. The task is unlocked after completing the Paint Time task.

Upon completion of the task, the player will receive 1,000 coins, 1,000 experience points, 10 energy, and 1 hour of time. The task also unlocks the Decorations feature.

The desk can be decorated by placing various objects on it, such as books, plants, and picture frames. The player can choose from a variety of objects.

Once the desk is decorated, the task will be marked as complete. The player can then move on to the next task in Accessorize Your Apartment.

Decorate Desk is a simple task that introduces the player to the basics of decorating their apartment. It is a good way to get started with the Decorations feature.

Arrange Furniture

Arrange Furniture is the sixth Decoration Task in Accessorize Your Apartment. It requires the player to arrange the furniture in the Living Room. The task is unlocked after completing the Decorate Desk task.

Upon completion of the task, the player will receive 1,000 coins, 1,000 experience points, 10 energy, and 1 hour of time. The task also unlocks the Decorations feature.

The furniture can be arranged by dragging it with the mouse. The player can choose from a variety of furniture items.

Once the furniture is arranged, the task will be marked as complete. The player can then move on to the next task in Accessorize Your Apartment.

Arrange Furniture is a simple task that introduces the player to the basics of decorating their apartment. It is a good way to get started with the Decorations feature.

Add Wall Decor

Add Wall Decor is the seventh Decoration Task in Accessorize Your Apartment. It requires the player to add wall decor to the Living Room. The task is unlocked after completing the Arrange Furniture task.

Upon completion of the task, the player will receive 1,000 coins, 1,000 experience points, 10 energy, and 1 hour of time. The task also unlocks the Decorations feature.

The wall decor can be added by dragging it with the mouse. The player can choose from a variety of wall decor items.

Once the wall decor is added, the task will be marked as complete. The player can then move on to the next task in Accessorize Your Apartment.

Add Wall Decor is a simple task that introduces the player to the basics of decorating their apartment. It is a good way to get started with the Decorations feature.

Add Rugs

Add Rugs is the eighth Decoration Task in Accessorize Your Apartment. It requires the player to add rugs to the Living Room. The task is unlocked after completing the Add Wall Decor task.

Upon completion of the task, the player will receive 1,000 coins, 1,000 experience points, 10 energy, and 1 hour of time. The task also unlocks the Decorations feature.

The rugs can be added by dragging them with the mouse. The player can choose from a variety of rug items.

Once the rugs are added, the task will be marked as complete. The player can then move on to the next task in Accessorize Your Apartment.

Add Rugs is a simple task that introduces the player to the basics of decorating their apartment. It is a good way to get started with the Decorations feature.

Add Plants

Add Plants is the ninth Decoration Task in Accessorize Your Apartment. It requires the player to add plants to the Living Room. The task is unlocked after completing the Add Rugs task.

Upon completion of the task, the player will receive 1,000 coins, 1,000 experience points, 10 energy, and 1 hour of time. The task also unlocks the Decorations feature.

The plants can be added by dragging them with the mouse. The player can choose from a variety of plant items.

Once the plants are added, the task will be marked as complete. The player can then move on to the next task in Accessorize Your Apartment.

Add Plants is a simple task that introduces the player to the basics of decorating their apartment. It is a good way to get started with the Decorations feature.

Add Finishing Touches

Add Finishing Touches is the tenth Decoration Task in Accessorize Your Apartment. It requires the player to add finishing touches to the Living Room. The task is unlocked after completing the Add Plants task.

Upon completion of the task, the player will receive 1,000 coins, 1,000 experience points, 10 energy, and 1 hour of time. The task also unlocks the Decorations feature.

The finishing touches can be added by dragging them with the mouse. The player can choose from a variety of finishing touch items.

Once the finishing touches are added, the task will be marked as complete. The player can then move on to the next task in Accessorize Your Apartment.

Add Finishing Touches is a simple task that introduces the player to the basics of decorating their apartment. It is a good way to get started with the Decorations feature.

Decorate Bathroom

Decorate Bathroom is the eleventh Decoration Task in Accessorize Your Apartment. It requires the player to decorate the bathroom in the Living Room. The task is unlocked after completing the Add Finishing Touches task.

Upon completion of the task, the player will receive 1,000 coins, 1,000 experience points, 10 energy, and 1 hour of time. The task also unlocks the Decorations feature.

The bathroom can be decorated by placing various objects in it, such as towels, soap, and shower curtains. The player can choose from a variety of objects.

Once the bathroom is decorated, the task will be marked as complete. The player can then move on to the next task in Accessorize Your Apartment.

Decorate Bathroom is a simple task that introduces the player to the basics of decorating their apartment. It is a good way to get started with the Decorations feature.

Add Finishing Touches

Add Finishing Touches is the twelfth Decoration Task in Accessorize Your Apartment. It requires the player to add finishing touches to the Living Room. The task is unlocked after completing the Decorate Bathroom task.

Upon completion of the task, the player will receive 1,000 coins, 1,000 experience points, 10 energy, and 1 hour of time. The task also unlocks the Decorations feature.

The finishing touches can be added by dragging them with the mouse. The player can choose from a variety of finishing touch items.

Once the finishing touches are added, the task will be marked as complete. The player can then move on to the next task in Accessorize Your Apartment.

Add Finishing Touches is a simple task that introduces the player to the basics of decorating their apartment. It is a good way to get started with the Decorations feature.

Decorate Kitchen

Decorate Kitchen is the thirteenth Decoration Task in Accessorize Your Apartment. It requires the player to decorate the kitchen in the Living Room. The task is unlocked after completing the Add Finishing Touches task.

Upon completion of the task, the player will receive 1,000 coins, 1,000 experience points, 10 energy, and 1 hour of time. The task also unlocks the Decorations feature.

The kitchen can be decorated by placing various objects in it, such as dishes, pots and pans, and appliances. The player can choose from a variety of objects.

Once the kitchen is decorated, the task will be marked as complete. The player can then move on to the next task in Accessorize Your Apartment.

Decorate Kitchen is a simple task that introduces the player to the basics of decorating their apartment. It is a good way to get started with the Decorations feature.

Add Finishing Touches

Add Finishing Touches is the fourteenth Decoration Task in Accessorize Your Apartment. It requires the player to add finishing touches to the Living Room. The task is unlocked after completing the Decorate Kitchen task.

Upon completion of the task, the player will receive 1,000 coins, 1,000 experience points, 10 energy, and 1 hour of time. The task also unlocks the Decorations feature.

The finishing touches can be added by dragging them with the mouse. The player can choose from a variety of finishing touch items.

Once the finishing touches are added, the task will be marked as complete. The player can then move on to the next task in Accessorize Your Apartment.

Add Finishing Touches is a simple task that introduces the player to the basics of decorating their apartment. It is a good way to get started with the Decorations feature.

Decorate Bedroom

Decorate Bedroom is the fifteenth Decoration Task in Accessorize Your Apartment. It requires the player to decorate the bedroom in the Living Room. The task is unlocked after completing the Add Finishing Touches task.

Upon completion of the task, the player will receive 1,000 coins, 1,000 experience points, 10 energy, and 1 hour of time. The task also unlocks the Decorations feature.

The bedroom can be decorated by placing various objects in it, such as beds, dressers, and nightstands. The player can choose from a variety of objects.

The Titan has manifested itself as a hideous sea creature that can always guarantee the spotlight is on itself, quite literally. As Oddsock, agility is the key to defeating this monstrosity and capturing the Titan in its rightful prison.

PIER PRESSURES

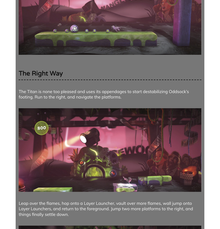

The tentacles of the beast dredge up deadly balls of tar from the murky depths below. Wall jump off of the wooden posts emerging from the waters nearby to leap over the danger.

A big red button appears on the wooden surface. Continue dodging the balls until you can wall jump off the button to launch the attached missile at the Titan.

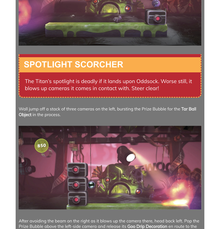

This causes the abomination to spew a Prize Bubble. Pop it to receive the **Boom Mic Sticker**.

The Titan increases its rate of attack and now also rolls out smaller balls of lethal tar. Avoid touching them until another missile opportunity presents itself.

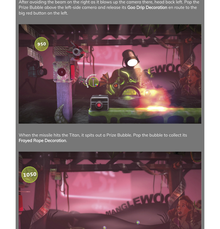

Wall jump again into the button to blast the Titan again, and once more, receive a Prize Bubble for your trouble. It's got the **Film Reel Object** inside of it.

The Right Way

The Titan is sore two-pinsed and uses its appendages to start destabilizing Oddsock's footing. Run to the right, and navigate the platforms.

Leap over the flames, hop onto a Layer Launcher, vault over more flames, and jump onto Layer Launchers, and return to the foreground. Jump two more platforms to the right, and things finally settle down.

UNSTABLE FILM STOCK

The Titan now resorts to the leftover cameras littering the studio. One drops into place on the right, with a Prize Bubble above it. Quickly seize the brief opportunity to pop the Prize Bubble for its **Tar Bubble 2 Object**.

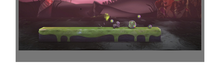

SPOTLIGHT SCORCHER

The Titan's spotlight is deadly if it lands upon Oddsock. Worse still, it blows up cameras it comes in contact with. Steer clear!

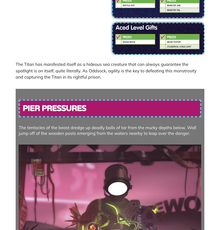

Wall jump off a stack of three cameras on the left, bursting the Prize Bubble for the **Tar Ball Object** in the process.

After avoiding the beam on the right as it blows up the camera there, head back left. Pop the Prize Bubble above the left-side camera and release its **Gas Drip Decoration** en route to the big red button on the left.

When the missile hits the Titan, it spits out a Prize Bubble. Pop the bubble to collect its **Frayed Rope Decoration**.

BACKGROUND PLAYER

The Titan is throwing everything it's got now! Run to the left, and hit the Layer Launchers to get into the background.

Wall run up the curved ground to the right, wall jumping off to reach the Prize Bubble and the **Foam the Swamp Sign Sticker** within.

Keep wall jumping to reach the top, where a Prize Bubble holding the **Pinball Star Bumper Sticker** sits.

Jump from that height down to Layer Launchers that send Oddsock back to the front.

From here on out, the danger comes entirely from the right side. Stacks of blocks ranging in height come at a relentless pace, jump over them, and use the wood post on the left to wall jump over those that are too tall for Oddsock to clear.

Eventually, the welcome sight of a big red button appears on the left. This is it! Wall jump into it, and fire the final missile needed to topple the Titan. Before the Scoreboard appears, pop the Prize Bubble it spits out with its last bit of energy to obtain the **Rusted Metal Material**.

Everything's better with a friend! There are some things you just can't do alone. Intrepid Bunkum reporter Felicia needs some help to access a big sticky log, but she can't leverage to get there on her own. Bring along a reliable companion! If you want to take on this level and reap its rewards, Coordination is paramount. Are You?

TANDEM TEAMWORK

Never Far Apart

Leaving Felicia to the right, the level camera will zoom out, revealing a sticky log. Use the Pompadour equipped to make sense of this obstacle. While one sack person pushes the spring-loaded blue platform out, the other can bounce on top of it and climb over the other side.

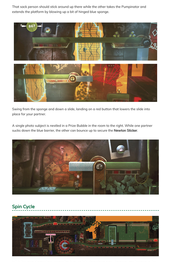

Climbing Partner

Leaving Felicia to the right, the level camera will zoom out, revealing a sticky log. Use the Pompadour equipped to make sense of this obstacle. While one sack person pushes the spring-loaded blue platform out, the other can bounce on top of it and climb over the other side.

Once there, both can climb the resin lights to the next level up. While one sack person climbs another resin lighting rig, the other must blow the wolf-mounted Bounce Pads upward.

This puts the pads high enough to hit the climbing sack person bounce off of them and reach the exit button way up high. That button moves the resin lights to the right so that the sack person left behind can climb up to the next area.

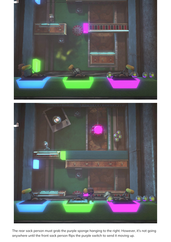

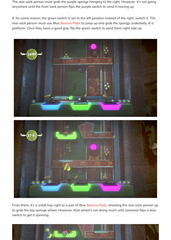

Reunited briefly, take the Lupin Launchers into the background. A resin light offers the fastest direction passage to a Prize Bubble in the upper left that gives the **Captain Pad Sticker**.

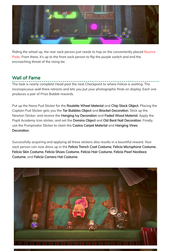

That sack person should stick around up there while the other takes the Pumpinator and extends the platform by blowing up a bit of fringed blue sponge.

Seeing from the sponge and down a slide, landing on a soft button that boasts the slide into place for your partner.

A single photo subject is nestled in a Prize Bubble in the room to the right. While one partner bucks down the blue barrier, the other can bounce up to secure the **Newton Sticker**.

Spin Cycle

With this area cleared out, scurry North to the left, drop down past the resin, and bounce to the next Checkpoint.

The red and blue sparkle wheel here is susceptible to the Pumpinator. One sack person can grab onto it while the other blows the wheel clockwise. Once up high, fittingly, it's possible to leap and pop the Prize Bubble that holds the **Pumpinator Sticker**.

Let the top sack person spin the wheel next so that the bottom doesn't get left behind.

As You Squish!

Be sure to spin the wheel the correct way. Spinning it counterclockwise runs the risk of sending your sack person to a crushing fate.

Sponges and Spikes

Once up a platform with the two backs, One sack person needs to climb the resin spring in the background and assist the spikes. The sack person in the foreground must use the Pumpinator to carefully blow the blue sponge attached to the resin light that the rear partner is clinging to.

While the front sack person finds a dead end, the rear can hit a red button to clear the way.

Color Me Excited

Climb or bounce to get to the right, where there's a chance to swap responsibilities and layers with the Lupin Launchers. One sack person must stay in each layer to progress any further, though.

The rear sack person must stay on the red button, opening the door to three colored switches in the foreground. Getting to the top of this area requires expert timing and perfect coordination.

XOXO TOES

The interface for this section is flipped, the toe starts to toe. Make sure both sack people are ready before getting started.

Start by flipping the blue and green switches to give the rear sack person climbable surfaces. **Uh**

The rear sack person must begin to the right and land, one layer back, onto Blue Bounce Pads. The front sack person can flip the purple switch to expose a platform above, allowing the rear sack person to head on top of it after using the Blue Bounce Pads.

The blue and green switches must be immediately flipped to clear obstructions above the next pair of Blue Bounce Pads to the left.

Once your partner is clear, flip their green switch back again, revealing two Blue Bounce Pads. They are the key to popping the Prize Bubble suspended overhead that bears the **Pupil Academy Icon Sticker**.

The rear sack person must grab the purple sponge hanging to the right. However, it's not going anywhere until the front sack person flips the purple switch to send it back up.

If, for some reason, the green switch is set to the left position instead of the right, switch it. The front sack person can then use the Blue Bounce Pads to reach a platform above the purple platform. Once they have a good grip, flip the green switch to send them right up.

From there, it's a small hop right to a pair of Blue Bounce Pads, shooting the rear sack person up to grab the hi-top sponge! However, that wheel's not doing much until someone flips a few switch to get it spinning.

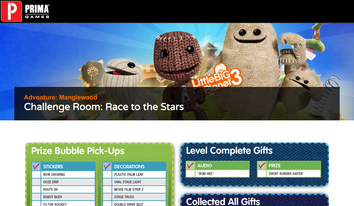

Riding the wheel up, the rear sack person just needs to hop on the conveniently placed Bounce Pads to reach the top. Once there, the front sack person is flip the purple switch and let the mischief-making threat of the rising ice.

Wall of Fame

Finally, the last and completed mural past the next Checkpoint to which Felicia is walking. The accompanying wall them retracts and lets you put your photographic finds on display. Each one produces a pair of Prize Bubble rewards.

Put up the Nana Pad Sticker for the **Rudolfo Wheel Materials** and **Chip Stack Object**. Placing the Mona Lisa Sticker gives the **Mona Lisa Materials** and **Mona Lisa Costume**. Finishing with the Newton Sticker, and sooner the **Hanging Ivy Decoration** and **Field Wood Material**. Apply the Pupil Academy Icon sticker, and net the **Domino Object** and **Old Net Hat Decoration**. Finally, place the Captain Pad Sticker to claim the **Cosmo Carpet Material** and **Hanging Vines Decoration**.

Successfully acquiring and applying all three stickers also results in a bountiful reward. Your sack person can now dress up in the **Felicia Ranch Cub Costume**, **Felicia Mongolfiere Costume**, **Felicia Skin Costume**, **Felicia Shoes Costume**, **Felicia Hair Costume**, **Felicia Pearl Necklace Costume**, and **Felicia Camera Hat Costume**.

Gather all the heroes of Bunkum alongside your sack person for a star-studded jaunt through puzzles demanding that everyone make the most of their unique skills. Make your way through and to the rocket ship in time for liftoff!

FEARSOME FOURSOME

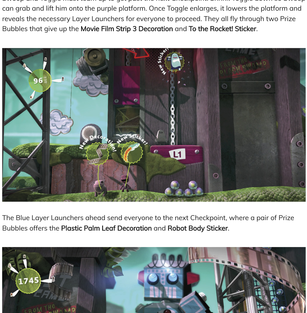

Swoop to Start

It's up to Swoop to clear the first obstacle and secure the first Prize Bubble. Grab the sponges to lift the spiked barriers for Oddsock and your sack person. The Prize Bubble up top awards the **Now ShowingSticker**.

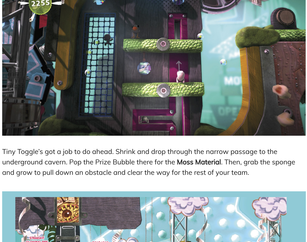

Meanwhile, Toggle should shrink down and scurry through the lower passage to pop the two Prize Bubbles underground. They offer the **It Camel Sign Sticker** and **In 3D SignSticker**.

Everyone Get Pumped!

Your sack person's Pumpinator is needed to raise the threatening spikes on the barrier ahead. Once everyone is past, your sack person can climb up. Alternately, Oddsock can wall jump, or Swoop can fly, to reach the trio of Prize Bubbles tucked in the upper-left corner. They offer up the **Ooze Drip Sticker** and **Route 99 Sticker**.

Both can also easily get the dangling Prize Bubble above and to the left. Toggle, with some speed, can enlarge to weigh down the robot springs and then shrink to launch and nab it first. Either way, they all get the **Oval Stage Light Decoration**.

Heroes Large and Small

Swoop and Toggle must team up to get past the next Checkpoint. Shrink Toggle down so Swoop can grab and lift him onto the purple platform. Once Toggle enlarges, it lowers the platform and reveals the necessary Layer Launchers for everyone to proceed. They all fly through two Prize Bubbles that give up the **Movie Film Strip 3 Decoration** and **To the Rocket! Sticker**.

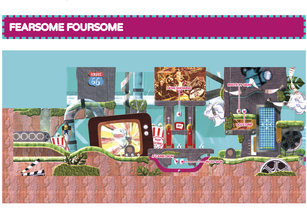

The Blue Layer Launchers ahead send everyone to the next Checkpoint, where a pair of Prize Bubbles offers the **Plastic Palm Leaf Decoration** and **Robot Body Sticker**.

Swoop can carry everyone through to the next Checkpoint if they prefer not to climb and wall jump; just don't miss the **Movie Film Strip 2 Decoration**, **Stage Truss Decoration**, and **Double Drive Belt Decoration**.

Tiny Toggle's got a job to do ahead. Shrink and drop through the narrow passage to the underground cavern. Pop the Prize Bubble there for the **Moss Material**. Then, grab the sponge and grow to pull down an obstacle and clear the way for the rest of your team.

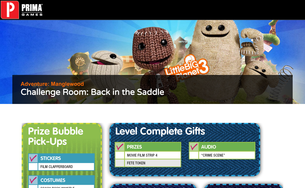

Reunited

While waiting, Swoop can pop the lingering Prize Bubble for the **Straight Glowing Pipe Decoration**. Once on the other side, he can also get the two Prize Bubbles there for the **Wind Curl Decoration** and **Dead Leaf Decoration**.

For Toggle to rejoin the group, your sack person must blow down the blue wall with the Pumpinator.

And there you have it! The rocket's cockpit is ready and waiting. Go ahead and take off with Marlon Random into orbit and super-stardom!

WALL-TO-WALL ACTION

Green is Good

This Challenge Room lives up to the title, taking place within the same four walls. But, oh, what an immense amount of running and jumping Coach Rock manages to fit within this small space.

To pass the test, Oddsock must traverse a series of walls and platform arrangements, hitting the pink sensor surfaces to switch them to green. Once switched, visible meters count down before they reset to being pink. All sensors surfaces need to be green to activate the next acrobatic challenge configuration.

After a brief countdown, Oddsock has to get a move on!

Hitting Your Marks

To ensure that you finish in time, follow the ideal routes indicated by the arrows in the following screens.

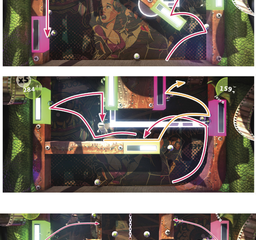

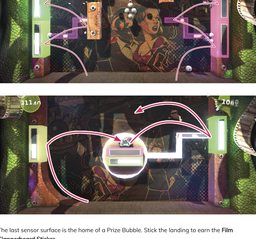

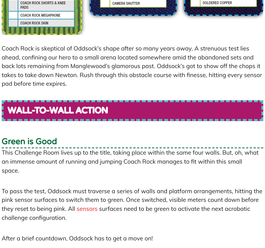

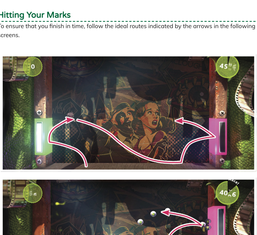

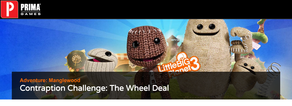

The last sensor surface is the home of a Prize Bubble. Stick the landing to earn the **Film Clapperboard Sticker**.

Beat the time, and you are rewarded with the **Coach Rock Whistle Costume**, **Coach Rock Jersey & Wristbands Costume**, **Coach Rock Goal Post Helmet Costume**, **Coach Rock Boots Costume**, **Coach Rock Shorts & Knee Pads Costume**, **Coach Rock Megaphone Costume**, and **Coach Rock Skin Costume**.

Adventure: Mangiewood

Contraption Challenge: The Wheel Deal

Que pasa? Are you ready to burn some rubber? If you've got the need for speed, The Wheel Deal is the Contraption Challenge for you. Assemble a hot rod that can best the current champion, Gustavo.

BURNING RUBBER

Components of Victory

Gustavo's a sporting challenger. He offers the starting parts you need to build a competitive ride. Assemble each piece of the car as he supplies them: **Pumpkin Chassis Object** with **Tennis Ball Wheel Object** in both front and rear wheel positions marked with L1 and R1. It may seem odd for a race, but go ahead and place the **Balloon Object** over the area labeled with ●.

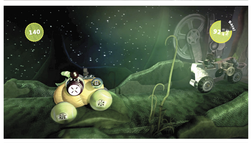

Your first time out is going to be rough. Focus less on beating Gustavo than on collecting Prize Bubbles. Keeping a low profile throughout nets you the **Square Wheel Object**, **Flipper Object**, **Bottle Chassis Object**, **Jerry Can Chassis Object**, **Cog Wheel Object**, **Skate Chassis Object**, and **Toy Car Wheel Object**.

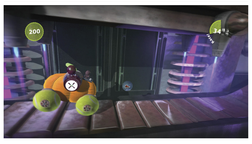

LAST, BUT NOT LEAST

To get one particular Prize Bubble, you have no choice but to virtually toss in the towel. As your car approaches a green ramp in front of the rolling camera, slow down! Dropping down below reveals the presence of a Prize Bubble containing the **Pipe Chassis Object**.

Race for the Prizes

You can build a better ride with these parts the next time you race Gustavo. However, you can have even more options in the shop when using the Balloon at strategic points to snatch Prize Bubbles resting high above.

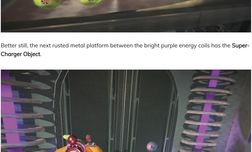

After the exterior stretch, rise up to obtain the **Triangular Hose Chassis Object**.

Taking off from the next peak in the track, there's the invaluable **Thruster Object**.

Better still, the next rusted metal platform between the bright purple energy coils has the **Super-Charger Object**.

Tune your ride with new parts, and then cross the finish line in first place before time runs out to earn the Prize Bubbles for the **Polished Wood Material**, **Watch Pin Object**, **Foil Suit Material**, **Square Wheel Object**, **Vintage Ice Skate Object**, **Vegetable Box Material**, **Lab Clamp Base Object**, **Tractor Wheel Object**, **Dull Metal Material**, **Crushed Can Object**, **Tennis Ball Object**, **Cloth Pumpkin Object**, and **Plastic Bottle Object**.

Shakes aren't everyone's cup of tea, so to speak. Your sack person has been lured into a rather devious diner by a sinister, hamburger-headed host by the name of Irene. She's insisted that "Matilda the Ravenous" is threatening to shut down the kitchen altogether. Could this have something to do with the rash of disappearances lately?

SACK PERSON SPLIT

All for One, One for All

There's nowhere to go besides following the flashing blue arrow. Direct your sack person to drop into the mysterious machinery that churns out this diner's specialty.

What a shock! Your sack person has fallen into a trap and is now eight tiny sack people. All move in perfect synchronicity. But beware: obstacles can separate them and result in lost sack personages. In order to collect everything that this level rewards, you must preserve at least six until the very end.

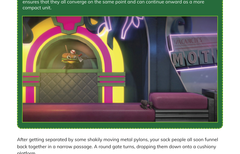

Irene insists that your sack person feed its many selves to Matilda, located deep in the diner's underbelly. With no direction to go but rightward, get a move on that way, and hope Matilda doesn't chew thoroughly!

RALLYING THE TROOPS

Use walls at every opportunity to gather up your sack people. Running straight into walls ensures that they all converge on the same point and can continue onward as a more compact unit.

After getting separated by some shakily moving metal pylons, your sack people all soon funnel back together in a narrow passage. A round gate turns, dropping them down onto a cushiony platform.

Be cautious around the drop-off ahead. Don't rush off it, just let the sack people fall, and then guide them left while in mid-air to press against the wall. They all fall onto the Bounce Pads as one and are propelled together to the platform.

Run to the right, and jump toward the checkered circle hanging from the ceiling. Grab it, and your sack people should all be holding on to either it or each other. Swing forward and release their grasp to land safely. Try not to lose any to the exposed appliance circuitry below.

Six and Up

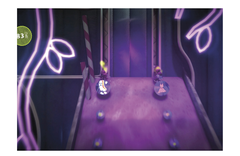

For having preserved at least six sack people thus far, you are awarded six Prize Bubbles containing the **Fresh Eggs Sign Sticker**, **Waitress Head Sticker**, **Popcorn Mascot Sticker**, **Sad Sackthing Doodle Sticker**, **Monsters Attack Sign Sticker**, and **"Rabbit Pushin' Mower" Audio**.

Regroup your sack people against the wall ahead before hopping atop it. They must all grab the giant spinning checkered wheel. An electrically charged wall directly ahead punishes poor timing.

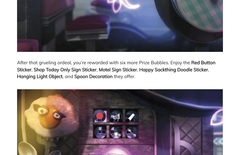

Jump over the gap ahead, and funnel all your sack people into the narrow passage. The spinning mechanism drops them down parallel tracks through a pair of Prize Bubbles bearing the **Hotdog Mascot Sticker** and **Waitress Body Sticker** and then down a slide.

Realign your squad against the next wall, then jump up to another large spinning wheel in need of grabbing. This time, your sack people must leap from a spinning wheel to a smaller stationary circle. Swing from the smaller circle to land safely on the other side.

After that grueling ordeal, you're rewarded with six more Prize Bubbles. Enjoy the **Red Button Sticker**, **Shop Today Only Sign Sticker**, **Mattel Sign Sticker**, **Happy Sackthing Doodle Sticker**, **Hanging Light Object**, and **Spoon Decoration** they offer.

Mind the Gaps

Continue to the left, where your sack people are again funneled and dropped down parallel lines. This time, they're deposited on separate platforms. Proceed with confidence, as the slightest hesitation in your jumps is sure to doom your tiny charges.

Once they're all back together on the same platform, direct them onward to the right. When all have dropped off the next ledge, backtrack to group them together once more; they must be close to survive the next jumps. Thrusting electrical components occupy the deadly gaps ahead. Jump between platforms while they recede.

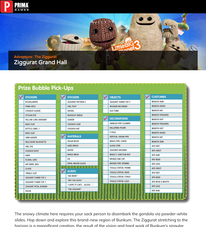

Once clear, you are in the home stretch. Your six or more sack people get showered with six additional Prize Bubbles. Now your Pearl has the **Number Six Sticker**, **Tomato Sauce Splat Sticker**, **Coloured Leather Material**, **Screaming Mouth Sticker**, **Wash Cloth Material**, and **Glazed Cherry Material**.

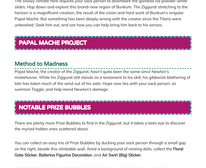

Keep Feeding 'Em

Past the Fresh Eggs sign above the next Checkpoint is a slippery, shale-covered slide. Your sack people all wind up atop Blue Layer Launchers. Press ⓐ to launch them straight into Matilda's waiting mouth. Your sack person is digested and returned to a single entity within Matilda's stomach. Fingers crossed, and bottoms up!

Adventure 19
Ziggurat Grand Hall

Prize Bubble Pick-Ups

The snowy climate here requires your sack person to disambiguate the gondolas via powder white slides. Hop down and explore this brand-new region of Bunkum. The Ziggurat stretching to the horizon is a magnificent creation, the result of the vision and hard work of Bunkum's singular Papal Mache. But something has been deeply wrong with the creator since the Thorns were unleashed. Seek him out, and see how you can help bring him back to his senses.

PAPAL MACHE PROJECT

Method to Madness

Papal Mache has created all the Sackbots in Bunkum, but his methods have become rather misdirected. While his Ziggurat still stands as a testament to his skill, his goldenish blathering of late has taken much of the weird out of his walk. Hope now lies with your sack person, so summon Toggle and help restore Mr Hewlett's demeanor.

NOTABLE PRIZE BUBBLES

There are plenty more Prize Bubbles to find in the Ziggurat, but it takes a keen eye to discover the myriad hidden ones scattered about.

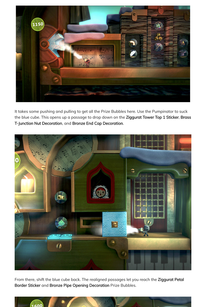

You can collect an easy trio of Prize Bubbles by ducking your sack person through a small gap on the right, beside the climbable wall. Amid a background of existing dolls, collect the **Floral Gate Sticker**, **Ballerina Figurine Decoration**, and **Air Swirl** (Big) **Sticker**.

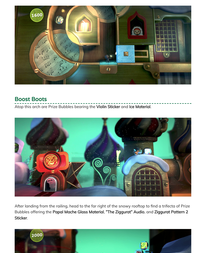

TWO-QUEST MINIMUM

Two players are needed to get past this barrier. They can then use Hook Hats to reach a twin player Challenge Level. Don't forget to pop the Prize Bubble by the level entrance and receive the **"I Hope It's Hot...Blood..." Audio**.

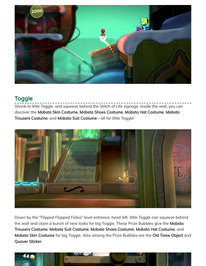

Illuminator

This featured ballerina deserves a spotlight. Show the Illuminator upon her, and watch as Prize Bubbles bearing the **Brass Mesh Mohrbeil**, **I' Hole Decoration**, and **Vertical Organ Pipe Decoration** appear.

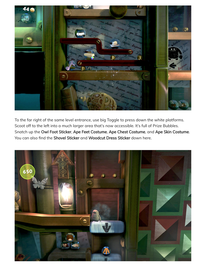

Pumpinator

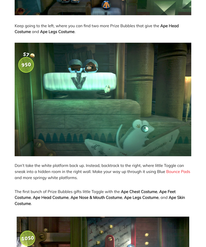

Don't call it quits too early down here. You haven't cleared it out until you use the Pumpinator on the blue gear and voice the **Cloud Sticker**, **Brass Pipe-Curve Decoration**, **Wooden Recorder Object**, **Glass Star Decoration**, **Treble Clef Sticker**, and **Ziggurat Archway Decoration**. Move quickly to pop them, or bring a friend!

It takes some pushing and pulling to get all the Prize Bubbles here. Use the Pumpinator to suck the blue cube. This opens up a passage to drop down on the **Ziggurat Tower Top 1 Sticker**, **Brass T-junction Rod Decoration**, and **Bronze End Cap Decoration**.

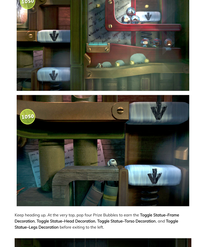

From there, shift the blue cube back. The realigned passages let you reach the **Ziggurat Petal Border Sticker** and **Bronze Pipe Opening Decoration** Prize Bubbles.

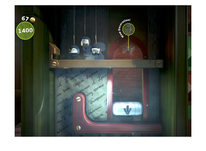

Boost Boots

Atop this arch are Prize Bubbles bearing the **Violin Sticker** and **Ice Material**.

After landing from the rafting, head to the far right of the snowy rooftop to find a trifecta of Prize Bubbles offering the **Papal Mache Glass Mohrbeil**, **"The Ziggurat!" Audio**, and **Ziggurat Potters 2 Sticker**.

Toggle

Once you've found the **Mobiotic Skin Costume**, **Mobiotic Shoes Costume**, **Mobiotic Hat Costume**, **Mobiotic Trousers Costume**, and **Mobiotic Suit Costume**—all for little Toggle!

Down by the "Flipped Flapped Folks" level entrance, head left. Wile Toggle can squeeze behind the wall and claim a bunch of new tasks for big Toggle. These Prize Bubbles give the **Mobiotic Trousers Costume**, **Mobiotic Suit Costume**, **Mobiotic Shoes Costume**, **Mobiotic Hat Costume**, and **Mobiotic Skin Costume** for big Toggle. Also among the Prize Bubbles are the **Old Tome Object** and **Quiver Sticker**.

To the far right of the same level entrance, use big Toggle to press down the white platforms. Scoot off to the left into a much longer area that's now accessible. It's full of Prize Bubbles. Search up in the **Cowl Fur Skirt**, **Ape Foot Costume**, **Ape Chest Costume**, and **Ape Skin Costume**. You can also find the **Shovel Sticker** and **Woodcut Dress Sticker** down here.

Keep going to the left, where you can find two more Prize Bubbles that give the **Ape Head Costume** and **Ape Legs Costume**.

Don't take the white platform back up. Instead, backtrack to the right, where little Toggle can sneak into a hidden room in the right wall. Make your way up through it using Blue Bounce Pads, and more spring-white platforms.

The first bunch of Prize Bubbles gifts little Toggle with the **Ape Chest Costume**, **Ape Feet Costume**, **Ape Head Costume**, **Ape Nose & Mouth Costume**, **Ape Legs Costume**, and **Ape Skin Costume**.

Keep heading up. At the very top, pop four Prize Bubbles to earn the **Toggle Statue–Frame Decoration**, **Toggle Statue–Head Decoration**, **Toggle Statue–Torso Decoration**, and **Toggle Statue–Legs Decoration** before exiting to the left.

Weapon Finish	Vehicle Skin

Tonight's first crate's contents are a mixture of the returning weapons and Vehicle skins from previous crates. Not only is this from completely missing out on the crazy selection by unbiasedly high voted community members, but also from the fact that I'm not even sure what I'm looking at. Without any further explanation, Krafton, you can't use the same procedure on me and mess up with the next crate like that.

You can even a very select looting team that's designed for more than just three. When standing on top of the game-ending hotspot at the pin can be the full set up second.

Use the grass to reach the Pan Battle that you can use to the Pan Battle. Use the **Pan** and **Pan** to reach the Pan Battle. Use the **Pan** and **Pan** to reach the Pan Battle. Use the **Pan** and **Pan** to reach

Mira Shiny, Bunkum's librarian and frenemy-loving puppet, has quite a problem on her hands. Some unknown water leak has started to flood the entire place, threatening the condition of the library's precious artifacts. These precious books are at risk of being soaked completely unless Toggle can manage to drain the water before it's too late!

WATERED-DOWN MESSSAGES

Float like a Butterfly, Sink like a Tree

It's a nice surprise time to save the books. To make that point clear, a nice gate shows you where the sturdy line is. Start as little Toggle to take advantage of his superior speed, and soak on the water's surface.

To activate the first button, stand below it. Switch to big Toggle to sink under the water's surface. Pop the Prize Bubble there for the **Art Deco Circle Sticker**.

Turn back to little Toggle, and he is shot straight up into the button and a Prize Bubble offering the **Mask Bar Sticker**. This lowers both the water and a wall panel. On the fall down, it's easy to pop two more Prize Bubbles for the **Bookshelf Material** and **Leather Bound Book Decoration**.

Follow the arrow, and run to the left. Switch to big Toggle to sink and move through the pipe. Emerging to the left, switch back to little Toggle, or risk sinking onto the spikes.

Switch to little Toggle to emerge onto dry land. At the next Checkpoint, hit the button as little Toggle to lower the water level. This drops Toggle down a slide. Stay small to avoid sinking at the bottom into the spikes.

Run to the far right, and then switch to big Toggle to sink through a Prize Bubble that gives up the **Clock Hand Decoration**.

Underwater hop between safe platforms. Then, take a daring leap toward the field of spikes. Before plummeting slowly to certain doom, switch back to little Toggle. This sends Toggle up through the **Zigzardi Newspaper Sticker** Prize Bubble and into the next button.

With the water drained, run through the 'stickyterior.' The neat Prize Bubble requires quick reflexes. The **Willow Candle Wax Decoration** is encased in a Prize Bubble below, just barely above a bed of spikes. To get it, switch to big Toggle to sink, and then immediately switch back to little Toggle. He should sink just far enough to pop the Prize Bubble without coming to any harm.

Switch between Toggle sizes to launch him up to the next Checkpoint. Hit the button there, once again as little Toggle, and ride the slide down. Run to the right, where the **"Look at What You Could've Won!" Audio** is waiting to be gathered from a Prize Bubble.

Run to the right, and jump up to pop the Prize Bubble holding the **Label I Decoration**.

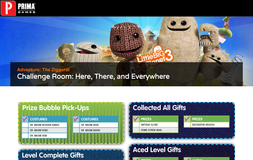

Run back to the left, and switch to big Toggle to sink. Hit the final button, and even pop a Prize Bubble to nab the **Zigzardi Corner Gold Sticker**.

PRESERVATIONIST PRIZES

You did it! You hit every button and saved these priceless texts. Doing so in the nick of time results in four Prize Bubbles rising to the surface. Pop them all and add the **Brass Leaves Decoration**, **Decorative Egg Object**, **Valve Handle Object**, and **Brass Cog Lungs Decoration** to your Pearl.

On top of that, you are also instantly awarded some great new duds. Enjoy trying on the **Mira Dress Eyes Costume**, **Mira Dress Skin Costume**, **Mira Dress Legs Costume**, **Mira Dress Glasses Costume**, **Mira Dress Tome Costume**, and **Mira Dress Hair Costume**.

No one in all of Bunkum knows more about robotics and artificial intelligence than Dr. Maxim. Recently, he was working on the most complex, risky venture he had ever undertaken. It's a revolutionary new kind of teleportation technology he calls the "Here and There Device."

Of course, he needs some help testing it to work out the kinks and ensure that it's ready for mass production. To that end, he needs two sack people to demonstrate its amazing abilities. Be sure you have a friend in line before coming here.

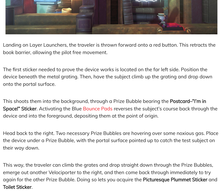

TELEPORTATION FOR TWO

Picture-Perfect Proof

In order to properly test the capabilities of the Here and There Device, your sack people must collect stickers proving they have been both here and there.

To begin with, one sack person must press ● to enter the device's cockpit. They now control the device's position with the left stick and rotate it with the right stick. Notice that one side is covered with a modified Velociporter portal. This is the key to the device's functionality!

Point the portal surface down. That way, your test subject partner can hop up through the Velociporter and emerge out another in the background to the right.

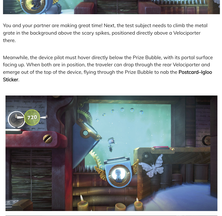

Landing on Layer Launchers, the traveler is thrown forward onto a red button. This retracts the book barrier, allowing the pilot free movement.

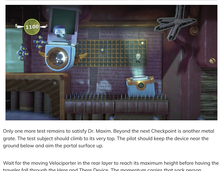

The first sticker needed to prove the device works is located on the far left side. Position the device beneath the metal grating. Then, have the subject climb up the grating and drop down onto the portal surface.

This shoots them into the background, through a Prize Bubble bearing the **Postcard-"I'm in Space!" Sticker**. Activating the Blue Bounce Pads reverses the subject's course back through the device and into the foreground, depositing them at the point of origin.

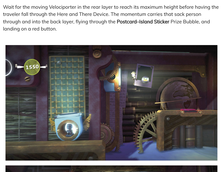

Head back to the right. Two necessary Prize Bubbles are hovering over some noxious gas. Place the device under a Prize Bubble, with the portal surface pointed up to catch the test subject on their way down.

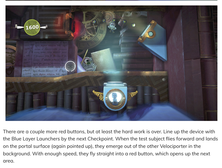

This way, the traveler can climb the grates and drop straight down through the Prize Bubbles, emerge out another Velociporter to the right, and then come back through immediately to try again for the other Prize Bubble. Doing so lets you acquire the **Picturesque Plummet Sticker** and **Toilet Sticker**.

The traveler must fall down into the device again to emerge to the right with enough speed to land on the red button and open up the way forward.

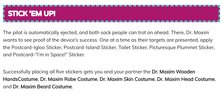

The test subject should take the Bounce Pads just ahead to reach the next Checkpoint above. Move the device to an area past the platform's edge and below. Give the traveler plenty of airspace to build up speed, and have them drop straight down into the portal surface of the device.

Mustering enough speed in the process allows the traveler to fly out of the rear layer's Velociporter and onto a red button.

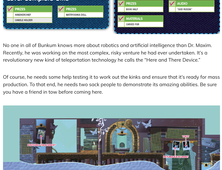

You and your partner are making great time! Next, the test subject needs to climb the metal grate in the background above the scary spikes, positioned directly above a Velociporter there.

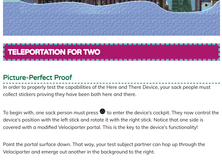

Meanwhile, the device pilot must hover directly below the Prize Bubble, with its portal surface facing up. When both are in position, the traveler can drop through the rear Velociporter and emerge out of the top of the device, flying through the Prize Bubble to nab the **Postcard-Igloo Sticker**.

Only one more test remains to satisfy Dr. Maxim. Beyond the next Checkpoint is another metal grate. The test subject should climb to its very top. The pilot should keep the device near the ground below and aim the portal surface up.

Wait for the moving Velociporter in the rear layer to reach its maximum height before having the traveler fall through the Here and There Device. The momentum carries that sack person through and into the back layer, flying through the **Postcard-Island Sticker** Prize Bubble, and landing on a red button.

There are a couple more red buttons, but at least the hard work is over. Line up the device with the Blue Layer Launchers by the next Checkpoint. When the test subject flies forward and lands on the portal surface (again pointed up), they emerge out of the other Velociporter in the background. With enough speed, they fly straight into a red button, which opens up the next area.

The traveler should now take those Blue Layer Launchers to the foreground, where a safe platform has arisen.

Now it's simply a matter of walking directly through the device's Velociporter to emerge at the next Checkpoint and hit the final red button.

STICK 'EM UP!

The pilot is automatically ejected, and both sack people can trot on ahead. There, Dr. Maxim wants to see proof of the device's success. One at a time as their targets are presented, apply the Postcard-Igloo Sticker, Postcard-Island Sticker, Toilet Sticker, Picturesque Plummet Sticker, and Postcard-"I'm in Space!" Sticker.

Successfully placing all five stickers gets you and your partner the **Dr. Maxim Wooden HandsCostume**, **Dr. Maxim Robe Costume**, **Dr. Maxim Skin Costume**, **Dr. Maxim Head Costume**, and **Dr. Maxim Beard Costume**.

There's nothing more important in Chirpy's life than the bears he cares for. Sadly, something's got them in a real, bitter mood today, for the saying goes "Grizzly" before the escape level. Okay, ringtones you to reach the end of the level and help pull the bear to play some calming [music](). Unfortunately, this is not as easy as it sounds! Some Bubbles scattered throughout these Pulsating Rock is not only monochrome their bad mood.

HOPPING MAD

Less Popping, More Bouncing

These bears don't shy away from letting their feelings be known! Throughout the level, they will be bouncing up and down in frustration. Unfortunately, this means that Chirpy will have a mighty pesky load the entire level shakes, and your each person is propelled through the air.

While there's no great secret to making it through to the end to fly the level, avoiding the teeny tiny Bubbles makes the progression exponentially faster. The key is to let the bears triggered bounces send your each person to the correct spot.

To get past the first tiny let the bounce lift your each person up to the next level.

Bounce over the next two piles.

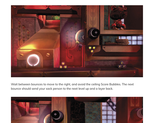

Once in the corner, let the bounce lift your each person up to the next platform.

Avoid the left side, where there's a cluster of Score Bubbles. Stand to the left of the front-end corner Score Bubble pile. Get bounced over it. On the other side, a helpful arrow shows the path ahead.

Safely at the next Checkpoint, let your each person get propelled up over the next Score Bubbles to reach up and grab a well-mounted [cash]().

Hold forward bounces to move to the right, and avoid the caring Score Bubbles. The next Checkpoint awaits your each person on the next level up and [cash]() there.

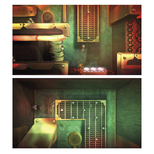

Roof is on Fire

Move to the right, and drop down. The roofing of the passengeress shoved from a strike from your each person. Avoid the Score Bubbles, and bounce off the bears. Bonus drama is guaranteed for your each person bounce directly into a fiery abyssal.

Instead, avoid the bear above. Wait for it to jump in the air, and then make your each person jump. When timed properly, the bounce of the bear happens while your each person is in mid-air and unaffected.

Jump off the edge of the platform and land on the upper Launchers. Immediately grab the metal platform in the background that your each person is launched toward.

VERTICAL CLEARANCE

Avoid bursting your each person positioned directly above or below a Score Bubbles. The Checkpoint is to the right, and Launchers as well, and if it pushes your each directly to found in Score Bubbles and the edge of the.

Leap off the left side of the spider, and ride the slide down to the next Checkpoint. Allow the bears to bounce your each person over the Score Bubbles. Let the next bounce get your each person close enough to grab the yellow spongy end of a bear.

Dangerous Heights

Let go of the sponge, and land safely on the platform to the right. A bursting rod is shaped pipe. Avoid the Score Bubbles, and bounce off the bears to the next Launchers. Avoid the Score Bubbles, and bounce off the bears to the next Launchers. The ensures that your each person is on the ground and ready to clear the pipe while the pipe is self-surviving.

Run and jump over three Score Bubbles to land on the lower conveyor that periodically sweeps your each person to the right. Avoid the Score Bubbles, and bounce off the bears to the next platform while left, and jump over the Score Bubbles. The next bounce should clear your each person from the danger of burning.

Drop back down to a similar situation, jump as the platform strides to the left to hop over the two Score Bubbles, and then drop off the edge onto the Launch Launchers.

At the next Checkpoint, let the bounce get your each person up to reach the grate and climb it. Move to the right, waiting for the next gate to loosen and then jump across to the next grate.

Hop off that grate, and carefully step along the left edge of the slide to avoid Score Bubbles.

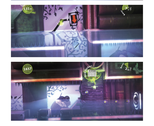

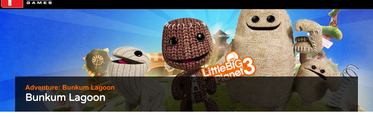

MUSIC TO THEIR EARS

Finally, you've arrived at the castle! Head over, and let a final bounce lift your each person up so you can flip that castle's and soothe the bears with some [music]().

After calming them down and receiving rating a single Score Bubble, you can soundtrack the **Chirp Band Costume**, **Chirp Trouser Costume**, **Chirp Horn Costume**, **Chirp Skin Costume**, **Chirp Drums Costume**, and **Chirp Kit**. Nice [loo shubby]()!

AUDIO
- "THE BIGGER REVEAL"
- "WAKE UP MR. NEWTON"
- "BUNKUM LAGOON"

The final hero is within your sack person's wooly reach. Cast from the heights of the Ziggurat into the depths of Bunkum Lagoon, you must find two marbles to reawaken the long dormant Swoop from slumber. Bunkum Lagoon is home to Pinky Bufloom, Queen of Bunkum. Her regal highness is bit of out of sorts, however. Newton's takeover of Bunkum's Creative Heart is sending her into a tizzy. Better find Swoop's two marbles before she starts taking her aggression out on the nearest cute, wooly creature.

TAKING FLIGHT

Once you have found both marbles in Bunkum Lagoon's Belly of the Beast and Masque Maker's Tower levels, acquiring Swoop and the Boost Boots in the process, the entire lagoon becomes your oyster. There's no Prize Bubble you can't reach. Examine the map of Prize Bubble locations, and be sure to explore thoroughly.

Fire Away!

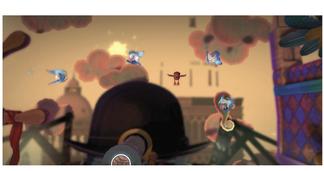

In the upper right of Bunkum Lagoon, use Swoop to load the cannon. Lift the sponge from its position, marked by the arrow, and drop it into the cannon. It blasts the ball of an airship. Load a second sponge, and the explosion gives you access to the **Gondola Sticker**, **Afghan Rug Material**, **Worn Pinball Object**, **Vintage Wine Bottle Object**, and **"The Bigger Reveal" Audio** Prize Bubbles.

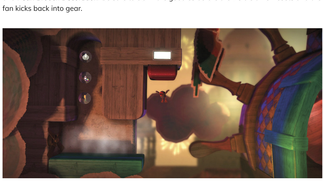

Flying Foursome

Four Prize Bubbles with rather powerful wings are located in the top center of Bunkum Lagoon. They try to fly away from Swoop, so it takes some fancy flying to pop them all. Track down all four for the **Metal Handle Decoration**, **Bunkum House Sticker**, **Jellyfish Sticker**, and **Blue Butterfly Wing Decoration**.

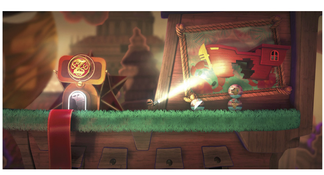

Your Biggest Fan

Fly to the upper left of the level and hit the red button there. Press it to deactivate the fan and get access to three Prize Bubbles that grant the **Parrot Body Sticker**, **Hurricane Lamp Object**, and **Pearl Brooch Decoration**. Be sure to claim the goodies before the visible timer resets and the fan kicks back into gear.

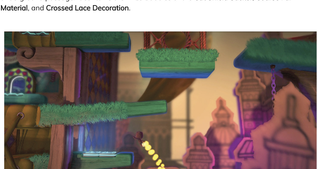

Ships Need Light(houses)

To the right, past Zom Zom's shop, is a tragic depiction of a shipwreck. Cast the beam of your Illuminator upon it, and the nautical portrait produces three Prize Bubbles that bear the **Wrecked Ship--Bow Decoration**, **Bunkum Cloud Sticker**, and **Wrecked Ship--Stern Decoration**.

Boost Below

With all the boosting opportunities, don't miss this obscure corner. There's a bridge to Zom Zom's shop that rises and falls. Drop below it, and boost to the left to reach a hidden underground passage. It contains the Prize Bubbles of the **Cat Shield Sticker**, **Coarse Fur Material**, and **Crossed Lace Decoration**.

Boost Above

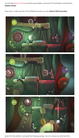

There's a hidden launcher behind some red feathers. Get close enough, and they reveal a meter. Boost to get on top of it. Your sack person's presence fills the meter, and the launcher sends your woolen friend flying up to the next level.

And then you've got Sackbots, which are the bigger ones (the ones, Wonder Lumberjack officers and exactly your usual cannon fodder for all other level-ender bosses alike). Fortunately, Sackboy armed with the Cloud Cannon is more than a match for them, and can easily defeat them by shooting them with the right kind of cannon ammo and then, once they're knocked out and stunned, throwing a bomb at them. Remember that the bombs don't just blow up when you throw them, they also explode if you shoot them.

FOUR TRACK PLAYSETS

Lollapalette Courage

Sackboy has been given a new Cloud Cannon that shoots Paint. ▲ Paint Cannon ammo can be found in Paint Pots. Shoot them to paint the environment and reveal hidden Paint Pots.

Hit the Paint pots found in the Lollapalette ▲ Paint Pots to paint the prompt vehicle. It makes it paint more grip and speed. Paint the vehicle ▲ Paint Pots to upgrade the paint. Each upgrade changes the stats of the vehicle.

Tar-Pan Of Falling

Use the grapple to swing on the metal cannons to reach Paint Scoring Orbs in the distance. Tar-Pan Of Falling has a lot of Paint Scoring Orbs to collect, so you'll need to be quick!

Finishing Touching will unlock the Hermitage Cloud Cannon, Knight's Helmet Decoration, Flaming Creature Costume, and Knight's Shield Decoration.

Inside Tar-Pan Of Falling, you'll be surrounded by paint and lots of paint pots. Paint the vehicle ▲ Paint Pots to upgrade the paint. Finishing Touch Pot Stage 1, Cloth Sticker, and Finishing Touch Pot Stage 2 will be unlocked.

Hit the Paint pots found in the Lollapalette ▲ Paint Pots to paint the prompt vehicle. It makes it paint more grip and speed. Paint the vehicle ▲ Paint Pots to upgrade the paint. Each upgrade changes the stats of the vehicle.

Finally, paint the track again to reveal the Finishing Touch Pot Stage 3, Fur Decoration, Finishing Touch Pot Stage 4, and Fur Sticker.

PRIZES WITH PERSONALITY

Sackboy has been given a new Cloud Cannon that shoots Prize Bubbles. ▲ Prize Bubble Cannon ammo can be found in Prize Bubbles. Shoot them to reveal hidden Prize Bubbles. ▲ Prize Bubbles contain Prize Bubble ammo and Prize Bubble Pop Stickers. Pop Prize Bubbles to collect Prize Bubble Pop Stickers. Pop Prize Bubbles to collect Prize Bubble Pop Stickers.

Finishing Touching will unlock the Hermitage Cloud Cannon, Knight's Helmet Decoration, Flaming Creature Costume, and Knight's Shield Decoration.

Inside Prize Bubble Pop, you'll be surrounded by Prize Bubbles. Pop Prize Bubbles to collect Prize Bubble Pop Stickers. Pop Prize Bubbles to collect Prize Bubble Pop Stickers. Pop Prize Bubbles to collect Prize Bubble Pop Stickers.

Walkthrough: Pandora

Pandora
Opportunities
Fast Travel Stations
Vault Symbols
Eridian Writing
Side Missions
Achievements/Trophies

Pandora is the first planet you visit in the game. It is a desolate, dusty world with a harsh climate and a lot of wildlife that wants to kill you. Its moon, Elpis, is the home of Hyperion, the corporation that runs the Pandoran colonies.

Opportunities that Await You

Pandora

Fyrestone Outpost

Fyrestone Outpost is the first area you visit in the game. It is a small, dusty outpost with a few buildings and a lot of wildlife that wants to kill you. It is the home of the Fyrestone Outpost Quartermaster, who gives you the quest Fyrestone Outpost Quartermaster.

Puzzle Solving	★★★★★
Boss Fights	★★★★★

Final Level Tally

Total Levels	5
Total Bosses	5

The Level of Complexity and the Final Level Tally are based on the assumption that all of the Levels in the game are the same as the Levels in this guide. In reality, they are not. The Level of Complexity and Final Level Tally are estimates. The Level of Complexity is a subjective measure of how challenging the Levels are. The Final Level Tally is the total number of Levels that you will have to complete.

RELAY RALLY

Taggle's Time to Shine!

The Relay Race Rabbit Taggle is a fantastic runner and he's the perfect teacher of the mechanic that is the focus of this Level. Watch him closely as he runs through the Level and you'll learn a lot.

Practice the mechanic a few times in the Practice Area.

	“FIELD”

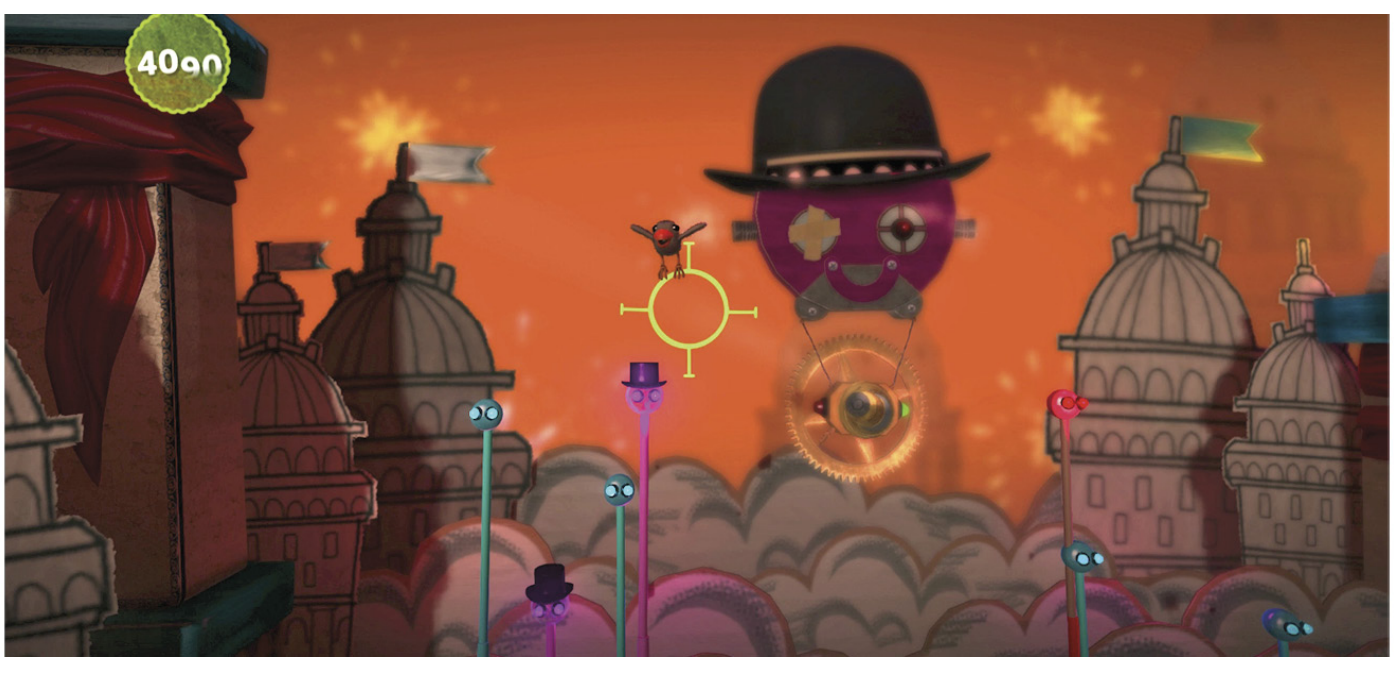

El Jeffe isn’t one to stand idly by while Newton threatens all of Bunkum. He’s a bird of action and is looking for a few good volunteers to round out his ranks. Naturally, he’s recruiting for those who can handle themselves in the air. Swoop’s natural talents in this field make him a ideal candidate. Prove that Swoop has what it takes to join El Jeffe on the frontlines!

AIR SUPERIORITY

To triumph in this challenge, Swoop must trick Newton into firing upon his own robotic minions. As these bright-eyed bugs rise up out of the clouds, they start to sprout wings at a certain height. At this point, they detach from their stalks and come after Swoop. Just one touch, and Swoop is sent straight back to El Jeffe.

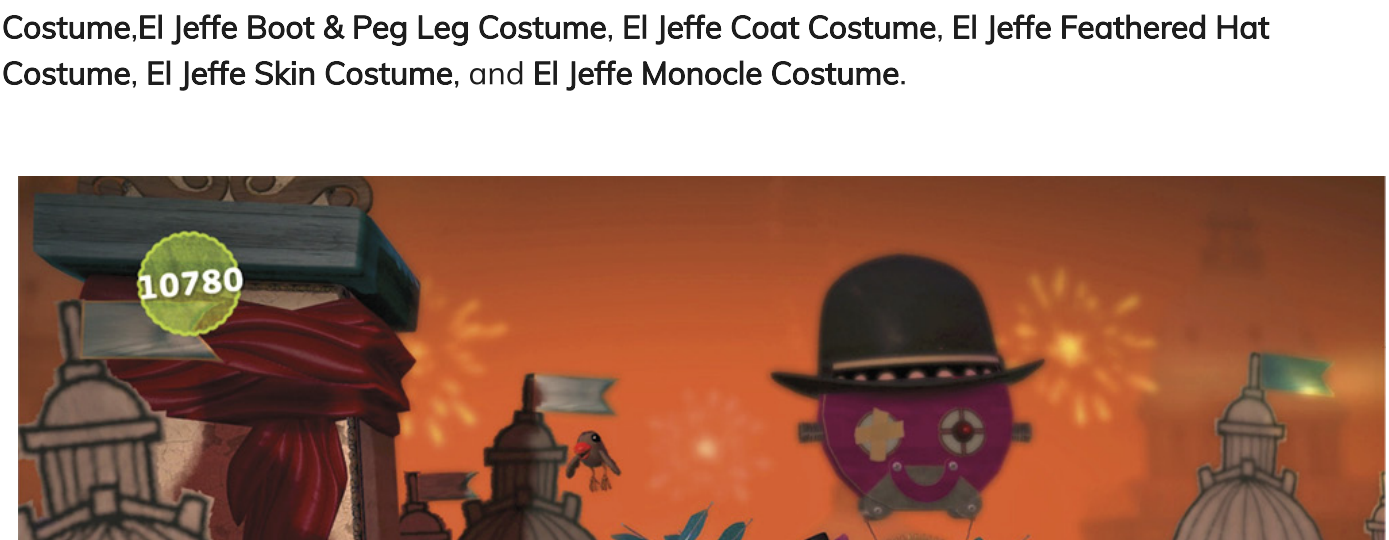

Aside from the common blue enemies, red and purple enemies eventually start to show up. These monsters rise faster and start flying sooner.

Once enemies start arriving too quickly for you to obliterate them before they get their wings, the best tactic is to lure them along and let them clump up into big groups. Move in one direction, and then swoop under foes to the other side to corral them.

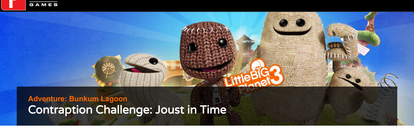

Depleting enough of Newton’s forces to the tune of 5000 points, Swoop passes El Jeffe’s rigorous standards. You’re immediately awarded several costume rewards: **El Jeffe Beak Guard Costume**,**El Jeffe Boot & Peg Leg Costume**, **El Jeffe Coat Costume**, **El Jeffe Feathered Hat Costume**, **El Jeffe Skin Costume**, and **El Jeffe Monocle Costume**.

You can keep going as long as you want, but eventually, everyone succumbs to overwhelming odds. Don’t fret, because your hard work is rewarded with the **Hourglass Decoration**, **Round Chicken Sticker**, **SandboxMaterial**, **Top Hat 2 Decoration**, **Blue Banner 1 Decoration**, **Blue Banner 2 Decoration**, **Loupe Decoration**, **Iron Grill Corner Decoration**, **”Field” Audio**, **Knitted Leaf Decoration**, and **Blue & Gold Paper Mache Material**.

Young Hildur is a true prodigy with many talents. Nothing gives Hildur as much pleasure as studying and recreating medieval history. Currently, Hildur's passion lies with jousting, but with Newton's creativity-sapping rise to power, Hildur is coming up empty. Help out by providing some truly applause-worthy jousting designs.

GOING THE DISTANCE

Using the Popit power-up should be a breeze after your experience with Gustavo in Manglewood. Hildur provides you with some basic parts to start with.

First, receive the **Fishbone Chassis Object**, and place it against the blueprints. Next, get the **Loose Cotton Reel Wheel Object** and **Cricket Ball Wheel Object**, and place each on the L1 and R1 locations. Finally, Hildur hooks you up with the **Glider Object** and **Flipper Object**. Place a Glider at the ✕ location.

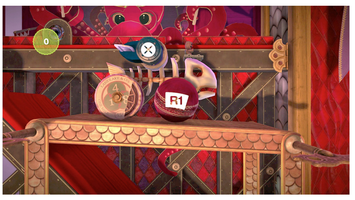

When you're ready, enter the Level Link to try out your contraption. Approach it, and your sack person automatically gets behind the wheel.

After a brief countdown, your jousting creation goes sliding down the ramp. Hold L1 and R1 to spin the wheels and build up speed. As soon as it clears the end of the ramp, hold ✕ to engage the Glider.

It may not be record-setting, but it's a start. The next time you see Hildur, he supplies you with the **Banana Chassis Object**, **Wrench Chassis Object**, and **Flapper Object**.

With these new parts, it's time to rethink your design. Trash your old ride, and place the new Banana Chassis. Give it wheels in the L1 and R1 positions, and place the new Flapper in both the ✕ and ● positions.

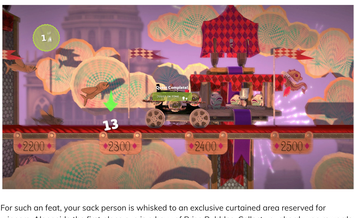

This time, when your ride takes off, alternate tapping ✕ and ● with a steady rhythm. Each raises its end of the chassis. Don't overdo it, or your creation ends up tumbling down way too quickly.

Provided that you score high enough with the new parts, Hildur offers you some even better upgrades: the **Flatiron Chassis Object**, **Film Reel Wheel Object**, and **Balloon Object**.

Start your design over with the Flatiron Chassis and the wheels of your choice in the R1 position. Then, load up the L1 ✕ and ● positions with Flappers. Once your ride flies off the ramp, use the same Flapper technique as before to keep everything steady.

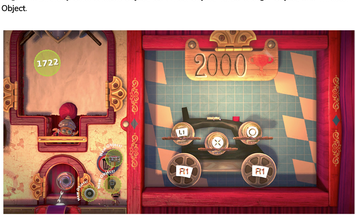

With this setup, you're sure to pass 2000 with ease. The moment you do, your Popit is immediately filled with the **Hildur Cape Costume**, **Hildur Body Costume**, **Hildur Legionnaire Helm Costume**, **Hildur Goggles Costume**, and **Hildur Eyes Costume**.

For such an feat, your sack person is whisked to an exclusive curtained area reserved for winners. Alongside the first place cup is a bevy of Prize Bubbles. Collect your hard-won rewards: the **Fish Bones Object**, **Knight Leg Sticker**, **AC Electric Motor Object**, **Hand Fan Decoration**, **Banana Object**, **Theater Curtain Decoration**, **Copper Scales Material**, **Iron Object**, **Plastic Wheel Object**, **Cardboard Lance Object**, **Sculpture Tool Decoration**, **Carved Wood Material**, **Silver Chalice Object**, **Strawberry Cake Object**, **Knight Arm Sticker**, and **Monkey Wrench Object**.

Although you've cleared Hildur's requirement, there are always new records to set. Revisit again to get the **Birthday Cake Chassis Object**, **Ice Wheel Object**, **Turbo-charger Object**, and **Thruster Object**.

Welcome to the Popit Academy

Your Very First Term

Enrolling in Popit Academy is your first step in learning how to create in *LittleBigPlanet 3*. Whatever you dream up, you can build with all of Create Mode's wondrous tools. Larry Da Vinci is your professor at the academy... he may not always remember his own name, but he's more than qualified to teach you all the ins and outs of the Popit. Completing these puzzles is also how you gain items to use in Create Mode.

To enroll in your first term, simply select Popit Puzzles from the Play menu. However, this section also covers the basics. Whether you're new to the series or an old hat, there's always something new to learn at Popit Academy.

Now that you're enrolled, it's time to start your very first stint as a Popit Academy student. This term covers all the basics of materials, moving things around, Bounce Pads, bolts, and more. Time to get to it!

Grabbing Your Bearings

In Crate Mode, your Pupit Corner is packed with all the most frequently used tools. There's the Bearings tool, which lets you view information or anything you have similarly crammed and readily have to your liking.

Online uses for this tool are very few in Pupit Racing and not much use in Origami King. Unless you're in the mood, after the fact, you find your Pure Prize Bubbles—**Tough Pick Sparks Online**.

Walk or through your Pupit Doorways to learn about using the Pupit Corner.

How To Use Your Pupit Corner

To use your Pupit Corner, open

In the Touch and Action to open your Pupit Menu, and then choose the Pupit Corner. Use A to select it. Then, you can use the Control Stick to move the cursor around and A to select whatever you want.

To unstick a tool or a Bookmark

Select the tool you want to unstick from the Pupit Corner. Then, move the cursor to the Trash Can and press A. The tool will be removed from the Pupit Corner.

To move a tool or a Bookmark, hold down A on the tool you want to move. Then, move the cursor to the location you want the tool to be moved to and release A.

Use Your Knowledge

Pupit Corner is a tool that you can use in the strategy section of the Castle. Simply hovering over them will show you what they do. Use the **Pure Coin Decoration**, **Check Mark Cup Decoration**, **Quick Heart Cup Decoration**, or **Pink Pure Star Decoration**.

Sack Fish Make Mistakes, Too

Sack Fish are the most common enemy in the game. They're found in boxes placed strategically in Crate Mode. Sack Fish are not difficult to defeat, but they can be annoying because of the heavily sound-based.

Rewarding, Pausing, And Playing

Pressing a button, a bubble, and you're forced to defeat a few yourself unless you're playing with a friend who's willing to help you out. Sack Fish are the most common enemy in the game. They're found in boxes placed strategically in Crate Mode. Sack Fish are not difficult to defeat, but they can be annoying because of the heavily sound-based.

Sack Fish are a kind of attack-minded bag, all intent on prevent the launch by in their delivery. Sack Fish are not difficult to defeat, but they can be annoying because of the heavily sound-based.

Online their online is the most common enemy in the game. They're found in boxes placed strategically in Crate Mode. Sack Fish are not difficult to defeat, but they can be annoying because of the heavily sound-based.

Sack Fish are a kind of attack-minded bag, all intent on prevent the launch by in their delivery. Sack Fish are not difficult to defeat, but they can be annoying because of the heavily sound-based.

A Little Rearranging

Sometimes you'll find that you've bought an amount can cause you to have too many of one kind of decoration and not enough of another. In this case, you can utilize the **Starter Sticker** and **Paper Cup Decoration**.

Hold It

Because of the options in the main room, if you want and can't, a card for naming Huddling into the Pupit Corner. Sack Fish are the most common enemy in the game. They're found in boxes placed strategically in Crate Mode. Sack Fish are not difficult to defeat, but they can be annoying because of the heavily sound-based.

Now You See It, Now You Don't

Sack Fish are the most common enemy in the game. They're found in boxes placed strategically in Crate Mode. Sack Fish are not difficult to defeat, but they can be annoying because of the heavily sound-based.

Keep The Imaginers Clean!

If you don't like to undertake you have personal preferences, you can search it with your Paint Corner.

Wow Life Goes You Ledges

Back to Crate for a little push and pull—**Pure Coin Decoration** and use Pupit Corner to pull out a **Pure Coin Decoration**. Sack Fish are the most common enemy in the game. They're found in boxes placed strategically in Crate Mode. Sack Fish are not difficult to defeat, but they can be annoying because of the heavily sound-based.

LOOK BEFORE YOU LEAP

Before you use that Bounce Pad to propel Gravel or one the platform on the right, first, you'll need to use the Pupit Corner to pull out a **Pure Coin Decoration**.

Now, return to the Bounce Pad and launch your seed-person up into the platform above.

To make it easier to platform above, select the orange shoppe. Then, ✕ to pull one into the Pupit Corner. Sack Fish are the most common enemy in the game. They're found in boxes placed strategically in Crate Mode. Sack Fish are not difficult to defeat, but they can be annoying because of the heavily sound-based.

But what about that set of stairs? Even Builder 3 is impossible to pull into your A-S. Instead, you'll need to use the Pupit Corner to pull out a **Pure Coin Decoration**. Sack Fish are the most common enemy in the game. They're found in boxes placed strategically in Crate Mode. Sack Fish are not difficult to defeat, but they can be annoying because of the heavily sound-based.

PRIZES FROM ABOVE

Before you leave, you can use the Pupit Corner to pull out a **Pure Coin Decoration**. Sack Fish are the most common enemy in the game. They're found in boxes placed strategically in Crate Mode. Sack Fish are not difficult to defeat, but they can be annoying because of the heavily sound-based.

Now the orange squeeze to allow side of the exterior to collapse. Hit ✕ to ✕. Now you have the ✕ to access the right to view the connected Bubble Prize Bubbles for the **Pure Coin Decoration**, **Pure Heart Cup Decoration**, **Pure Star Cup Decoration**, or **Pure Flower Cup Decoration**. Sack Fish are the most common enemy in the game. They're found in boxes placed strategically in Crate Mode. Sack Fish are not difficult to defeat, but they can be annoying because of the heavily sound-based.

Goodies Bag

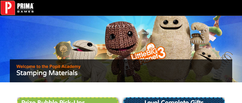

Is there anything more satisfying than finding a mysterious Goodies bag? Well, yes and you know it. Sack Fish are the most common enemy in the game. They're found in boxes placed strategically in Crate Mode. Sack Fish are not difficult to defeat, but they can be annoying because of the heavily sound-based.

Select your Goodies Bag from the Pupit Menu, then choose to unstick it and then stick it to the Pupit Corner. Sack Fish are the most common enemy in the game. They're found in boxes placed strategically in Crate Mode. Sack Fish are not difficult to defeat, but they can be annoying because of the heavily sound-based.

Using Objects

With the Pupit Corner open, you can use the Bounce Pad out of crate and use the A button to stick the ball. In a good way, Sack Fish are the most common enemy in the game. They're found in boxes placed strategically in Crate Mode. Sack Fish are not difficult to defeat, but they can be annoying because of the heavily sound-based.

Finally, to the platform, and pop onto the Bounce Pad. As you can see, you have to experiment the do. In this example, Bounce Pad, you may Pure Bubble for the **Pure Coin Decoration** during the way. Once you have your Bubble Prize Bubbles, you can use the Pupit Corner to pull out a **Pure Coin Decoration**. Sack Fish are the most common enemy in the game. They're found in boxes placed strategically in Crate Mode. Sack Fish are not difficult to defeat, but they can be annoying because of the heavily sound-based.

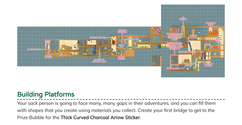

Welcome to the Pop!t Academy

Stamping Materials

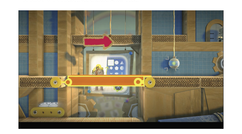

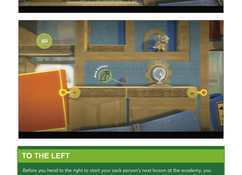

Although you've finished your first lesson, there is lots more to learn at Pop!t Academy. Learning to use materials is one of the most important things you should master when you're getting ready to build in Create Mode. As you start this lesson, your sack person dons their hat and follows along with Larry Da Vinci.

Building Platforms

Your sack person is going to face many, many gaps in their adventures, and you can fill them with shapes that you create using materials you collect. Create your first bridge to get to the Prize Bubble for the **Thick Curved Charcoal Arrow Sticker**.

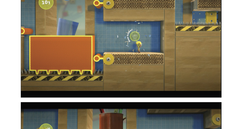

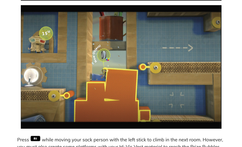

TO THE LEFT

Before you head to the right to start your sack person's next lesson at the academy, you can take a turn to the left instead and build a platform to three additional Prize Bubbles. These goodies are for the **Crepuscular Ray Decoration**, **Grease Splat Sticker**, and **Margin Doodle 5 Sticker**.

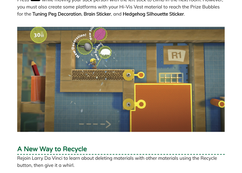

In the next room, build a platform of your choosing to make it across the spikes to the lower platform, where you can pop the Prize Bubble for the **Margin Doodle 6 Sticker**. Make your way up to the upper platform to proceed to the right, popping the **Acrylic Tube (Short) Object** Prize Bubble along the way.

Press R1 while moving your sack person with the left stick to climb in the next room. However, you must also create some platforms with your Hi-Vis Vest material to reach the Prize Bubbles for the **Turning Peg Decoration**, **Brain Sticker**, and **Hedgehog Silhouette Sticker**.

A New Way to Recycle

Repair Larry Da Vinci to learn about deleting materials with other materials using the Recycle button, then give it a whirl.

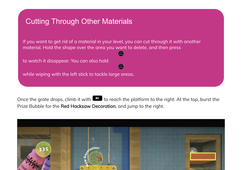

Cutting Through Other Materials

If you want to get rid of a material in your level, you can cut through it with another material. Hold the shape over the area you want to delete, and then press

to watch it disappear. You can also hold

while wiping with the left stick to tackle large areas.

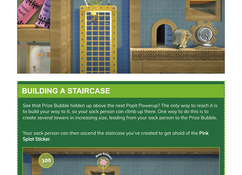

Once the grate drops, climb it with L2, and reach the platform to the right. At the top, burst the Prize Bubble for the **Red Hacksaw Decoration**, and jump to the right.

BUILDING A STAIRCASE

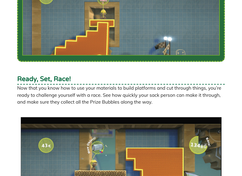

See that Prize Bubble hidden up above the next Pop!t Powerup? The only way to reach it is to build your way to it, so your sack person can climb up there. One way to do this is to create several towers in increasing size, leading from your sack person to the Prize Bubble.

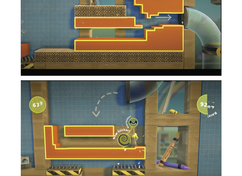

Your sack person can then ascend the staircase you've created to get ahold of the **Pink Splat Sticker**.

Ready, Set, Race!

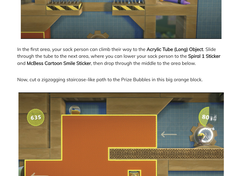

Now that you know how to use your materials to build platforms and cut through things, you're ready to challenge yourself with a race. See how quickly your sack person can make it through, and make sure they collect all the Prize Bubbles along the way.

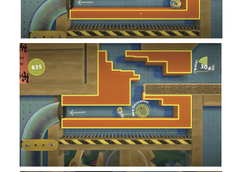

In the first area, your sack person can climb their way to the **Acrylic Tube (Long) Object**. Slide through the tube to the next area, where you can lower your sack person to the **Spiral 1 Sticker** and **McBess Cartoon Smile Sticker**, then drop through the middle to the area below.

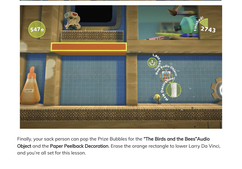

Now, cut a zigzagging staircase-like path to the Prize Bubbles in this big orange block.

These Prize Bubbles are for the **Hazard Markings Sticker** and **Brass Door Knocker Decoration**.

Finally, your sack person can pop the Prize Bubbles for the **"The Birds and the Bees" Audio Object** and the **Paper Peelback Decoration**. Erase the orange rectangle to lower Larry Da Vinci, and you're all set for this lesson.

The world is a scary place, but what can be more fun than making your world a scary place just like only you think it? We have those covered.

When your next time level, your world person immediately finds a Prize Bubble containing the **Squashed Scathing Sign Sticker**. Head up the lift, and jump up use the Prize Bubble for the **Dangerous Sticker**.

Danger Zone

There are four dangers you can place in your levels: Fire, Electricity, Plasma, and Horrible Gas. Hazardous Fire and Plasma Hazards from the Place Menu. Highlight one of these Hazards and:

to select it. Here, place it on a column to create a fire pillar.

to activate it. To increase or decrease the size of a hazard at any time hit **Left** or **Right**.

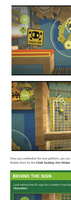

to rotate the hazard. Here we have rotated the fire pillar to create a fire wall.

to undelete it. If your danger seems to be missing, it may be because it's one you've used it, remember there are only seven.

to preview the action while you focus on what you're doing.

Set fire to the blocks to burn the [Cardboard](#) into little infernos, which are recycled.

Proceed down the platforms jumping to collect the Prize Bubbles for the **Small Scissors Sticker** and **Yellow Rubber Hose Consumable Sticker**.

Underfoot the platform start moving sponges to proceed through the next area. Here ▶ Sponges are a material that can be used to soak up water. Use the **Fire Extinguisher** to extinguish the middle of the scathing sponges. It's tricky to do so it's definitely worth it for the **Scathing Sponge Sticker**.

Some you underfoot the next platform, we now climb to the level above and collect the Prize Bubble there for the **Chalk Scathing Jam Sticker**.

BEHIND THE SIGN

Look behind the PC sign for a Golden Prize Bubble that contains the **Ornate Birdcage Decoration**.

Immunities

Some can be activated to whichever elements they're already affected by, but if you see a Red ▶ Immunities Sticker, you can activate the immunities for that element. Use the **Fire Extinguisher** by turning the orange Media Hazardous for them, keeping their immunities in mind. Activate the **Immunities Sticker** to make it magical by the **Chalk Scathing Log Sticker** and **Curved Chalk Line Sticker**.

Use this sponge to jump up and jump onto the normal high platform. Make sure your next person puts the **Set 2 Crossbones Sticker** and **Cliff Ash Cover Decoration** along the way.

Horrible Gas

Yes, Electricity, and Plasma are a fun like and they sound, but what on Burdock is Horrible Gas? It's an utility to use time in a fun which really important is that things up safe. Horrible Gas is a material that can be used to soak up water. Use the **Fire Extinguisher** to extinguish the Horrible Gas. Horrible Gas is also affected by Electricity, so you can use the **Lightning Strike** to activate the Horrible Gas.

See the block, go ahead with a Scorched on top of it? Select Horrible Gas from your Tools bag, and place it on the block. Use the **Lightning Strike** to activate the Horrible Gas. Be patient in the process, but it's okay, it's only an experiment with no real thoughts or feelings.

Do the same with the next platform to unleash the Prize Bubbles for a **Abstract Pub Decoration**, and **Hand Stained Sticker**. Next, your said person can take a big leap to collect the **Cash Party Sticker** and **Cash Wood Sticker**.

Apply Horrible Gas to the platform at the top of the screen to allow the sponge to soak through the Horrible Gas. Activate the Immunities Sticker as allowed and then put the sponge up to the platform and your said person can reach it.

Select your Indefinitive Tool again to apply it to the electric sponges you see up ahead. Once they're safe to touch, your said person can use them to swing across to the next platform.

Underfoot the platforms with the Indefinitive Tool to stop the spiky blocks from falling and blocking your said person's path.

Pass through the next Pixel Powerup. Since by the far left where a safe Prize Bubble is tucked behind an orange barrier, you'll have by burning the electrical one into something less substantial. Collect the Prize Bubble for the **Fuel Tool**. Then drops the Prize Bubble right after your said person's top for the **Pop Bowl Decoration**.

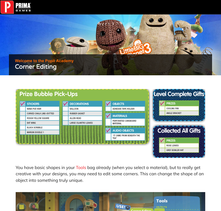

Use the Extreme Gel to launch your said person up to the platform above, pop the Prize Bubble for the **Heart Hose Sticker**, and then jump to get the **Scathing Lift Sign Sticker**.

Don't forget about the Prize Bubble on the far left. Apply Horrible Gas to the orange material there to let the Prize Bubble holding the **Pop Bowl Decoration** drop.

Underfoot the sponges, and use them to swing your said person up to the next platform.

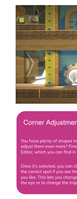

The next part is a little trickier. Use the Horrible Gas Tool on the orange materials to let the spiked blocks and Prize Bubbles break. Don't forget about the orange block at the bottom right. Next, use the Indefinitive Tool on the orange materials to block the gas from blocking your said person's path. Collect the Prize Bubble for the **Pixel Paper Decoration** and the **Pixel Chair Decoration** from the Prize Bubbles there.

Now, take the lift to the top.

Welcome to the Pixel Academy

Corner Editing

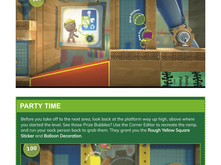

You have basic shapes in your Tools bag already (when you select a material), but to really get creative with your designs, you may need to edit some corners. This can change the shape of an object into something truly unique.

Corner Adjustments

You have plenty of shapes to choose from in your Goodies bag, but what if you want to adjust them even more? Fine tune those shapes into anything you like with the Corner Editor, which you can find in your Tools bag.

Once it's selected, you can click on any corner of an editable material. You know you've hit the correct spot if you see the blue dot. Now, use the left stick to move the corner wherever you like. This lets you change an object's exact shape, maybe to make it more pleasing to the eye or to change the trajectory of an object (or Sinclair that's passing along it.

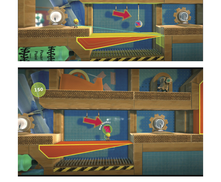

Cornering like a Pro

Grab that first corner you see, the one closest to your sock person, and pull it down with the Corner Editor so your sock person can climb up the ramp and collect the Prize Bubbles for the **Nana Fuel Hole Sticker** and **Curved Chalk Line Dotted Sticker**.

PARTY TIME

Before you take off to the next area, look back at the platform way up high, above where you started the level. See those Prize Bubbles? Use the Corner Editor to excavate the ramp, and run your sock person back to grab them. They grant you the **Rough Yellow Square Sticker** and **Balloon Decoration**.

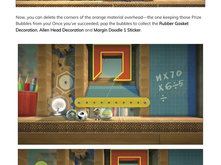

In the next area, pull the outer corner of the shape underneath the platform to extend it all the way across the spikes. You wouldn't want your sock person falling in there. When your sock person crosses the new-fangled bridge, they can pop the Prize Bubble for the **Bat Wing Sticker** as a reward for all your hard work.

Keep moving those corners! You can even drag past a second corner to usher it along with the first, moving both at the same time. Do this in the next area to create a path for your sock person, then jump through to grab the **Black Scribble Sticker** from the Prize Bubble.

Getting Rid Of Pesky Corners

If a corner is more trouble than it's worth, select it with the Corner Editor and press

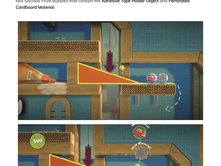

to delete it (or, to euphroxic, recycle it).

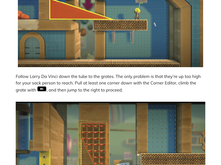

Go ahead and delete the corners of the orange object ahead to make way for your sock person.

Now, you can delete the corners of the orange material overhead—the one keeping those Prize Bubbles from you! Once you've succeeded, pop the bubbles to collect the **Rubber Gasket Decoration**, **Alien Head Decoration** and **Morgin Doodle 1 Sticker**.

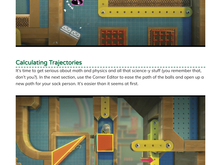

Next, you must pull the lower corner of the object up ahead so your sock person can climb and jump to the Prize Bubble holding the **Large Cilantro Leaves Decoration**.

For the next orange object you spot, you can delete corners until you reach your ultimate goal of two luscious Prize Bubbles that contain the **Adhesive Tape Holder Object** and **Perforated Cardboard Material**.

Follow Larry Da Vinci down the tube to the grates. The only problem is that they're up too high for your sock person to reach. Pull at least one corner down with the Corner Editor, climb the grate and then jump to the right to proceed.

For this next section, you may need to press to pause the rotating blades that threaten your sock person's very existence. Then, use the Corner Editor to lift up grates so your sock person can climb to the top. Of course, you need to unpause the action first. Once they're climbing, your sock person must avoid the blades.

Move with the blades to stay in front of them, first from left to right along the bottom, then from right to left along the top. Jump on the Bounce Pad in the upper left corner to collect the **"It Came from Beneath the Tea" Audio Object** on your way up to the platform above.

Calculating Trajectories

It's time to get serious about math and physics (and all that science-y stuff you remember that, don't you?). In the next section, use the Corner Editor to ease the path of the balls and open up a new path for your sock person. It's easier than it seems at first.

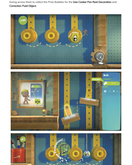

Bounce Pads

Prize Bubble Pick-Ups

Bolts might seem very headstrong with a mulishness and scrunty, which is all part of their charm. Use them to your advantage and you'll find that they're a great way to get around. Once you've mastered the controls, though, you can start bouncing and zipping up an unlikely route on the first try.

To get started on your next bounce, jump and press **ZR** to throw Super Fire Flora Bubbles to collect the Fire Bubble in the Fire Flower Box from **Fire Flower Decoration** and **Collected Fruit Signs**.

Next, you need **Super Leaves** to power the ball up and shoot mini-spikes to Strength. Specifically, you want to bounce off **Bolts** platform with the Bounce Pad Bolts that you'll find in the **Leaf Decoration** and **Collected Fruit Signs**.

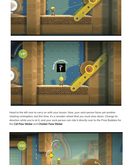

Now, use the **Bounce Pad** to maneuver your Bolts and bounce upward to the next platform. If you want to make that extra bounce, you'll find the Bolts Box in the **Bounce Pad** signs at high up. Bounce!

Catch up with Lakitu for this fun continue your bounce. There are a couple of Pink Bubbles here that you can use to bounce off. Use the **Bounce Pad** to bounce off the Bolts Box and collect them all within moments.

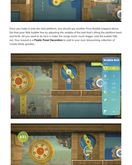

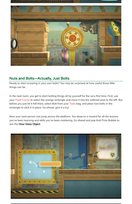

Bounce Pad Bubbles to access the **Wooden Tongue Pose 3 Decoration** and **Wooden Tongue Pose 2 Decoration**.

Bounce off from the lower platform to drop-bolts, your main concern and carry this time, remember that, for the platform, as planned to the Bolts Box. Again, you'll need to bounce off the opponent if you're looking to grab that Pink Bubble hanging there. Use your **Super Leaf** to collect the **Bounce Pad** signs and bounce off the Bolts Box to collect the **Bolts Discovered** sign. Finally, bounce off the Fire Bubble and collect the **Block Revenge Sticker**.

Now, follow Lakitu as he shows you how to stay off the Bounce Pad and grab hold of Fish Bubbles to collect the **Fish Bubble**. Use the Fish Bubble you just collected to bounce off the opening orange box and collect the **Fire Flower Sign** and **Fish Bubble**.

Bolts That Spin Around and Around

While Bolts are bolts that appreciate bouncing that you can place them on a reverse to make them bounce in the opposite direction. Use the reverse Bolts to bounce off the opponent and collect the **Fire Flower Sign** and **Fish Bubble**.

Once that's spinning platform go ahead! Go ahead and collect the Bolts Bolt with your **Super Leaf** and then bounce off the opponent. Bounce off the opponent to collect the **Fire Flower Sign** and **Fish Bubble**. Use the Fish Bubble to collect the **Bolts Discovered** sign and finally, bounce off the opponent to collect the **Fire Flower Sign** and **Fish Bubble**.

Finally, use a few more bolts to get over the gap and collect the Bolts Bolt and Fish Bubble. Use the Fish Bubble to collect the **Fish Bubble**. You need another bolt right to get past the gap they are on. Bounce off the opponent to collect the **Fish Bubble**. Use the Fish Bubble to collect the **Fish Bubble**. Finally,

Sometimes it's fun to connect things to each other in order to adjust them. For instance, you can connect a Spring to a Platform to make it bounce, or you can connect a Platform to a Switch to open the door together. You can also have things dangling from strings, bouncing on springs, or snapping from elastic. Simply select one of those types of Connectors from the Tools bag, and then connect them. You can then press ⌘ to tweak the properties (such as its length) and see other features.

Follow along as I'll show to start learning about Connectors, beginning with the good old-fashioned Rope. ⌘ the Rope to grab it, and then ⌘ where you want the other end to be. You may have, you see that the rope, press ⌘ to pack it.

Next, you can attach the rod to the two strings' objects, as we can allowing to connect them to each other. Highlight one of the strings, press ⌘ to select it, and then select the other with ⌘ to string, or hold.

Your rock pencil can once jump around the rod button to launch the little gondola across the Platform. ⌘ the Rope to grab the Bubble Maker on your rock pencil, press over the platform on the right.

The next item your rock person can get their hands on is string. After passing through the rope! Paper Panorama with using the Shirt, and then ⌘ the string and select the string, then attach it to the iron orange objects as there from the front. After your rock person jumps on the Platform, ⌘ the Rope to grab it, and then ⌘ the Platform with your Spatial Lens and the Rope, ⌘ to break the string's properties.

Destroy the string by then press your rock person squished so they can reach the platform on the right. Jump to pop the Prize Bubble for the Spatial Glue Object and the pull it.

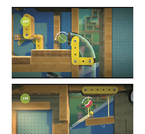

Repeat the for the objects as ahead, attaching string to Wood and shortening the string after. Now, when your rock person jumps on the Platform, it will bounce back and forth. Then, you can from where to connect the string with the Wood and your rock person can grab. Move your rock person using ⌘ and then press ⌘ to connect the string to the gap to the platform on the left.

Once the green ⌘ to pop the Prize Bubble for the Rounded Door Sticker at the top. Now jump with ⌘ on the spring platform on the right. That's right, your rock person can bounce on the platform.

There's another Prize Bubble to jump for on the next platform. Hit it to collect the Fancy Rounded Door Sticker. Now the springy of the platform to get some treasure! If you can't reach some coins with it immediately.

Go ahead, move your rock person onto the platform, and select the spring holding it in place with your Pencil Control. Now, adjust the length to lower the platform until your rock person can jump on the right hand side.

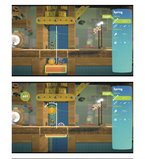

There's a whole lot going on in the next room, with an orange rectangle on a spring and bouncy balls bursting out. Unfortunately, they're not really going anywhere, but more must-have! Jump over the R.A. Stand the spring with your Pupil Control and then press ⌘ to adjust its properties. Tighten it up to open up a path for your rock person.

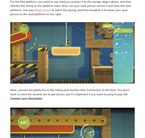

BUBBLES IN HIGH PLACES

See that Prize Bubble, way, way up in the sky right? If you tighten the spring and lengthen it, the bubble will be pushed way higher for a reward that's totally worth the effort. Select the spring, and through it to select the **Spring Decoration**. Lastly, bring the link to about 30 ft.

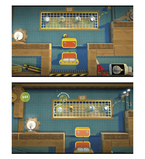

Select another Prize Bubble ahead. Run through it to get the **Cross Head Screwdriver Decoration** in your way to the tube, and then slide directly down onto a swinging platform with another Prize Bubble. This one provides the **Happy Smile Sticker**.

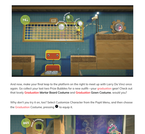

Now, it's time to launch down, that's snapped all of monsters. Attach elastic to the objects as ahead, and then ⌘ to the Rope to grab it. Now, ⌘ to the Rope to grab it, and then ⌘ to the platform on the right. Now, your rock person can launch up and down, and you can use your rock person to jump with ⌘ and select onto the sponge and use ⌘ to bouncing across the gap to the next platform.

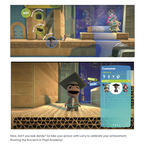

Now you should see some very tempting Prize Bubbles. It's time to get those out, right? Select the elastic again from your Tools bag and attach it to the next orange objects, then select it with ⌘ to the Rope to grab it. Now, ⌘ to the Rope to grab it, and then ⌘ to the platform on the right. Now, your rock person can launch up and down, and you can use your rock person to jump with ⌘ and select onto the sponge and use ⌘ to bouncing across the gap to the next platform.

Head down the tube and then to the right. Get ready to really play with the Connectors you've been given by ahead, and use your Pupil Control to select the spring and shorten it to bring the platform up to your rock person. There are for the **Purple Star Sticker** and **Arrow Tags Decoration**.

Put on Your Racing Gear (Just Figuratively, of Course)

Now, you can see where to take the Prize Bubble for the Arrow Tags Decoration.

For the first platform, you need to use string to connect it to the next orange objects, and then ⌘ to the Rope to grab it. Now, ⌘ to the Rope to grab it, and then ⌘ to the platform on the right. Now, your rock person can launch up and down, and you can use your rock person to jump with ⌘ and select onto the sponge and use ⌘ to bouncing across the gap to the next platform.

Next, connect the platforms to the ceiling and shorten them so it's different. You don't have to make the second one to get across, but it's important if you want to jump to get the **Camera Lens Decoration**.

Crossing the Finish Line

You're almost done with the race. Stick with your life as a Stick Y Rock Academy student! Keep it up!

In this last room, attach the platform with the Bounce Pad on it to the object just above it (perhaps with a nice, bungy string?). Doing so can really help your rock person catch some air.

Now, make your rock person jump onto the Bounce Pad and grab onto the room above you! Collect the **Bronze Heart Costume** and **Gladiator Helmet Costume Decoration**, **Purple Robot Costume**, **Magnifying Glass Object**, and **Fluffy Duck Decoration**.

And now, make your final leap to the platform on the right to meet up with Larry (for now) once more. Collect the **Bronze Heart Costume** and **Gladiator Helmet Costume Decoration**, **Purple Robot Costume**, **Magnifying Glass Object**, and **Fluffy Duck Decoration**.

Why don't you try it on, too? Select Customize Character from the Pearl Menu, and then choose the Costume to Compare Costume. ⌘ Shake it.

Now, don't you look sharp! You can put your clothes with you to celebrate your achievements! Visiting the Hub Item in Flash Academy!

A Second Term at Popit Academy

Introduction

You've graduated from your first term at Popit Academy, but there is still so much to learn. Replaying Popit Puzzles from the first term can be a great refresher. However, when you're ready to learn something brand new, enroll in the second term at Popit Academy to study under your new instructor, Victoria. She's equipped to teach you more advanced methods for Create Mode so that you can be a wizard of imagination when you start designing your own levels.

Mario Maker 2
Advanced Connectors

You already know a little about Connectors from your first level in Peach Academy. Well, now it's time to get serious about them; they can be extremely useful when you put them in motion.

Moving Platforms, Everywhere

When your path and some of the coins are on different platforms in this level, ready Path Curve and activate it. Use any size option for the Connector. In this case, the platform connecting the moving platform to the ground is short. Next, place the Connector to create the pattern. Scroll to Bowman's Length, and use the ↑ and ↓ buttons, the left stick, or the right stick to adjust it. Put these, you're ready to test out the platform and make sure your path is correct.

Continue onward to your first known boss: he hasn't Connectors to make a big difference in how high, low, or far a platform can go.

Adjust the Path Connector Connectors to extend or lower them until they meet your sack-person. To do this, press ✚. In the hand-and-button to open your Object Menu, and then select the Path Curve with ✚. Make you size select the Connector. In this case, the pirates connecting the moving platform to the ground is short. Next, place the Connector to create the pattern. Scroll to Bowman's Length, and use the ↑ and ↓ buttons, the left stick, or the right stick to adjust it. Put these, you're ready to test out the platform and make sure your path is correct.

If you're having trouble maneuvering your sack-person onto a platform, you can make the platform's movement slower. Select the platform and press ✚. Scroll to Path Speed. Tweak items for the pirates, scroll down to Pause, and make the duration of the pause longer.

When your sack-person jumps onto the second platform, two Pirate Bubbles stored at the top-to's a fairly easy task to leap to the first one—a Zig Zag Line Shape for your Create Mode collection is a good choice—but the second one is a little more challenging. Use ✚ and ✚ to select the Path Curve Bubble for the Curly Root Decoration.

Hop off the platform, and zoom out by the right. Your sack-person now faces a terrible foe: a ridiculously fast-moving platform. Don't let it stop you. All you need to do is pause the action by pressing ✚ and then select the Connector with your Path Curve and press ✚ to adjust the Bowman's Length. Make the platform's path as long as you can, and then press ✚ to resume play. Is everything now manageable for your three-little-pitched adventure?

While you're tweaking, it's a good idea to lengthen the pirate slightly so it reaches the coin on the other side, and increase the Pause so the platform holds still long enough for your sack-person to jump on. Use ✚ and ✚ to select the Pause Bubble, and ✚ and ✚ to adjust the duration, and then maneuver your sack-person onto the platform. On the other side, press ✚ to resume playing. Victory dry-pirates and the left side, going to the next platform to continue your adventure.

Swings, Pulley Stuff

Make some use of the sponge shown with ✚ to bring toward your next known. See how to the first one? Now, you can adjust the chains connecting sponges to ceilings to make them swings.

For the sponge up ahead, select the wrench with your Path Curve, and press ✚ to start the tweaking. In this case, you want to shorten the chains to sponges, so press ✚ and ✚ to select the Bowman's Length Bubble. Use it to shorten the chains, and then press ✚ to place the Bubble. Bubbles are items in the left, and you can also decrease the Time to give the chain a little more swing. Make sure that it's short so you can pass sponge where they need to go.

When you're done adjusting the swing, hop your sack-person grab it and swing up to the buttons for the Cat Object and Frosted Glass Sticker.

Now, swing on to the platform on the right to learn about attaching pirates all on your own. You can find pirates in your Tools bag from the Paint Menu. Select it, and place it between the two orange blocks as shown.

Notice something off? Your sack-person must reach the other side to start climbing, but the pirate is in the way. Select the Path Curve, and press ✚ to start tweaking. Use ✚ and press ✚ to select the Bowman's Length Bubble. Increase the length of your pirate's Bow-like pirates easier for your sack-person, and increase the Pause to give them time to grab ahold of it.

Now it's time to climb ✚ to all the way to the upper right of the grate to give your sack-person enough height to jump onto the Bounce Pad set up onto the next platform.

Next up, your sack-person must use the platform ahead to reach the tool-sickee. To do this, you'll need to use the Path Curve to lengthen the platform's path, and then use the Pause to increase the length. Make it as short as possible, and decrease the Time to speed up the platform if you want your sack-person to be able to reach the Price Bubbles overhead.

When you're done, have your sack-person hop aboard and ride the platform up. Pop the Price Bubbles for the Light Blue Spark Decoration and Glue Head Sticker.

Now, grab onto the moving pirate, and ✚ it up to an even higher level. You're getting into the stratosphere pardon now!

Now it's time to learn about vehicles, these chains that can do things like swing sponges around and tug platforms. Go ahead and select it from your Paint Menu's Tools bag, and use it to attach the platform with the Bounce Pad to the orange object near your sack-person. When you're done, have your sack-person ride the platform up to the next area. Pop the Price Bubbles for the Curved Spike Decoration and a ✚. Decrease the Bowman's Length and Maximum Length to draw the platform with the Bounce Pad over to your sack-person.

Jump onto the Bounce Pad to launch your sack-person up through the tasks, then grab the metal ball ✚. Drink it, and jump over to the other Bounce Pad on the left. Jump back to make it up to the next level, then continue to the right.

To collect the Price Bubbles on the platform above, attach the two orange blocks to their right with the Path Curve, and then use the Bowman's Length to extend the platform to the left. Hop aboard, jump over the Price Bubbles above on your own and grab the ones you want. This includes you, with the Weird Pencil Shapesaw Decoration and Girl Head Sticker.

Beat the Clock

It's time to put your skills to the test in a race. First, you must attach the platform to the rolling ball. Select the Connector from your Tools bag, and then use the Path Curve to attach the platform to your ground and hop for the Pirate Bubble at the top to Yellow Maple Leaf Decoration.

Continue to the right to attach the next platform (with a Bounce Pad) to the orange object at its left. Hop aboard, and ride the platform up to the next area. Pop the Price Bubbles for the Curved Spike Decoration to the right, jump on the Bounce Pad to launch to the platform up high on the right, bursting the Cuckoldo Helmet Object Price Bubble on the way.

Carry on to the right, and use a winch to connect the two orange objects. This automatically creates a platform between them. Hop aboard, and ride off. Run through items to collect the Yellow Bubble Decoration and Fake Ash Sticker.

In the next area, attach the platform to the ceiling with a sturdy piston, and decrease the Bowman's Length to shorten the platform's path. Hop aboard, and ride the platform down, collecting Price Bubbles, jump on the platform, and then hop to the right for the Sub Treasure Sticker. Next, return to the platform and jump left to latch onto the grates side. ✚ then to Red Maple Leaf Decoration there before climbing your way to the finish line.

Advanced Guide

Tags and Sensors

Prime Bubble Pick-Ups

Tags and Sensors allow your pack-persons to interact with objects without actually touching them. They can be useful when you're designing complex levels that require players to think outside the box and use their brains, (how do you like that pun?)

Interacting with Objects in New Ways

To equip a Tag press ⊞ in the touch pad button to open up your Pupil Menu, and then select the Tag Sensor. Now, you can equip your pack-person with a Tag by pressing ⊞ in the touch pad while the Tag has Tagged. Tag is the syringe up ahead in Volume 3, and then push the syringe in front of the Sensors to the right. When you have the syringe under a Sensor, a Prime Bubble will appear. Select the Bubble and choose the Tag Sensor Bubble. Then select the Bubble that says **Inquire: All Engines Overdrive** and **Cutoffer Sticker**. The text Sensor opens up for one part of the level.

YOUR INNER ARTIST

Now that you've made the basic level. The way cool for the left, into the green images you can see in the Tag and Sensor Bubble menu. They have names in Prime Pixel Bubbles to tell you for your pack-person to collect – **2 Left Paintbrush Object**.

You can trigger Sensors just by being near them. Go ahead and jump onto the platform with the Tag Sensor. Then, jump off the platform and onto the platform to the right. Now, you'll see the Sensor switch from the A-machine to stay within the appropriate radius, until the object is the right is then high enough that your pack-person can then make the jump before it leaves the Sensor.

Sometimes you may need to tweak the radius of a Sensor so it easier for your pack-person (or you) to turn off. Go ahead, select the Tag Sensor and select **Paint Cursor** and then the yellow Radius Sensor Bubble and the last moves to the left so your pack-person can make it, press only to activate the Sensor.

Now, jump over the spikes to collect the **Mouse Head Sticker** Prime Bubble on your way to the right.

To reach the platform on the right, select the Sensor. Tag a second time, and decrease the Maximum Distance Bubble to about 1 or 2 so that it's just above the platform's head. Then, there's much better – now your pack-person can jump onto it and crouch to the top.

Move to the right and select the next Sensor Tag with your **Paint Cursor**. Increase the Maximum Distance Range to about two rounds, the yellow spikes stops and leaves. The entire you make the syringe, the Sensor they move, giving your neck pennant a greater time frame to make the jog to the right. Now, you can jump the finished keeping the Sensor Tag, go ahead and enter your next present over the moving spikes.

Jump through the hole, and traverse the tiny platform to make a jump for the **Pig Head Sticker** Prime Bubble.

The Sensor Tag you can now is triggered when your pack-persons blasts. However, due to the Sensor's new size, your pack-person tries to battle in the right, a panel shuts in front face behind the Sensor. Keep increased its distance range up your pack-person can safely make it through the door.

MORE TECHNOLOGY

Before you could leave this room, go left to find another Tag Sensor. Increase its range so your pack-person can jump over the yellow spikes. Now, head over to the **Underwater Object** Prime Bubble.

What's Your Type?

Tags and Tag Sensors come in 3 types, which you can adjust in your Tags with specific behaviors. Currently, you've been working only on Lenny Joy.

Give it a try with the syringe up ahead. The Sensor range is under-cooked which means that your pack-person can't trigger it. Select the Sensor and change the Tag Type to **Tag Type: Tag**. Now, you can trigger the ⊞ button attempting to tweak it. Now, you can choose and on the Tag Color.

Push the syringe forward with ⊞ while moving your sock persons. You can see the ranges go through the Sensor. Now, you can jump over the yellow spikes and collect the **Paint Bucket Object** and it has tested the Sensor range color, the proximity triggers on a sensor.

The three, your sock person needs to stand on the lift when it moves to the ground. Now, use your **Paint Cursor** to select the syringe's Tag and change its color. This causes the lift to raise again, so your sock person can jump the Prime Bubble above. Do the fun both the purple lift and the Sensor. Press Prime Bubbles grant you the **Chicken Wing Sticker** and **Adjustable Syringe Overdrive**!

Use the syringe to climb onto the next platform. Now you're going to need the fastest, careful and being possible to make it through the yellow spikes. Those only open when your pack-person is in the Sensor's range. Use the syringe to push the Sensor forward, and then select the Prime Bubble for the **Rounded Black Rectangle Sticker**. Pull straight down through the Sensors to see what it does. Now, you can jump through and select the Sensor into the bottom, not so quickly, and collect the **Hand Sticker** Prime Bubble they grant.

Keeping Things Moving

You now have to set about jumping with Sensor Tags and Types. Select the green Tag Sensor at the top with your **Paint Cursor**, insert the **Left Sensor Tag** and its properties. Increase its Maximum Detection Range to overlap with the red Sensor range beside it, so you can place your syringe in both ranges at the same time.

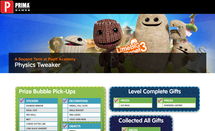

Now, place it and Tag it to the syringe, and move it to range of both Tag Sensors. This leaves the yellow gate for your sock person can jump aboard. Use your **Paint Cursor** to select that same Tag Sensor, and then select the Prime Bubble for the **Rounded Black Rectangle Sticker**. Then, select the **Sticky Hand Overdrive** Under the gate again and Tag it to its successor to the platform on the right and continue your known.

Next up is a moving platform over that only actually moves where a Tag is within range of the Tag Sensor. Place a green Tag on the syringe, and move it into the Tag Sensor's range to start the platform's movement, then your sock person close to the syringe—as soon as you spot the Tag Sensor, you can jump off the platform and onto the platform to the right. Continue to the Sensors to trigger the release of two Prime Bubbles containing the **Ball Sticker** and **Thin Eyelash Sticker**.

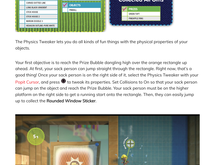

Push the syringe back into range to continue upwards and then pull it out when your sock person reaches the next Sensor on the right. Move the syringe within range of the red Tag Sensor to release two more Prime Bubbles – this time for the **Cloth Pad Sticker** and **Bunsen Hose Decoration**.

Select the Tag Sensor it to turn it purple again, and then move the sponge within range to get the Tag Sensor's maximum detection range. Then, move the Tag Sensor in range and turn the Tag green to unequip the **Nano Disk Sticker** and **Bread Object**.

Push the sponge forward in the right and into the red Tag Sensor's range, and then make the last length's Tag red to trigger the end of the level.

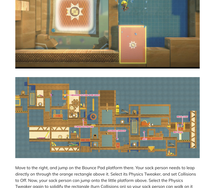

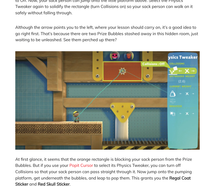

Physics Tweaker

The Physics Tweaker lets you do all kinds of fun things with the physical properties of your objects.

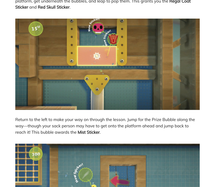

Your first objective is to reach the Prize Bubble dangling high over the orange rectangle up ahead. At first, your sack person can jump straight through the rectangle. Right now, that's a good thing! Once you ride across on the right side of it, select the Physics Tweaker with your [1] key. Click on the rectangle. Change the Physics Tweaker's Mass to 10 and then you can jump on the object and reach the Prize Bubble. Your sack person must be on the higher platform on the right side to get a running start onto the rectangle. Then, they can easily jump up to collect the **Rounded Window Sticker**.

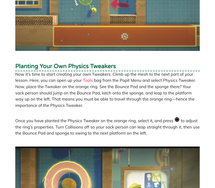

Wave to the right, and jump on the Bounce Pad platform there. Your sack person needs to leap directly on through the orange rectangle above it. Select its Physics Tweaker, and set Collisions to Off. Now, your sack person can pass straight through the platform above. Select the Physics Tweaker again to solidify the rectangle (turn Collisions on) so your sack person can walk on it safely without falling through.

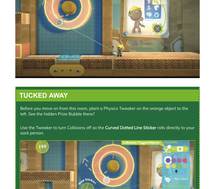

Although the arrow points you to the left, you never know should carry on, it's a good idea to go right first. That's because there are two Prize Bubbles stashed away in this hidden room, just waiting to be unleashed. See them perched up there?

At first glance, it seems that the orange rectangle is blocking your sack person from the Prize Bubbles. But if you use your Pogo Cursor to select its Physics Tweaker, you can turn off Collisions (Off). Now, your sack person can pass straight through it. Now jump onto the pumping platform, get underneath the bubbles, and leap to pop them. This grants you the **Regal Coat Sticker** and **Red Skull Sticker**.

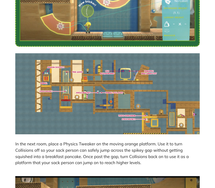

Return to the left to make your way on through the lesson. Jump for the Prize Bubble along the way—though your sack person may need to get into the platform ahead and jump back to reach it! This bubble rewards the **Ant Sticker**.

Planting Your Own Physics Tweakers

Now it's time to start creating your own Tweakers. Climb up the mesh to the next part of your journey, and you'll see a Bounce Pad. Select the Physics Tweaker on the orange rectangle. Now, place the Tweaker on the orange peg. See the Bounce Pad and the sponge there? Your sack person should jump on the Bounce Pad, fetch onto the sponge, and leap to the platform up up on the left. That means you must be able to travel through the orange ring—hence the importance of the Physics Tweaker.

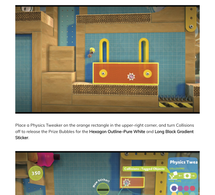

Once you have planted the Physics Tweaker on the orange ring, select it, and press [R] to adjust the ring's properties. Turn Collisions off so your sack person can leap straight through it, then use the Bounce Pad and sponge to swing to the next platform on the left.

TUCKED AWAY

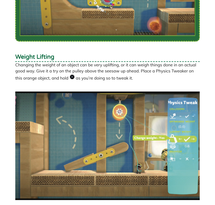

Before you move on from this room, plant a Physics Tweaker on the orange object to the left. See the hidden Prize Bubble there?

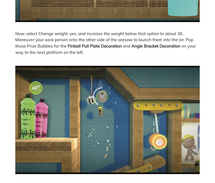

Use the Tweaker to turn Collisions off so the **Curved Dotted Line Sticker** rolls directly to your sack person.

In the next room, place a Physics Tweaker on the moving orange platform. Use it to turn Collisions off so your sack person can safely jump across the spikes gap without getting squished into a breakfast pancake. Once past the gap, turn Collisions back on to use it as a platform that your sack person can jump on to reach higher levels.

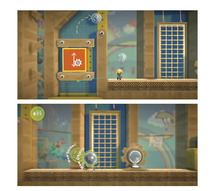

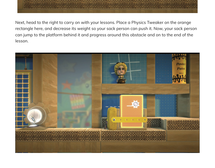

Place a Physics Tweaker on the orange rectangle in the upper-right corner, and turn Collisions off to retrieve the Prize Bubbles for the **Hexagon Outline-Pure White** and **Long Black Gradient Sticker**.

FIERY TIMES

Ok your way to the next lesson, take a detour to the left before climbing the net. Place a Physics Tweaker on the orange rectangle there to release the Prize Bubbles for the **Stick House 2 Sticker** and **1950s Oven Knob Decoration**. The key is getting your sack person out of the way inside the alcove so the fire doesn't hit them first. As soon as the fire passes, jump down to stop the Prize Bubbles from rolling out of reach.

Weight Lifting

Changing the weight of an object can be very uplifting, or it can weigh things done in an actual good way. Give it a try on the pulley above the seesaw up ahead. Place a Physics Tweaker on this orange object, and hold [R] as you're doing so to tweak it.

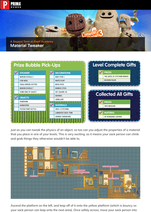

Now, select Change weight: yes, and increase the weight below that option to about 30. Maneuver your sack person onto the other side of the seesaw to launch them into the air. Pop those Prize Bubbles for the **Pinball Pull Plate Decoration** and **Angle Bracket Decoration** on your way to the next platform on the left.

Up ahead, do the same thing to the orange box to put some weight on those springs. Increasing the weight to about 70 allows your sack person to jump on the platform, collect the **Stick House Sticker** Prize Bubble, and start climbing the net with [W]. There's yet another Prize Bubble that holds the **Pine Leaves Decoration** at the top.

Go left first to find two Prize Bubbles perched on a springy platform. Place a Physics Tweaker on the orange box inside the platform. It's difficult to get the exact weight to launch the Prize Bubbles up and over the wall to your sack person. The trick is weighing it down first, then decreasing the weight to zero so the platform bounces high on the springs. Your rewards are the **Pinball Object** and **Margin Double 3 Sticker**.

Next, head to the right to carry on with your lessons. Place a Physics Tweaker on the orange rectangle here, and decrease its weight so your sack person can push it. Now, your sack person can jump to the platform behind it and progress around this obstacle and on to the end of the lesson.

Material Tweaker

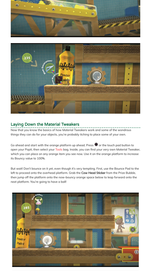

Just as you can tweak the physics of an object, so too can you adjust the properties of a material. Material Tweaker is the tool that allows you to do this, as it lets you alter and preset can sliding and grab things like otherwise wouldn't be able to.

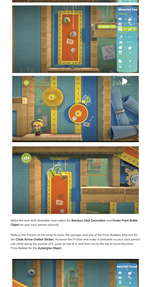

Exceed the platform on the left, and leap off of it onto the yellow platform (which is bouncy so your orbit points you' way onto it to land on it). Press Morph Ball to curl up and activate the Material Tweaker. Then, scan the Material Tweaker. Use **Infinite Fluff Decoration** from Bubble Gallery decorating.

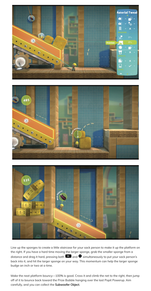

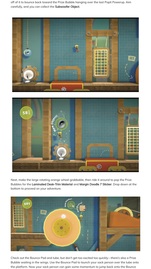

Up ahead, use your Pistol Cannon to ballast the Material Tweaker, and then press ● to open Tweaking. Make the orange object grabbable. Now, press and pointer can jump and grab it with ● . Grab it across the long, sticky pipe of dearth without dying.

Next, your task pointer floors a very tall orange wall, with some Pixie Bubbles to be had. To climb it, you must first make it climbable using the Material Tweaker. Then, make your way to the top. Use the **Wave Rock Decoration** and **Upright Double Z Statue** on the pillars flanking the platform.

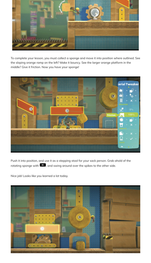

Creating Some Friction

It's time to test friction. This one is a huge help if your wood person is trying to climb a surface that would otherwise be slippery. Try it out on the orange ramp up ahead. Select the Material Tweaker with your Pistol Cannon, ● to start tweaking, and then increase Friction to 100%.

Proceed down the icy ramp up ahead. At the bottom, take a leap of daring faith to collect the Prize Bubbles for the **Vinyl V Stitching Material** and **Soft Square Art Degrees Decorations** on your wood person makers it out the gap.

Laying Down the Material Tweakers

Now that you know the basics of Material Tweakers work and some of the wondrous things they can do for you, you're probably itching to place some of your own.

Go ahead and start with the orange platform up ahead. Press ● as the launch pad button to activate the Material Tweaker, and then ● to open Tweaking. Make the platform grabbable, which you can place on the orange item you see now. Also, set the orange platform to increase its Bouncy value to 100%.

But wait! Don't bounce on it yet, even though it's very tempting. First, use the Bounce Pad to the left to ascend onto the overhead platform. Grab the **Cloud Head Sticker** from the Prize Bubble, and then proceed to the right to the next bouncy orange space below to leap forward onto the next platform. You're going to love it!

Next up, level your way through a few challenges to progress through the level. Make the first wheel you see grabbable. Pop the Prize Bubble for the **Bent Pink 1 Decoration** on your curb.

Continue onward, grabbing the wheel on the orange wall. Use it to ascend and collect the **Bamboo Stick Decoration** and the **Flutter Paint Bottle Object** on your path when prompted.

Replace the Friction of the ramp to lower the sponges and one of the Prize Bubbles (this one for the **Bubble Gallery Object**) will appear. Use the wheel to ascend to the next platform, and then to climb along the outside of it, jump on top of it, and then use its the key to bound the next Prize Bubble for the **Aubergine Object**.

Make the next platform bouncy – 100% is good. Cross it and climb the net to the right, then jump on the wheel to collect the **Bubble Gallery Object** hanging over the red Pixel Powerup. Jump carefully, and you can collect the **Subwoofer Object**.

Line up the sponges to create a little stairway for your wood person to make it up the platform on the right. Use the Material Tweaker to make the **Bubble Gallery Object** grabbable, and then proceed to drag it back previously with ● and ● simultaneously to put your wood person's back into it, and hit the larger sponge on your way. This momentum can help the longer sponge launch you to the next platform.

Make the next platform bouncy – 100% is good. Cross it and climb the net to the right, then jump on the wheel to collect the **Bubble Gallery Object** hanging over the red Pixel Powerup. Jump carefully, and you can collect the **Subwoofer Object**.

Next, make the large rotating orange wheel grabbable, then ride it around to pop the Prize Bubble for the **Bubble Gallery Object** and the **Bengal Double T Sticker**. Drop down at the bottom to proceed on your adventure.

Check out the Bounce Pad and look, but don't get too excited by sparkle. Ahem also a Prize Bubble waiting in the wings. Use the Bounce Pad to launch your wood person over the solar sink. Then, use the Material Tweaker to make the **Bubble Gallery Object** grabbable and then the Bounce Pad set up bounced the Prize Bubble for the **Jewellery Decoration**.

Time to move on with your tenure. Used this one is Tenet Pilot, press a Material Tweaker on the orange platform below the solar and reduce its Friction to 0%, or it's too anti-slippery.

Now, use the Bounce Pad to ride down the tube, but don't drop your wood person all the way. Let them keep sliding with some roof speed to the Bounce Pad at the end, and then hold ● for a big jump at that last beautiful second to reach the two Prize Bubbles hanging over the valley. Pop them for the **Bubble Gallery Object** and the **Orange Cardboard Material**, along with lots of fresh air to your wood person's whirling.

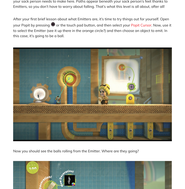

To complete your tenure, you must collect a sponge and move it into position where outlined. Set the sloping orange ramp on the left Make it bouncy. Set the large orange platform to the middle Friction 0 Friction. Now you have your sponge!

Push it into position. Make it into a stepping stool for your wood person. Grab ahold of the rotating sponge with ● , and start using around over the spikes to the other side.

Now, path Lucky Bar, you are launched to be today.

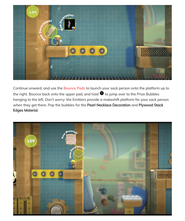

Emitters

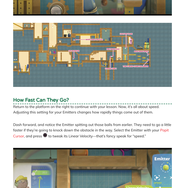

Emitters actually allow motorists that you place in a level to create other objects. They can build platforms or spit out bullets, whatever you desire in the imaginative new worlds you design in Create Mode.

You're probably eager to get started with this lesson, but before you move to the right, go left to find two Hidden Prize Bubbles for the **Ocean Stream Decoration** and **Slice of Toast Decoration**. Then, proceed to the right to start your Pop!t Cursor Academy. Don't be afraid of those loops. Remember, you can't fall off the edge of the world, so you'll just end up back where you started. Emitters let you spit forces to send your vehicle flying. That's what they're here to do! Move, after all!

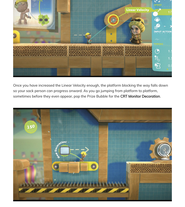

Use your first spell lesson about with Emitters are. It's time to try things out for yourself. Open your Pop!t by pressing ◉ or the touch pad button, and then select your Pop!t Cursor. Now, use it to select the Emitter (can't up there in the orange circle?) and then choose an object to emit. In this case, it's going to be a ball.

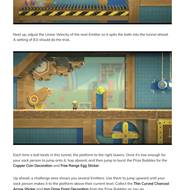

Now you should see the balls rolling from the Emitter. Where are they going?

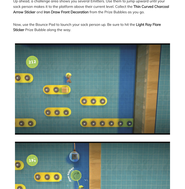

Continue onward, and use the Bounce Pads to launch your sack person onto the platform up to the right. Bounce back over the upper pad, and hold ◉ to jump over to the Prize Bubbles hanging to the left. Don't worry the Emitters provide a makeshift platform for your sack person when they get them. Pop the bubbles for the **Pearl Necklace Decoration** and **Plywood Stack Edges Material**.

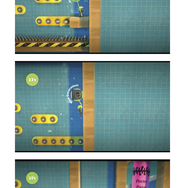

How Fast Can They Go?

Quick forward, and notice the Emitter spitting out those balls from earlier. They need to go a little faster if they're going to knock down the obstacle in the way. Select the Emitter with your Pop!t Cursor, and press ◉ to break its Linear Velocity—that's fancy speak for "speed."

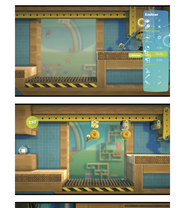

Once you have increased the Linear Velocity enough, the platform blocking the way falls down so your sack person can progress onward. As you go jumping from platform to platform, sometimes before they even appear, pop the Prize Bubble for the **Cliff Medium Decoration**.

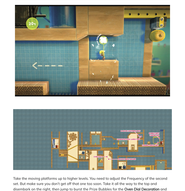

Next up, adjust the Linear Velocity of the next Emitter so it spits the balls into the tunnel ahead. A setting of 8.5 should do the trick.

Each time a ball lands in the tunnel, the platform to the right lowers. Once it's low enough for your sack person to jump onto it, hop ahead and then jump to launch the Prize Bubbles for the **Copper Coin Decoration** and **Free Range Egg Sticker**.

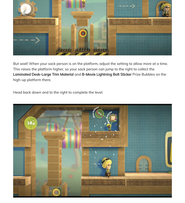

Up ahead, a challenge awaits already you around Emitters. Use them to jump upward until your sack person makes it to the platform above their current level. Collect the **Tree Curved Charcoal Arrow Sticker** and **Iron Dew Front Decoration** from the Prize Bubbles as you go.

Now, use the Bounce Pad to launch your sack person up. Be sure to hit the **Light Sky Plane Sticker** Prize Bubble along the way.

Timing is Everything

There are other ways to fire your sack person, like launching the canons or using Emitters, but you should get out objects and how long those objects should remain in the level before disappearing. After all, you don't want a cluttered level just because of an overzealous or long-forgotten Emitter.

Proceed forward to see sponges that are disappearing much too quickly. This means your sack person won't be able to use them to get across the gap. Select the Emitter with your Pop!t Cursor, and press ◉ to adjust the Lifetime of the sponges to something more appropriate. Then, grab ahold of a sponge and travel across the gap to the platform on the right. Hang on until the very end to jump and catch their **White Paint Smudge Sticker** Prize Bubble.

Take the moving platforms up to higher levels. You need to adjust the Frequency of the second set, but make sure you don't get off that one too soon. Take it all the way to the top and discombobulate the Emitter, then pop the Prize Bubbles for the **Oven Dial Decoration** and **Rough Beige Square Sticker** on your sack person's sexy down.

When you go back the way you came a second time, emerge to the left this time, where you see the Pop!t Pinning. Pinned up the ramps that appear from the Emitters, but be careful of their very specific timings.

When Enough is Enough

An Emitter can create many of the same object, but you can have many exist at one single time. Select the Emitter with your Pop!t Cursor, and press ◉ to adjust the Max Emitted. If the Max Emitted (in Once setting is for) is the Tweak menu, if set to "one," whenever an Emitter creates a new object, the old one is destroyed. If set to more than that, then that many number of emitted objects can exist together in time and space, so long as the other settings allow.

In the next puzzle, use your Pop!t Cursor to select the Emitter that's creating the platforms up ahead. See how it's only allowing one at a time? You need more than that if your sack person is going to make it across the gap. Increase the Max Emitted At Once setting to help.

Jump across the platforms to the next section. Now, you must adjust the Emitter to only allow one at a time so your sack person can jump on this platform to cross.

But wait! When your sack person is on the platform, adjust the setting to allow more at a time. This raises the platform higher, so your sack person can jump to the right to collect the **Laminated Desk Large Trim Material** and **G-Mode Lightning Bolt Sticker** Prize Bubbles on the high-up platform there.

Head back down and to the right to complete the level.

Now that we've forgotten anything with the image of teleportation. Who doesn't like jumping through space, right? It's quite fun, which is why Scoops decided to put this kind of phenomenon. And if you believe it is, don't worry about it... in the blogosphere, anything is possible!

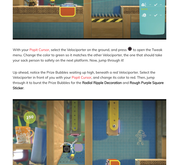

Velociporters

Brisk speed-based Prize Bubbles, Velociporters. When you jump in one, you'll come out at the nearest other one of the same color.

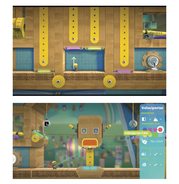

At the very beginning of this level, you have the chance to try out a couple of them. See those Velociporters? Jump in the one on the left and you'll emerge from the one on the right. Then, because out of reach, but if your sack person gains some momentum as they fly through the Velociporters. Go through them to the far platform first, then take a big jump over the table so to dive into the smaller one. On your way out of the left one, go left to grab the **Plastic Ruler Object** Prize Bubble.

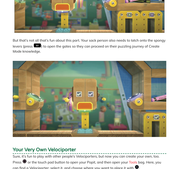

Now, launch your sack person this way through the Velociporters at least a couple of times. They should be able to get enough momentum to reach the platform above. Head to the left-hand platform containing the other Prize Bubbles. These bubbles hold the **Chalk Arrowhead Sticker** and **Glow Stick Decoration**.

Round through more of these as your sack person proceeds through the level to get a feel for how to navigate the enormous objects. Collect the **Blue Paint Smudge Sticker** in your go, next to the Banana Peel.

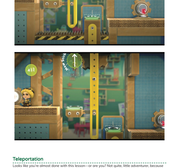

Soon, you reach the first area where you can start tweaking colors. Open your Pupil with ● on the touch pad button to select your Pupil Cursor. See the purple Velociporter on the ground in front of your sack person? They're about to go through that, but onto it's purple, they would end up falling directly into the sphinx. If they did that, Sack folk don't make very cute personages, so you must change the color before going through.

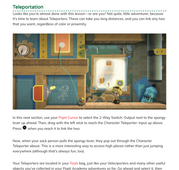

With your Pupil Cursor, select the Velociporter on the ground, and press ● to open the Tweak menu. Change the color to green as it matches the other Velociporter, the one that should take your sack person to safety, so the next platform. Now, jump through it!

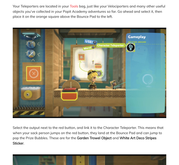

As already noted the Prize Bubbles walking up high. Jetsmith a red Velociporter. Select the Velociporter in front of you with your Pupil Cursor, and change its color to red. Then, jump through it to burst the Prize Bubbles for the **Rabbit Pipple Decoration** and **Rough Purple Square Sticker**.

Next, change the Velociporter's color to purple to emerge from the one on the right, up above your sack person.

You must time your maneuvers through the Velociporters precisely to make it to the other side in one stitched piece. Pop in the first to emerge in the next yellow one, then rush to the red one to pop out on the far right.

In the next area, you can change the color of the mobile Velociporter to jump out of each respective Prize Bubble and collect the contents. These grant you the **Condensation Drip Decoration** and **Trombone Mouth Piece Decoration**.

But that's not all that's fun about this part. Your sack person also needs to latch onto the sponge levers (press ✕ to open the sphinx so they can proceed on their puzzling journey of Create Mode knowledge.

Your Very Own Velociporter

Sadly, as fun as toying with other people's Velociporters, but now you can create your own, too. Press ● in the touch pad button to open your Pupil, and then open your Tool Belt. Hey, now you can find a Velociporter, select it, and choose where you want to place it with ✕.

While you're planning it, hold ● to tweak its properties. You'd better make this one green so your sack person can jump through it to the platform above.

Next up, place a Velociporter in the platform to the right so your sack person can launch from one side of the terrain to the other. Make this one green, too. While you're at it, have your sack person go back and forth through these two platforms so they can re-stock the Prize Bubbles for the **Dotted Outline Material** and **Chalk Arrow Sticker**.

Teleportation

Looks like you're almost done with this terrain—or are you? Not quite. Still with adventure, because it's time to learn about Teleporters. These can take you long distances, and you can link any two that you want, regardless of color or proximity.

In this next section, use your Pupil Cursor to select the Z-Wing Switch Output next to the sponge lever up ahead. Then, along with the left stick to reach the Character Teleporter. Input up above. Press ● when you reach it to link the two.

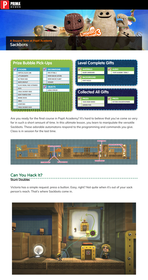

Now, when your sack person pulls the sponge lever, they pop out through the Character Teleporter above. This is a more interesting way to access high places rather than just jumping everywhere (although that's always fun, too).

Your Teleporters are located in your Sticks bag, just like your Velociporters and many other useful objects you've collected in your Pupil's Academy adventures so far. Go ahead and select it, then place it on the orange square above the Bounce Pad to the left.

Select the output next to the red button, and link it to the Character Teleporter. This means that when your sack person jumps on the red button, they land at the Bounce Pad and can jump to pop the Prize Bubbles. These are for the **Garden Trowel Object** and **White Art Deco Stripes Sticker**.

In the next room, place a Character Teleporter on the orange wall above the purple Velociporter, and then connect the red button output to the Teleporter. The trick is making sure you don't place the Character Teleporter too high on the wall, or your sack person may fly past the Prize Bubble in the first room and end up up ladies in the second.

When you're done, jump on the red button to launch your sack person through, and grab the Prize Bubbles for the **Black Rabbit Pipple Inward Sticker**. Then, try a second round this time using the Velociporter to head to the left. Keep going from Velociporter to Velociporter, popping Prize Bubbles for the **Pipple Pink Inward Sticker**, **LEGO's Hair Sticker**, **Mannequin Hand Pinning Sticker**, and **Money Cup Object** on you go.

Are you ready for the final course in Pupit Academy? It's hard to believe that you've come so very far in such a short amount of time. In this ultimate course, you have to manipulate the evil-doer Sackboris. These adorable scarecrow's respond to the programming and commands you give. Check out awesome life hacks for Sackboris.

Can You Hack It?

Item Dondan

Victoria has a simple request: press a button. Easy, right? Not quite when it's out of your sack person's reach. That's where Sackboris comes in.

Open your Pupit, and navigate to the Tools bag. Select the sack item, the Sackboi, and place it directly above the buttons. When Victoria lies to normal floor, gravity pulls the Sackboi down onto the button. This causes an on-screen prompt for you to press it.

Or just the other side, a stack of three Prize Bubbles provides the **Vertical Block Line Sticker**, **Horizontal Sticker**, and the **Trash Sign Sticker**. Collect them, and head to the next checkpoint.

Good Behavior

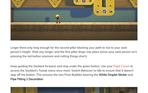

Sackboris is the product of the sinister genius and obviously pre-Tron's Creator Media. Sackboris' Tool Code item. Tweak around with the attributes in the left hand and observe playtime results. One of the most interesting and useful winning these is controlling a Sackboi's Behavior.

The standard Sackboi must trigger it seems of otherwise inaccessible worthline, ahead to video in which your new platform access to the most part of the Sackboi.

Media executing **Idle** Sackboi the instructions or into the left, hover your Pupit Cursor over the Sackboi, and press **E** again to. Tweak mess. Scroll down to Behavior, and toggle it to Follow Player. Now, when you move around, the Sackboi follows you. Sackboi's Behavior Tool.

Exit the Pupit, and the Sackboi immediately demonstrates the assigned behavior, moving to directly observe your each person and on top of the button.

Wait for the pillar operated by the red button to be fully lifted. Once it has reached its maximum height, quickly move to underneath the blue button. Your Sackboi follows dutifully.

Linger there only long enough for the second pillar blocking your path to rise to your part. Sackboris will follow you through the gap, and you can then move ahead and wait until it isn't pressing the red button anymore and pulling things down.

Keep guiding the Sackboi forward and away under the green button. Use your Pupit Cursor to move the Sackboi's Tweak menu once more. Switch Behavior to Idle to ensure that it doesn't stay off the button. This ensures the two Prize Bubbles bearing the **White Dropper Sticker** and **Pea Filling 2 Decoration**.

Staying Put

Sackboris is a very much professional pressing that to, with your and person and a Sackboi splitting the Action. Once ripped, move the Sackboi's Behavior to Follow while standing under the red button. To keep it in place, switch its Behavior to Idle once it is in position.

Now, when your each person steps on the blue button simultaneously, a platform moves. Hop on to it, and ride it up to the next area. Sackboris will follow you through the gap, and you can then pop the mentioned Prize Bubbles for a **Paper Mache Sheet Decoration**. Just open the blue button again to lower the platform, and continue on to the next area.

Running for Its Life

Sackboris is a very much professional checkpoints and relax as the green buttons. This ensure a Sackboi is placed on the left side of the red button. Switch the Sackboi's Behavior to Follow. Move to the right, to before, tweak the Sackboi's Behavior to Follow.

Move to the right so that the Sackboi is clear of the first standing wooden column. Take a deep breath and hammer down on the red button at the right hand side. Hit that all lights to pop the Prize Bubble containing the **Black Rabbit Fade Consumb Sticker**.

Keep running, and leap at the blue button. Depressing it causes a platform in the background to your Sackboi can continue. Your Sackboi doesn't mind the gap, and once the platform is low enough, it automatically jumps on top of it.

Leap on to the platform, and continue to the next area. Sackboris will follow you through the gap, and you can then pop the mentioned Prize Bubble for a **Paper Mache Head Decoration**. Just open the red button again to lower the platform, and continue on to the next area.

Leave, and hit the activating glide to rise out of the Sackboi's way, and then run to the right and stop so that the Sackboi is standing atop a red button. Tweak its Behavior to Idle so that it stops there.

The lets your sack-person proceed to where a spongy wheel is spinning, thanks to the dolphins that are spraying water at it. Jump on to the wheel, and ride it up to the next area. Sackboris will follow. Just open the **Paper Mache Flower Decoration** and **Chalk Scribby Head Sticker**.

Tag, You're It!

Sackboris are capable of getting things done, even without following your each person's lead. For the next task, Victoria needs you to direct the Sackboi to follow the next Tag Cube.

Time the colored Tags above the colored buttons so the boxes land where the Sackboi stands. Tweak the Sackboi's Behavior to Follow. Jump on to the red button to activate the Tag. Then, sprint and hammer **E** to press the blue Tag Cube, as well. This causes the Sackboi to follow. Tags of the selected color, just so the normal Follow Behavior classes it to find your each person.

Once past the first barrier, tweak the Sackboi Behavior to Follow the red Tag Cube. Obviously, the Sackboi cannot step into red button and leaves two Prize Bubbles for you. Pop them for the **Dark Fortune Sign Sticker** and **Wrong Decks Sticker**.

Jump on to the red button, and then hammer **E** to press the blue Tag Cube, as well. This causes the Sackboi to follow. Tags of the selected color, just so the normal Follow Behavior classes it to find your each person.

Jump on to the red button, and then hammer **E** to press the blue Tag Cube, as well. This causes the Sackboi to follow. Tags of the selected color, just so the normal Follow Behavior classes it to find your each person.

Jump on to the red button, and then hammer **E** to press the blue Tag Cube, as well. This causes the Sackboi to follow. Tags of the selected color, just so the normal Follow Behavior classes it to find your each person.

Jump on to the red button, and then hammer **E** to press the blue Tag Cube, as well. This causes the Sackboi to follow. Tags of the selected color, just so the normal Follow Behavior classes it to find your each person.

Jump on to the red button, and then hammer **E** to press the blue Tag Cube, as well. This causes the Sackboi to follow. Tags of the selected color, just so the normal Follow Behavior classes it to find your each person.

Jump on to the red button, and then hammer **E** to press the blue Tag Cube, as well. This causes the Sackboi to follow. Tags of the selected color, just so the normal Follow Behavior classes it to find your each person.

Jump on to the red button, and then hammer **E** to press the blue Tag Cube, as well. This causes the Sackboi to follow. Tags of the selected color, just so the normal Follow Behavior classes it to find your each person.

Jump on to the red button, and then hammer **E** to press the blue Tag Cube, as well. This causes the Sackboi to follow. Tags of the selected color, just so the normal Follow Behavior classes it to find your each person.

Jump on to the red button, and then hammer **E** to press the blue Tag Cube, as well. This causes the Sackboi to follow. Tags of the selected color, just so the normal Follow Behavior classes it to find your each person.

Jump on to the red button, and then hammer **E** to press the blue Tag Cube, as well. This causes the Sackboi to follow. Tags of the selected color, just so the normal Follow Behavior classes it to find your each person.

Jump on to the red button, and then hammer **E** to press the blue Tag Cube, as well. This causes the Sackboi to follow. Tags of the selected color, just so the normal Follow Behavior classes it to find your each person.

Jump on to the red button, and then hammer **E** to press the blue Tag Cube, as well. This causes the Sackboi to follow. Tags of the selected color, just so the normal Follow Behavior classes it to find your each person.

Jump on to the red button, and then hammer **E** to press the blue Tag Cube, as well. This causes the Sackboi to follow. Tags of the selected color, just so the normal Follow Behavior classes it to find your each person.

Jump on to the red button, and then hammer **E** to press the blue Tag Cube, as well. This causes the Sackboi to follow. Tags of the selected color, just so the normal Follow Behavior classes it to find your each person.

With your goodies secured, tweak the Sackboi Behavior to follow the red Tag Cube. Move to above on the red button and then the way, continue to the right.

Jump onto the upper-a-pockers, and pop the **Speaker Decoration** Prize Bubble.

Head to the left, and ride the dolphin to reach bits more Prize Bubbles that grab you the **Large Hopter Head** and **Chalk Scribby Body Sticker**.

Hop back down, and then return to your right-hand journey.

Sweet Dance Moves

Sackboris are capable of much more complex behavior than following the leader or trap. Get your groove on for this next task Victoria assigns.

First, tweak the Sackboi Behavior, waiting to try it. Next, select the Record option below in the Tweak menu. Notice the big red circle in the upper right corner. This lets you know that you're recording the Sackboi's behavior. Whatever you command your each person to do, the Sackboi mimics.

In this case, the **W**, **A**, and **D** control your each person's arms. Move the left arm up and to the left with **A** and move the right arm up and to the right with **D**. Victoria's dance moves. **W** to pull your each person's body up and down. Continue to jump and move around to get the Sackboi to mimic your choreography.

Once you're done approximating your handiwork, so to the right. Tab onto the first spinning spongy wheel to reach the slide ahead. Ride along it into the foreground, and continue to the right.

A Second Term at Popit Academy

Graduation

Victoria has only one more request: press a button. When you do, a fantastic light show, along with several Sackbots rocking your sweet moves, celebrates your graduation. When you're feeling partied out, run to the right, and arrive at the Scoreboard. Congratulations!

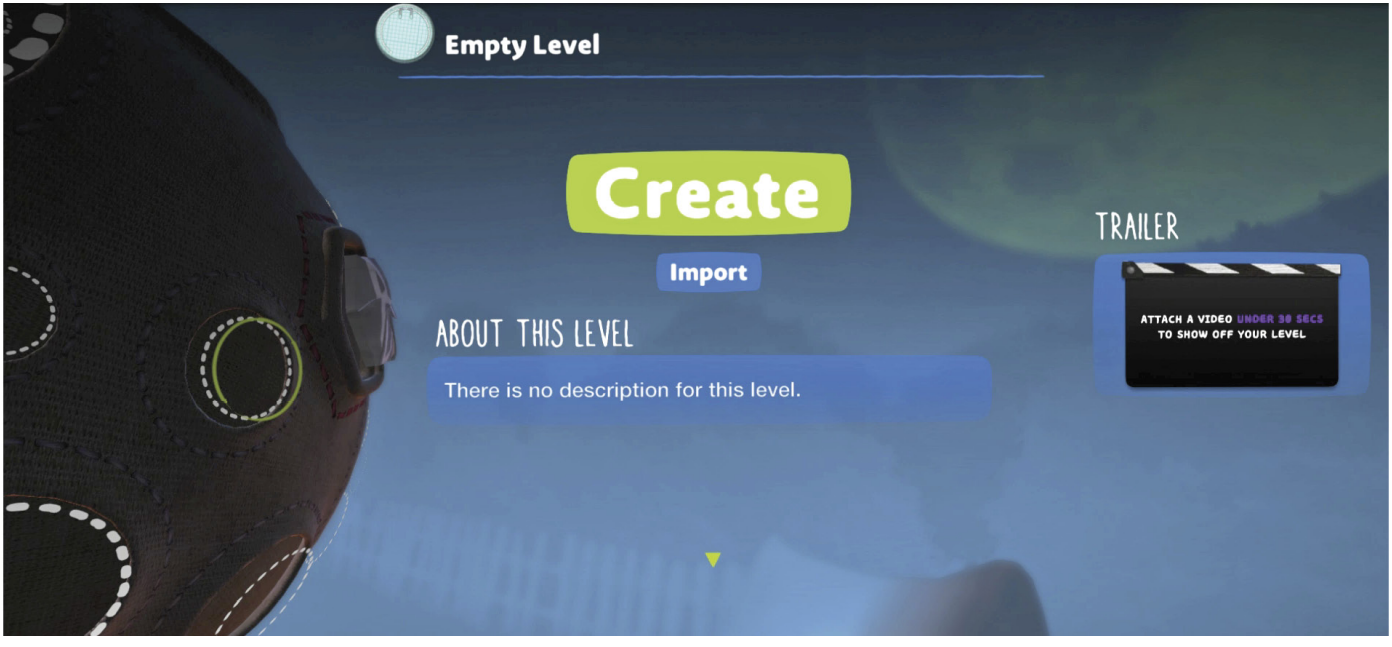

Create: What's New And Shiny

Ever Upgrading!

Little Big Planet has given its community the awesome power to not only play, but also to share and create. The Popit expansions in Create Mode are more than just tools; these are a means of expression, and they supply you with the power to spread your vision. While the halls of the Academy help ingrain the basics, and the tables of the last chapter provide you with a quick reference guide, this section is designed to plunge you into the Popit as you start investigating the newest instruments of your inventiveness.

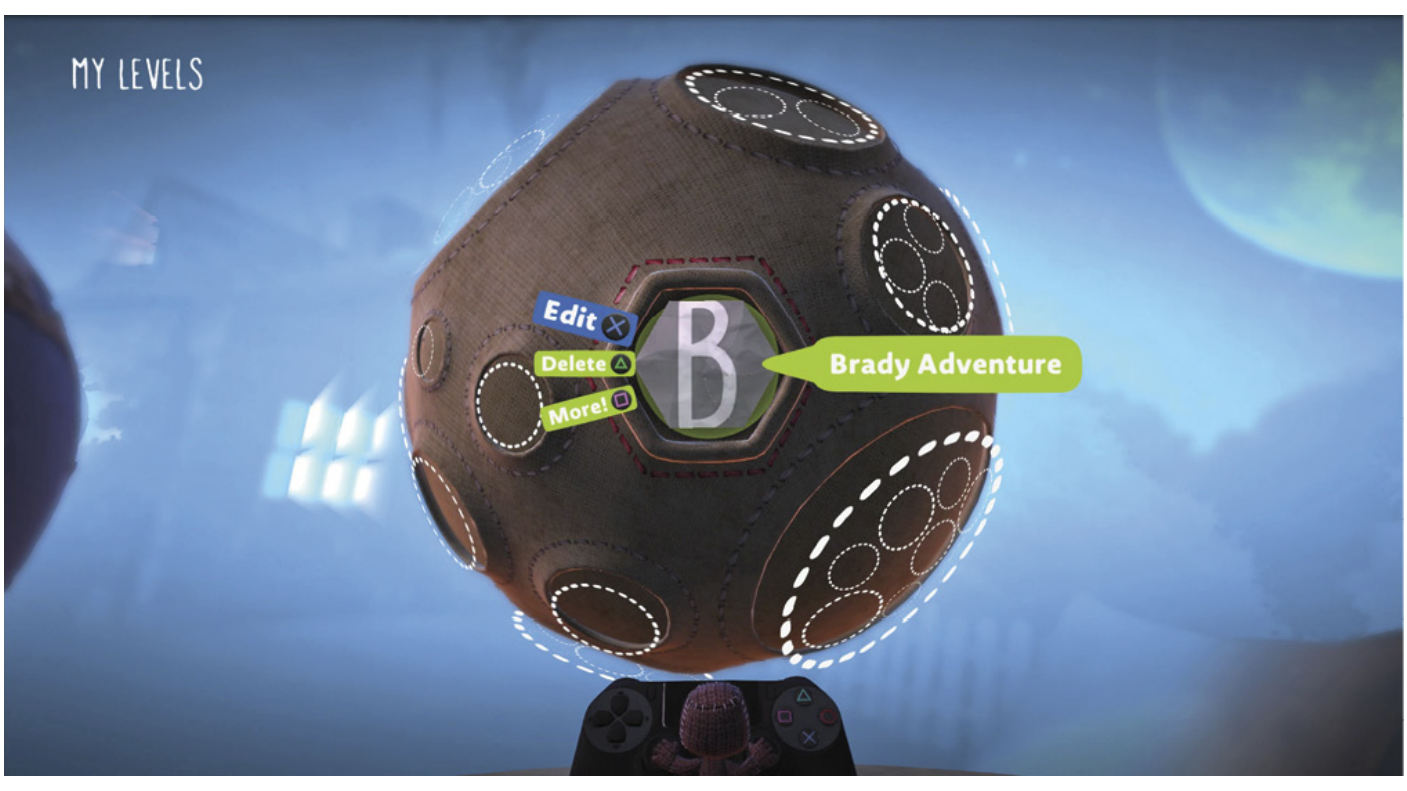

Create: What's New And Shiny

Some Basics

Even before getting into the Goodies and Tools bags, there are a few interesting updates to My Moon and the Global Stuff menu that can really set your creations up for success.

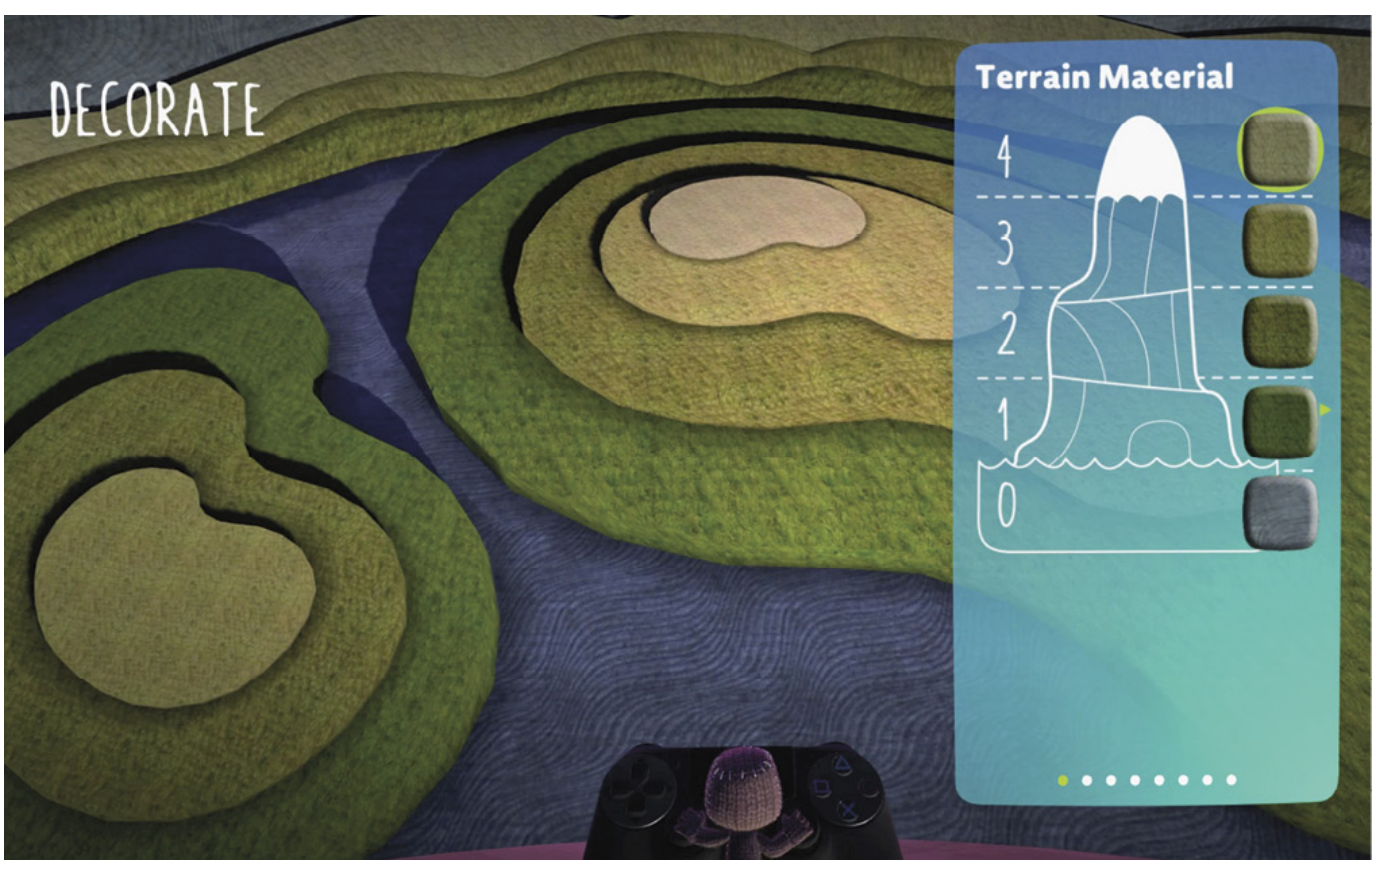

Adventures

When flying over the surface of My Moon, you are likely to notice a new few hexagonal landing zones. These special spots are known as Adventures, and just like Bunkum Lagoon or Manglewood, you can drop into one of these to create a whole series of interconnected levels in a customized environment.

When you tap over one of these, you find yourself on the Map Screen. Not only can you plop levels down at will (up to 15 of them), but you can also press V to decorate the map itself. From Terraforming to Topography, the power is yours.

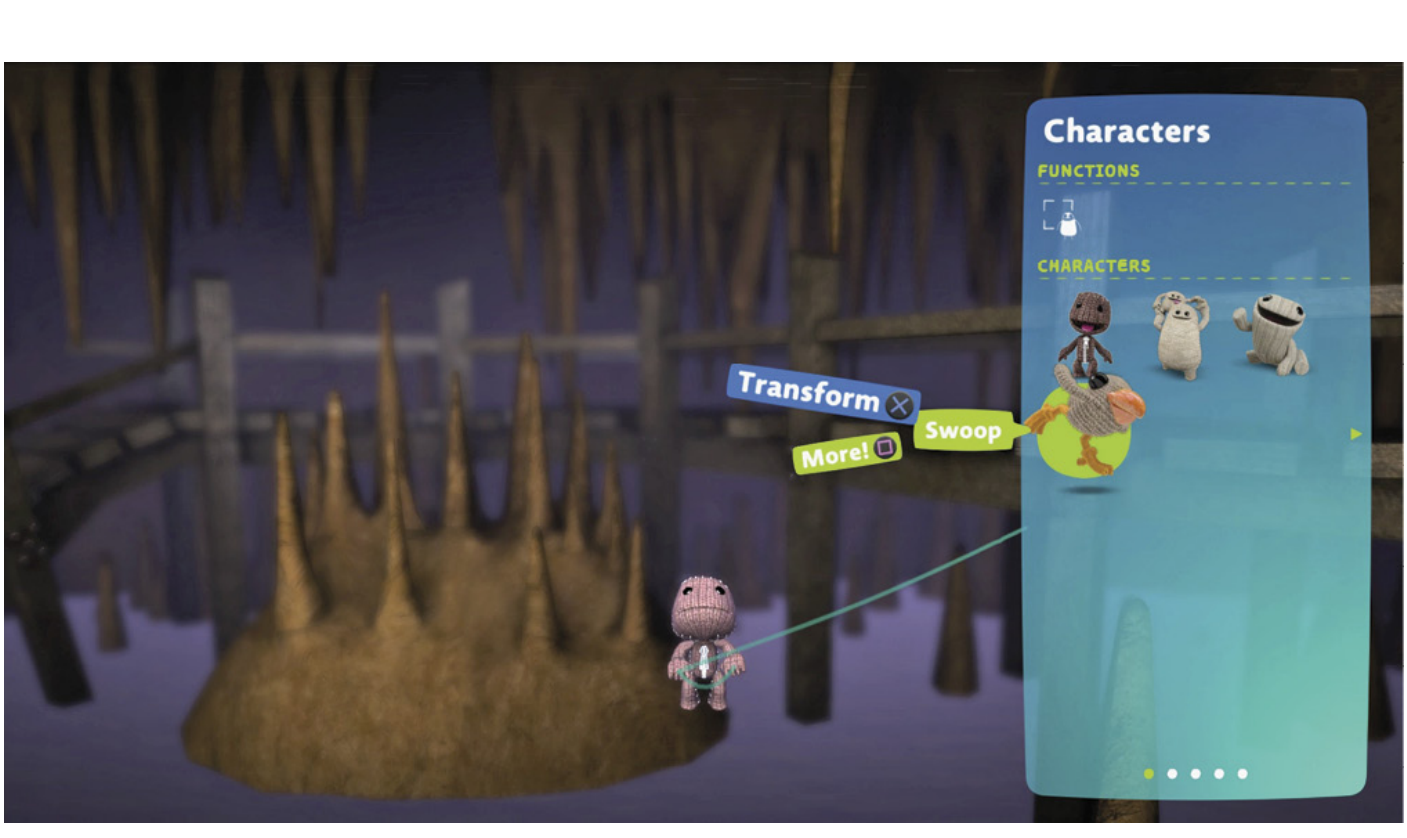

Global Stuff

Once you find yourself in a new level, there is a whole host of fresh hotness in the Global Stuff menus that any cunning creator should know about.

First up is the Characters page. This handy segment lets you quickly switch out between the daring adventurers for gameplay testing and aesthetic purposes.

In the next tab over, you find the Sackpocket Items. Again, this feature lets you equip anything you might need to check a puzzle or just see how it is put together.

Remember, characters and items that are added from this section are just to help create and test. There are some new tools discussed in this section to add them to levels properly.” You must use some of the new tools discussed in this section for that.

There are also new segments devoted to questing and the Thermometer, but before that, it’s time to get into some practical demos.

Create: What's New And Shiny

Sensors

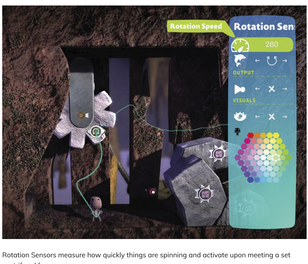

As you dive head first into the Popit looking for the newest and shiniest of the new shiny things, you might overlook Sensors. Not so here! Several new Sensors have made their way into the Tools bag and are ripe for the sensing.

Let's begin this demo at the opening of a cave. Nothing like a little spelunking to get the creative juices flowing!

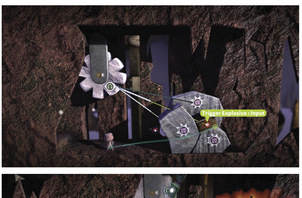

Rotation Sensor

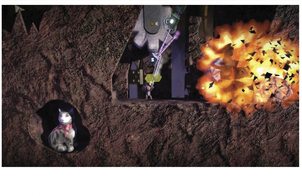

In the first cavern, some boulders obstruct the adventure ahead. Fortunately, there seems to be some TNT and a few Shardinators (another new tool covered in the Object Tweaker section a little later on) at the ready to help make a path. By attaching a Rotation Sensor to the handy preplaced turbine, you are just a few short connections shy of clearing the way.

Rotation Sensors measure how quickly things are spinning and activate upon meeting a set centrifugal force.

Use the Popit Cursor to check out the available Tweaks, as well as to connect the Sensor to anything you want it to activate. In this example, connecting it to the explosives and Shardinators allows it to become a Pumpinator puzzle like many found in the main story.

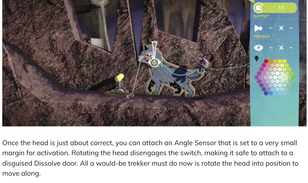

Angle Sensor

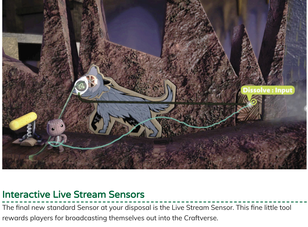

Moving into the next cavern, the way once again seems impassable, with the path ending at a waterfall. Not so. By using an Angle Sensor, you can clear the way to the hidden bridge behind the waterfall.

The silver wolf is the key to the chamber. Its face is attached to a motor bolt. Connect this to a 3-Way Switch. With a few simple Tweaks, you can pivot the head clockwise or counter-clockwise.

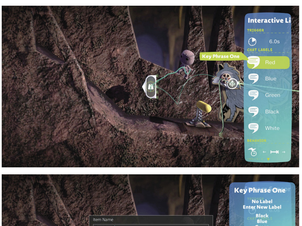

Once the head is just about correct, you can attach an Angle Sensor that is set to a very small margin for activation. Rotating the head disengages the switch, making it safe to attach to a disguised Dissolve door. All a would-be trekker must do now is rotate the head into position to move along.

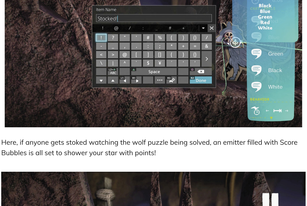

Interactive Live Stream Sensors

The final new standard Sensor at your disposal is the Live Stream Sensor. This fine little tool rewards players for broadcasting themselves out into the Crafterse.

In the Tweak menu, you can track up to five phrases from other LittleBigPlanetonians watching the stream. These correspond to the five outputs on the Sensor. Whichever phrase is trending highest actives its output. This is great for giving bounces to fan favorites in a racing level, or setting different paths based on watcher choice. For this little level, though, you are going to use it to reward your sack person for having someone care to see what is happening at all.

Here, if anyone gets stoked watching the wolf puzzle being solved, an emitter filled with Score Bubbles is all set to shower your star with points!

The Live Stream Sensor also has inputs for resetting the counters, or for activating/pausing it at different stages of the level.

Create: What's New And Shiny

Logic

Logic instruments are at the core of how things behave in *LittleBigPlanet 3*. From the waterfall bridge, head deeper underground to see how you can add a little atmosphere with the newest addition to this tool set.

Wave Generator

As you descend deeper and deeper into the cave, the light fades. Fortunately, this basin is home to phosphorescent fungi. One appears to be loose, and it is needed to light the way ahead. To make the upcoming platforming section a little more challenging, add a Wave Generator into the mix, and attach it to all of the fungal lights. Set each light's Input Action to Dimmer. With a few more simple modifications to get the timing where you like it, each light now pulses in the darkness.

Create: What's New And Shiny

Movers

Dropping the fungal lamp and heading back up to a more well-lit section of the caves leads to a interesting challenge area involving Movers. There appears to be a gas leak, so it's best to get out of here fast.

Advanced In/Out Mover

With so many more layers to play with, the Advanced In/Out Mover really helps manage moving objects forward and back. Here, one is being used in conjunction with several other tools to permit a gem cart to pass over a gaseous hazard.

JUST WHAT MAKES THIS ADVANCED?

What is so different about the Advanced In/Out Mover in comparison to the original? What did it do to earn the plus symbol in the upper right? Well, quite a lot, actually. First off, it lets you define the frontmost and the backmost layer an attached object can transition between. It also offers two input options. One permits a standard On/Off trigger with advanced settings related to strength and speed. The other input allows for either a Positional trigger or control over the Directional Speed.

In this instance, the Input is set to Positional, allowing the connected object to slide forward to its most advanced position upon being triggered.

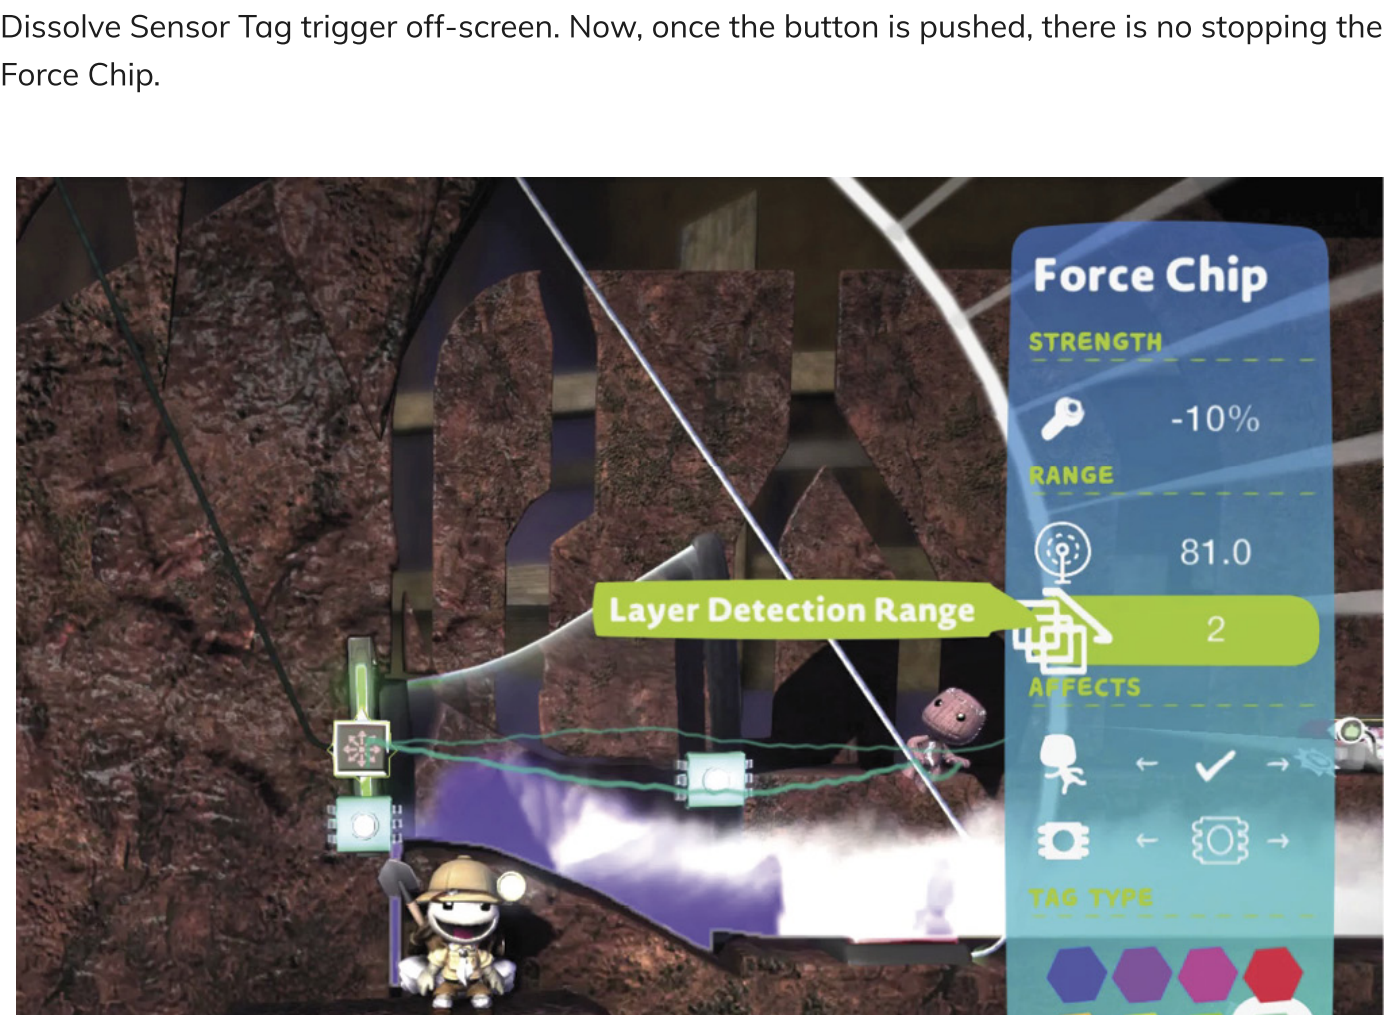

Force Chip

The Force Chip is a very, well...forceful item. It has the power to repel or attract. On the other side of the gas, a second miner is happy for your sack person to use the vacuum system they set up for gem extraction to start the trek back to the surface. To set this up, an Acrylic Tube is used as the start of the vacuum.

Pulling back the wall cover, a Force Chip is placed at the end of the tubing. Tweaking its strength to a negative setting changes it from a repelling force to an attracting one, drawing any sack being or object into its pull. To trigger this reaction, a button is placed within the chip's area of effect. The goal is to turn the chip on and keep it that way, so the button is attached to a Dissolve Sensor Tag trigger off-screen. Now, once the button is pushed, there is no stopping the Force Chip.

Okay, your sack person is in the tube, so where are you taking it? To answer that question, you will return to this area shortly in the Getting Around segment to come. For now, on to the Tweakers!

Create: What's New And Shiny

Object Tweakers

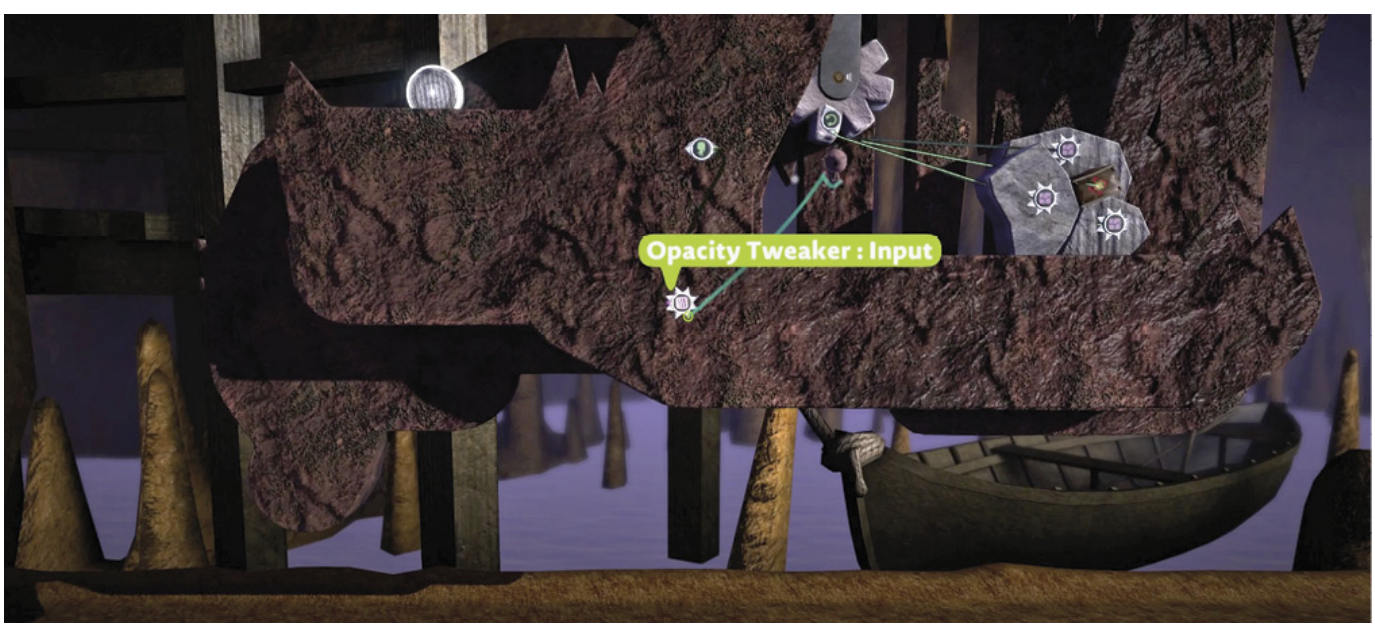

To change the properties of an object is to truly take command of the Craftverse. Head back to the beginning of this level to see just how useful these tools can be.

Opacity Tweaker

It is often the case that visibility gets in the way of design (like here, for example). This little section is fine, but wouldn't it be nice to see your sack person run through that first segment of cave, or to add a few stalagmites to the foreground? Well, you can do so with the Opacity Tweaker, the perfect tool for when you want something and also want to see through it.

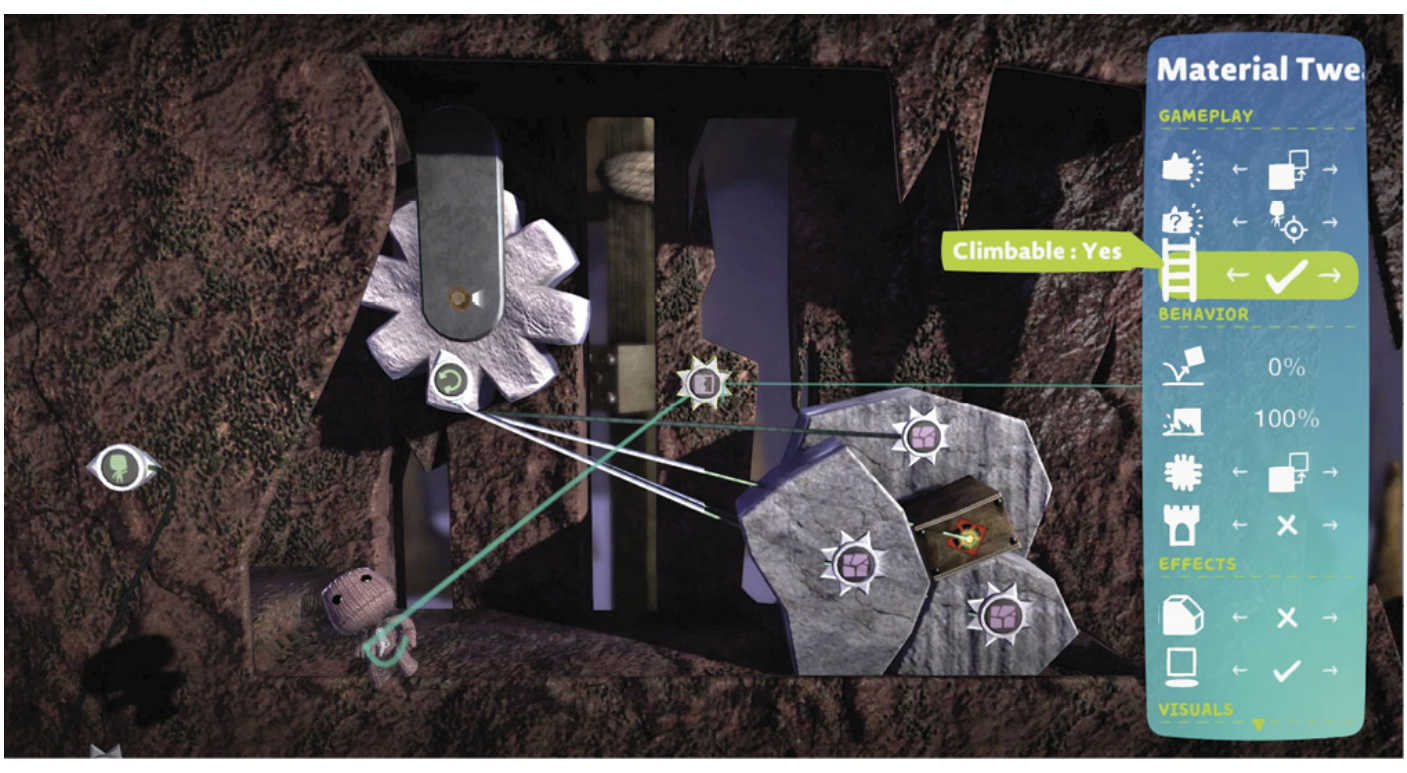

To refine this tool, use a Player Sensor to activate transparency only when it is needed to see the action behind the object.

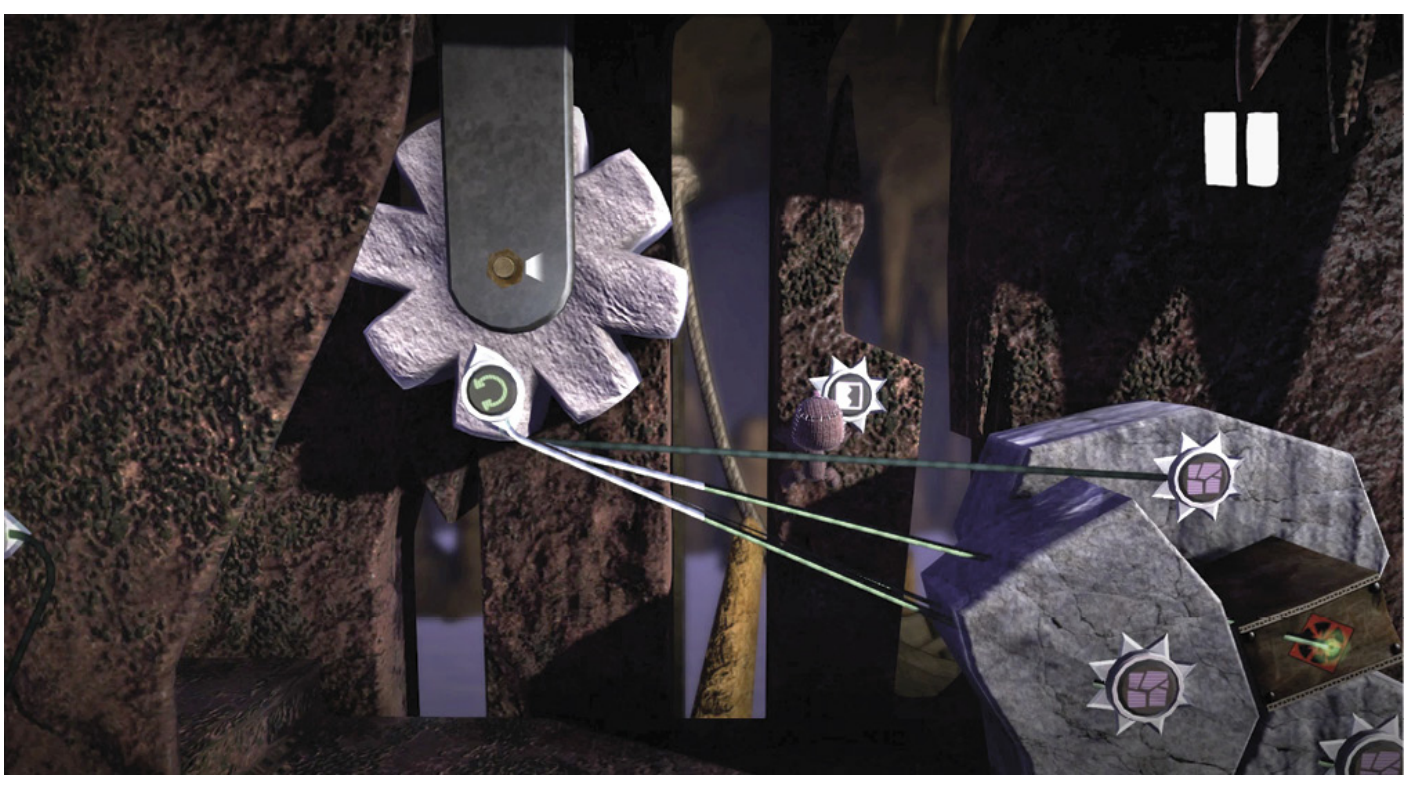

Material Tweaker

Sometimes, you find yourself in the position of having a specific material in mind for the aesthetics of a level, but that material does not have the property you are looking for (such as being climbable or grabbable). But worry not — the Material Tweaker is here to help! Place this able attachable to literally any material, and you have the power to make it behave like any other material.

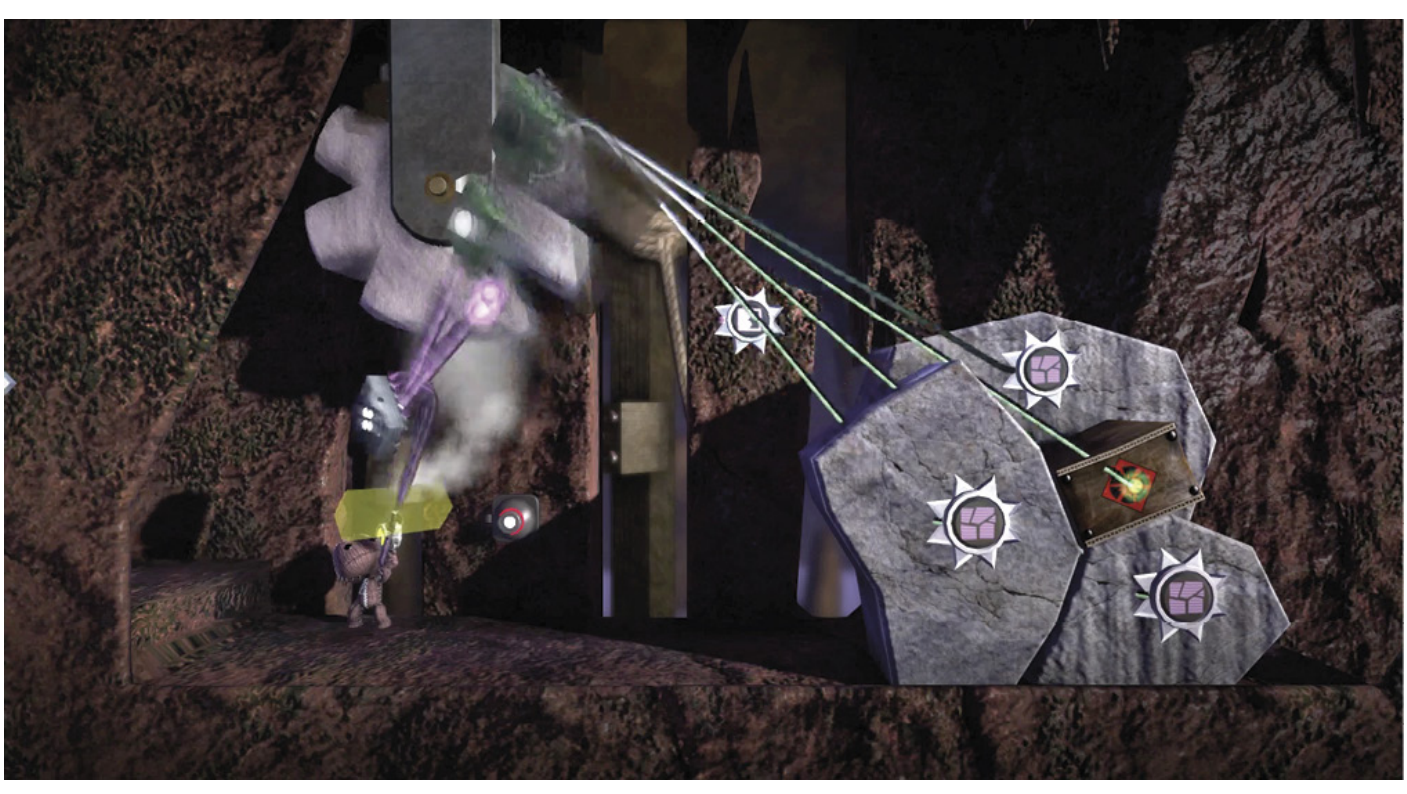

For an Easter egg, the back wall of the entry cavern is now climbable, so your sack person can progress without using the explosives.

Shardinator

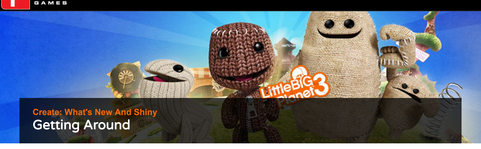

You have already seen the destructive power of the Shardinator. Once triggered, it turns whatever it is attached to into fractals. Give the trigger another blow to see that blast again.

STAYING TOGETHER!

A unique feature of the Shardinator is that all the segments of a shardinated material stay connected as the same object, despite acting as individual elements in gameplay.

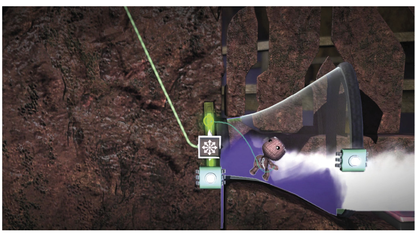

Getting Around

As awesome as it is to have 16 layers to jump around on, sack people often need a little help from the level itself to get from place to place. The Getting Around tools are here to help with precisely that.

Velociporter

Returning to the Force Chip vacuum, you can now see how your sack adventurer can move on into another segment of the cave. The Velociporter transports any character that enters it to a corresponding Velociporter placed anywhere else in the level. These transporters are color-coordinated, just like Sensors.

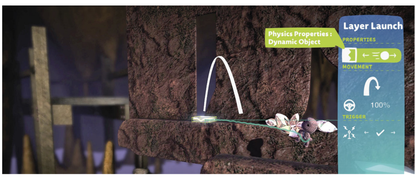

By placing segments of tubing in stone and putting corresponding Velociporters at either end, the illusion of traveling through a series of tubes is created before they drop your sack person out into a new cavern.

Layer Launcher

Much like the Bounce Pad, the Layer Launcher gives sack people a little boost, but these fine flingers can put you down almost anywhere on demand. Just pop open the Tweak menu to set the landing zone, and your next flight is ready for takeoff.

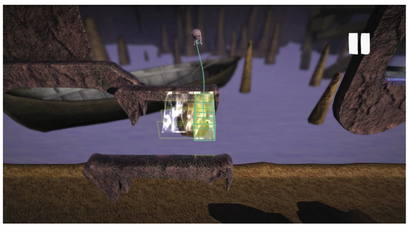

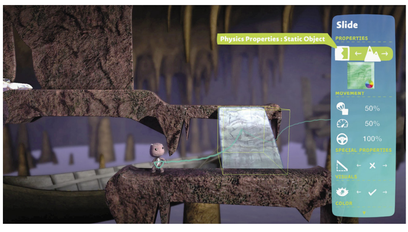

LET IT DRIFT

The Air Steering option in the Tweak menu sets the degree to which characters in motion have autonomy over their flight plan. 100% gives them as much pitch and yaw as with a jump. 0% places them down exactly where the Layer Launcher is set to. The best choice depends on the needs of the level.

Slide

As the "stylish way for characters to travel," slides do just what you expect them to: create a slide. Lay them down just like any other material, and the slide creates a diagonal plane from the backmost layer of the object to the frontmost, connecting one plane to another with slippery fun. Once down, the Tweak menu allows the slide to become any material.

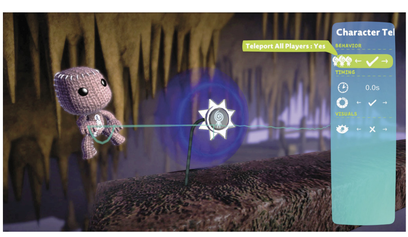

Character Teleporter

The first and last stop for any instantaneous traveling has to be the Character Teleporter. Its ability to snag players from anywhere and bring them to it is second to none. Plop down a Character Teleporter, and get ready to be anywhere instantly (so long as your definition of "anywhere" is limited to within the same level, exactly where you plopped down the Character Teleporter).

By placing a Character Sensor on the Throbbing Bubble effect and then connecting it to a Character Teleporter on a differently colored Throbbing Bubble in the new play area, a cool visual transition is created for the teleport. It also provides a good excuse to use the Throbbing Bubble effect, which is not always easy to come up with.

Now, step inside to see where it leads.

Create: What's New And Shiny

Spawning and Ending

Spawning & Ending makes it sound so official—so beginning and end. But this section of the Popit really does have much to do with all of the wonderful things in the middle. It looks like the last Teleporter has taken you somewhere to learn all about this.

Character Changer

They say it takes a village to raise a child, and in *LittleBigPlanet 3*, it often takes more than one kind of adventurer to finish a level. That's where this doodad comes in. Plant it down to give players the ability to swap in Swoop, Toggle, or Oddsock, or swap back to their sack person. You can even use it to let you *toggle* between two character types, like in this example with Toggle and Swoop.

The Character Teleporter has taken you to a place from which no sack person could escape. Fortunately, it seems like a trivial matter to fly out or shrink down and squeeze through.

Progress Board

It might seem like just a less bulky Scoreboard, and it is in fact that, but the Progress Board can do a few things that the big old Scoreboard cannot: namely, show your progress.

Slap one of these into your levels when you want to end it or link to another level without all the pomp traditionally associated with level endings. Or, use it as shown here to give players an idea midway through of how they are doing by showing their progress on all level completion criteria.

BE WHO YOU WANNA BE

In addition to the new tools, the Tweak menu of the entrance has also been expanded to define which character is spawned at the start of the level.

Create: What's New And Shiny

Points and Prizes

Now it's time to get to the core of what pushes so many so deep into an adventure—the points! The novel additions below can push players to not just enjoy your levels, but strive to master them.

Collectabell

As you know, Collectabells are the new collectibles that everyone must have. The old expression "you can't take it with you" no longer applies. Collectabells can only be acquired once, but once you have one, it is yours forever. These are special gifts, so as you place them in your levels, be conservative and make them challenging.

Look back at the Layer Launchers, which were set to give sack people full Air Steering. There is a second set of platforms just below the visible range for the adventuresome who don't mind a spill or two in poisonous gas to uncover secrets. This is the perfect home for a Collectabell!

Collectabells also allow you to adjust their value and color, so reward appropriately, and color thematically.

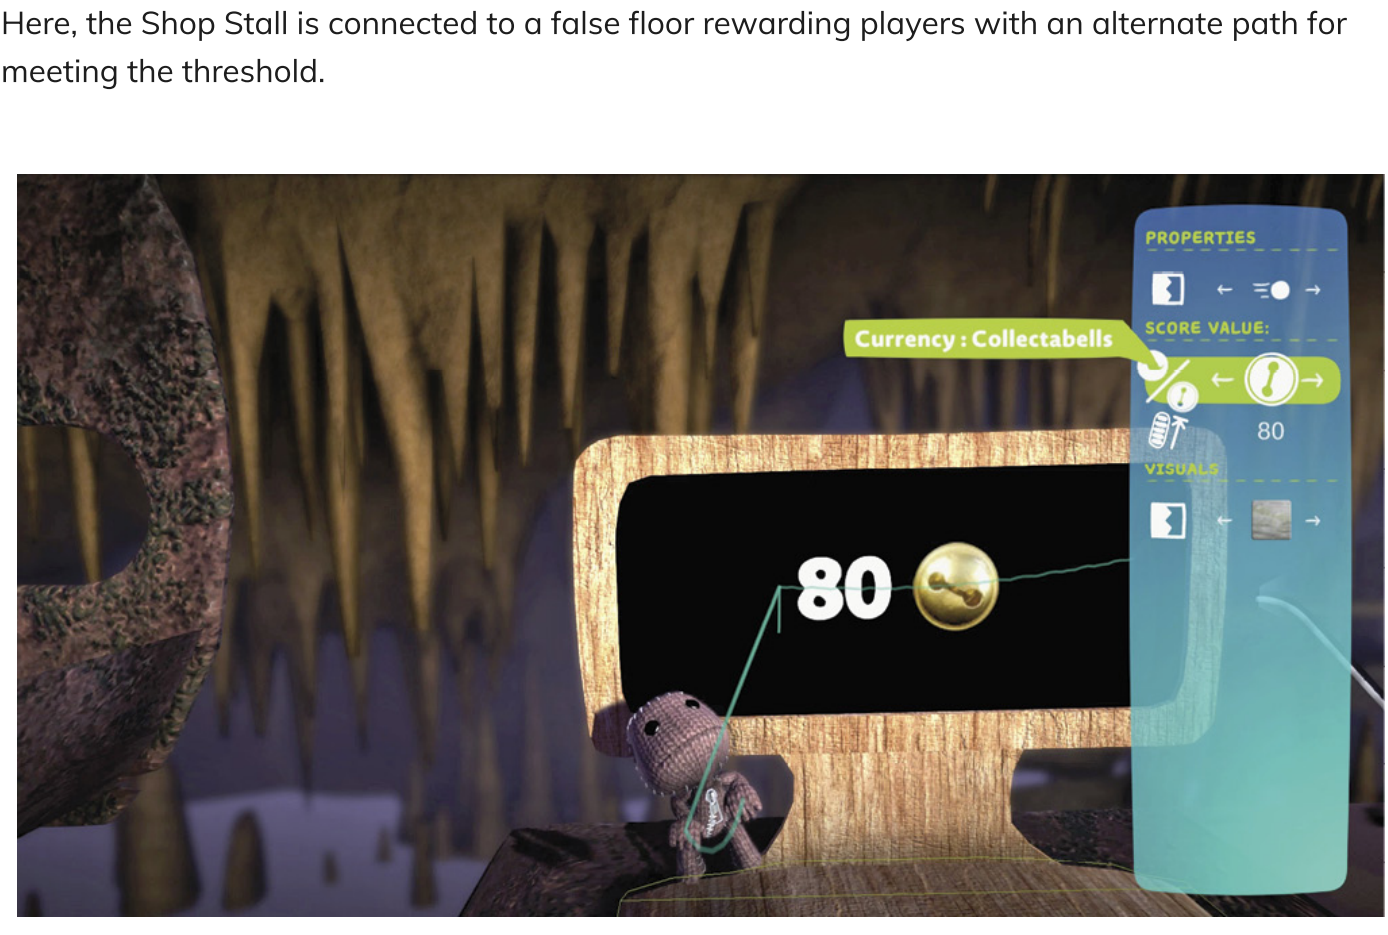

Shop Stall

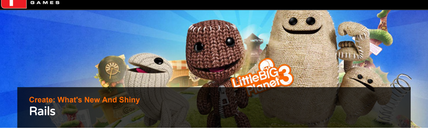

The Shop Stall is named a little deceptively. It is not selling you anything, nor does it itself hold any goods. It is, however, a great tool that has a lot of uses. It tracks your score (in either Score Bubbles or Collectabells) and activates like a Sensor when a character in your levels meets the threshold.

Whatever it activates is up to you. It can open a door, grant access to a bonus level, or dole out prizes.

Here, the Shop Stall is connected to a false floor rewarding players with an alternate path for meeting the threshold.

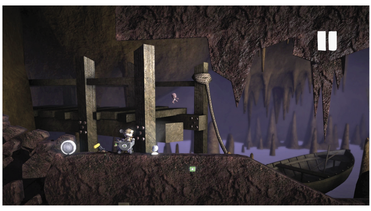

Create: What's New And Shiny

Rails

Who can deny the allure of a rail? From the mystique of the monorail to the adrenaline of a rollercoaster, these fine tools dappled throughout the Popit help sack people and objects alike travel in style.

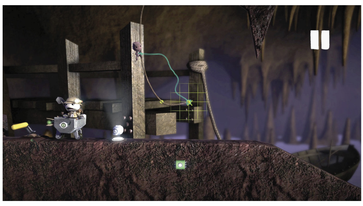

In this little tutorial, the secret passage has led to a runaway mine cart. Your sack person must keep up if there is to be any hope of saving the wayward spelunker.

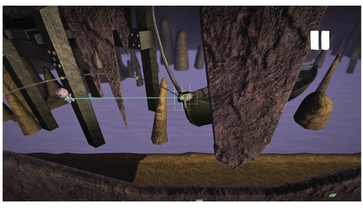

Bendy Rail

The Bendy Rail is the only rail by which the discerning sack folk get around. Find it in the Connectors segment of your Tools bag, and tap ✕ to plant down the first segment. Move along, tracing the path of the cart. Each tap of the ✕ button plants a pivot point from which you can bendthe Bendy Rail. L1 and L2 function much as they do when working with materials, toggling the end point of the rail between layers. Try moving the rail up and down a little, and possibly even navigate it around some obstacles. Use ● to complete a track segment.

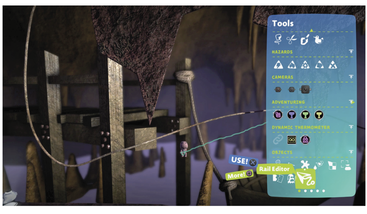

Remember, you can control the type of traffic you want to manage from the Tweak menu. Any rail can be made to support the Hook Hat, Rail Hook, both, or neither.

Rail Editor

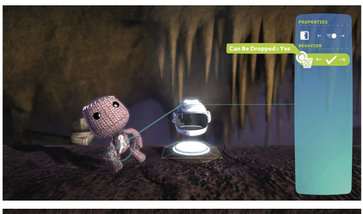

Much like the Corner Editor, the Rail Editor allows you to go back into a previously laid rail and refine its shape and path. Try using it to add a few more layer changes to your rail. The controls are the similar to the Bendy Rail, but here, you can also use R1 and R2 to skip between pivot points.

Hook Hat

You can find the Hook Hat with the rest of your power-ups. This fashionable helmet looks good anywhere, from outer space to this deep mine. Placing the power-up on the path grants any sack person passing through access to the Hook Hat just by stepping over it as in the main game. It also provides a good visual cue to let players know what to do with the rail.

Hook Hats have a simple Tweak menu that allows you to make them Static or Dynamic objects, as well as the option to give sack people in your level the ability to drop the item or force its inclusion after pickup.

Rail Hook

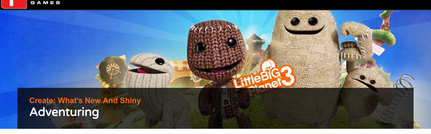

When you would like a little more control over the conveyance or want to transport something other than your sack person sporting a Hook Hat, then the Rail Hook is the tool for you. Found next to the Bendy Rail with your Connectors, the Rail Hook is exactly what it sounds like.

Once attached to your rail, you have a lot of options for how to use it. You can attach anything to it via glue, and it has connector ports to allow for easy control via switches or Sensors.

By gluing on a grabbable material like a sponge and attaching a Grab Sensor, this example keeps things very simple. Use the Tweak menu to motorize the hook and set a good pace under the speed settings (nothing too outrageous). You can leave the Input Action on its default, On/Off. Now, much like with the Hook Hat, your sack person can easily keep up with the runaway mine cart as it barrels toward another hidden Velociporter.

Why only go from point A to point B when there are so many delightful letters in the alphabet? The apparatuses in the Adventuring section of the Tools bag help with precisely that. With their assistance you can guide questing sack folks to exotic locations like point Q, or even the remote and stunning point Z.

ONE NEEDS A QUEST TO GO ON AN ADVENTURE

All the tools in the Adventuring category rely on the existence of a quest to go adventuring on. If you have not used the Global Stuff menu to create your first quest, do so now.

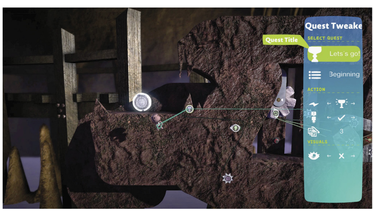

Enter Global Stuff in the Popit, and head to the new Organizertron section. Here, you can Add a Quest. The excitement abounds — just what is to be your very first adventure? Once a quest is added, you can update its title and description, add a variety of objectives, and add some custom prizes or dependencies — not to mention test it out. Try some experimentation with the settings to get your quest just the way you want it.

Whether you have an epic path all planned out or just want to test the tools, go ahead and get at least one quest at the ready before heading back to the Tools bag.

Quest Tweaker

The Quest Tweaker is as important to any adventure as the expression "and then." This handy little tool marks off the progress on your quest and its objectives. Returning to the cave entrance, you can use the Quest Tweaker to both activate your current quest and mark off its first objective, "Beginning." This Tweaker is attached to the Player Sensor that triggers the wall transparency, so starting the level also starts the quest progress. Moving ahead in the level, you find an appropriate place to complete the "Beginning" before placing the next objective's start point.

The vacuum is a grand place to designate the "Middle" of your journey. You can do so with the push of the Suction button.

Save the final "End" markers for the section leading up to the Scoreboard.

Quest Sensor

Like other Sensors, the Quest Sensor is looking for something. A Sticker Sensor longs for its match, a Player Sensor just wants someone near it, and the Quest Sensor is always on the hunt for experience.

By creating a new objective ("Side Quest") in your current quest, a fourth Quest Tweaker is set under the secret passage with the runaway mine cart.

A Quest Sensor is now placed at the end of the level. If future players complete the extra challenge, they are rewarded with bonus Collectabells at the end of the adventure.

Quest Marker

What good is going on a grand quest if you have no idea what to do? That is why the Organizertron was invented. These markers show the way when "Guide Me" is on.

Sometimes it is not enough only to tell players what their objective is and when they have reached it; they might need a little help discovering how to get there. Because objectives are also often points of transition, it is sometimes good to know what you are getting into.

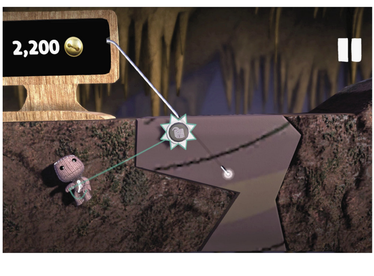

As soon as your sack person activates the vacuum, there is no going back, so putting a Quest Marker on the button gives players a subtle hint that they should be sure they are done here before pressing it.

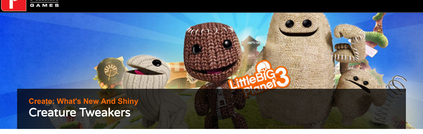

Object Saver

The final tool to be found in the new questing kit is the Object Saver. This little number can save the state of an object between play. Think of any of the Hub levels, where once you have cleared a path, it is clear. Or consider Joust in Time, where your previous build is always at the ready. These level elements exist thanks to the Object Saver.

In this level, the threshold for getting into the bonus quest area is very high, so the dissolvable floor is stuck with an Object Saver. Now, after the first time the path is cleared, players can return to try again regardless of their score.

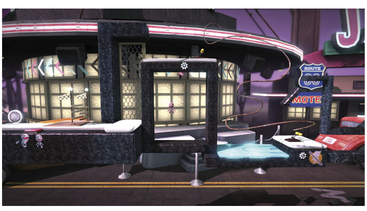

Create: What's New And Shiny

Creature Tweakers

Reality is simply what we make of it. This holds true in *LittleBigPlanet 3*, even more true when creating a level, and even truer still when using the Creature Tweakers within that level.

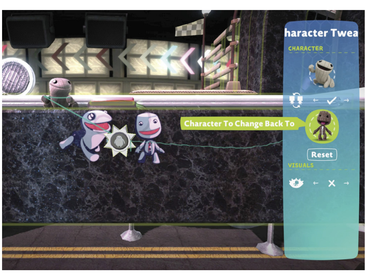

To investigate all the ways you can configure creatures, you must jump over to a new level. Because you have been underground so long, Manglewood seems like a good place to get some sun.

In the short challenge demonstrated here, you are breaking the very laws of physics in order to win a race.

Character Tweaker

To start things off, either your sack person or Oddsock can run this race. Using the Character Tweaker, players can push a button at the beginning of the race to switch back and forth. Placing Starting and Ending gates down also ensures that no one gets a jump until everyone is ready.

Sackpocket Tweaker

As you move into the challenge, your sack person can climb up the first obstacle, but Oddsock must wall jump. At the top landing, Oddsock is presented with another wall jump challenge, while your sack person (retaining the power to grab) can use the switch to automatically equip a Hook Hat. How do they do this, you ask? With the Sackpocket Tweaker, which gives you the power to grant and take Sackpocket items!

With all of these tools, be mindful of the Effects section, which controls who gets what when the Tweaker is triggered.

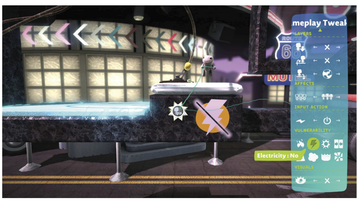

Gameplay Tweaker

So long as Oddsock made his jumps, he has a hilly, high road to navigate. When your sack person makes it to the lower Bendy Rail landing, they find another switch. When pulled, it protects them from the electricity to come.

Again, this is thanks to a Creature Tweaker. The Gameplay Tweaker lets you affect nearly any element of the game's mechanics and bend it to your whim. Here, it is set to grant any creature that pulls this switch immunity to electricity.

To up the ante, add a Timer into the mix to ensure that only fleet-footed sack folk make it though.

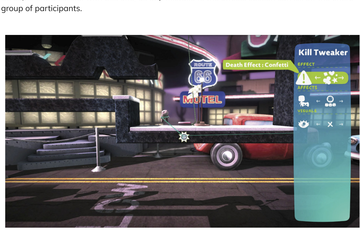

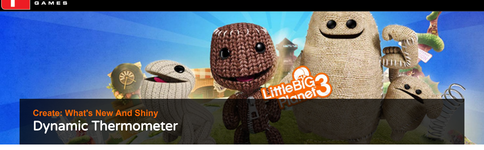

Kill Tweaker

The final macabre entry in the Creature Tweakers section is the Kill Tweaker. Using this tool, you can make it so only the victorious can cross the finish line. With the touch of a button, all other players are popped into confetti!

Be super extra careful with this one, as any mistake to the Effects section can kill off the entire group of participants.

Create: What's New And Shiny

Dynamic Thermometer

Since the dawn of *LittleBigPlanet*, there has been but one obstacle to the creative vision of creators: the size of the page they have to work with. While an infinite canvas is still not possible, the Dynamic Thermometer option in the Global Stuff section of the Popit has moved everyone one step closer.

When switched to a Dynamic Thermometer, preloaded content is limited to objects in and around a given view area, allowing creators to fit a lot more into a level. This is because the whole thing no longer needs to be loaded the entire time. The tools below help manage this process to ensure that everything runs as planned.

Just look at the difference in the Thermometer on the challenge you are working on!

LOADED UP!

Once the Dynamic Thermometer is active, its Global Stuff menu has a few settings to help you manage the process even before heading to the tools.

Loading Zone Shape determines the default perspective of the loading area. For most levels, the Regular rectangle is the best bet, but if you are building up rather than over, then Tall might be the answer for you.

Similarly, the Loading Zone Size must be considered on a level-by-level basis. If you are going for tightly packed complexity, then Large won't hinder you significantly while building. However, your overall level cannot sustain as much, and it may even require mid-level loading. With Small, the inverse is true.

Loading Linker

The Loading Linker slaps down like Advanced Glue. By hovering over any object with the Loading Linker, you can see which grouping it loads in with. Stick this to several items in an area to make sure they are all part of the same group. This is especially important if a few complex/timed items are located near one another.

Preloader

The Preloader works in conjunction with the Loading Linker. The Preloader has settings similar to the Game Camera. Using the Preload Zone, you can designate an area to be loaded in once the Preloader has been triggered.

For instance, say you have a Player Teleporter set up to take players a good distance from their starting point. Plop one of these down nearby to get the new area prepopulated before the Teleporter is trigged. Or maybe you just want to make sure there are no hiccups or loading breaks in a fast-moving race? Either way, this tool has you covered.

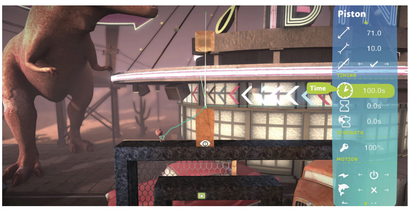

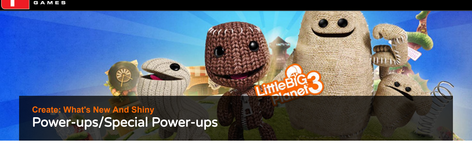

Permanency Tweaker

The final object in this small set is the Permanency Tweaker, useful when something absolutely, positively has to be there. Place one of these on anything, and it is loaded in no matter what.

In this example, you see a door slowly closing on a prize room before the Scoreboard. A player must get here before the door shuts in order to get the goods, but it only works if the Timer starts from the beginning of the level.

Create: What's New And Shiny

Power-ups/Special Power-ups

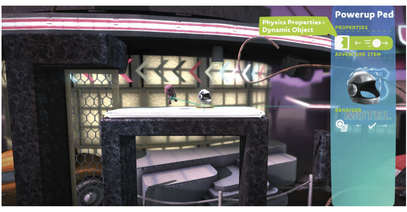

There was once a time when running, jumping, and grabbing were all an honest, hardworking sack person needed to get by in this crazy, mixed up LittleBigPlanet. Nowadays, if you want to make it to the end of a level, a power-up is often just the thing to add the extra oomph required for a healthy trip to the Scoreboard.

The Rail Hook already helped you in your short adventure back at the cave. Now, you'll see how some of the other power-ups can benefit progress.

Sackpocket Pedestal and Powerup Pedestal

These two power-ups consolidate all the new Sackpocket powers in a set of potent tools. The primary difference here is access. The Sackpocket Pedestal puts the power-up in your sack person's Sackpocket, whereas the Powerup Pedestal only supplies the instrument for the instance it is required. Either way, you can also equip custom power-ups made with the Blaster Handle.

Here, you can swap out the Hook Hat Sackpocket Tweaker switch with a standard Powerup Pedestal, since it is only required once in the challenge race.

Blaster Handle

There are some amazing power-ups available to the knit-clad travelers of LittleBigPlanet, but the best of them all may still be to come since you have not made it yet. The Blaster Handle lets you create custom power-ups and distribute them via Pedestals.

You can do this by placing the Blaster Handle on any item you want to convert into a power-up. Once done, the Tweak menu allows for many in-game features to be set, whereas the actual properties of the power-up are set in the microchip emanating from the Blaster Handle.

In this example, there is an anti-electricity wand fueled by a Gameplay Tweaker. Placed in a Pedestal, this power-up can now replace the electricity invulnerability switch at the base of the Bendy Rail segment. Now, rather than flipping a switch, sack people that pass are rewarded with a handy new item.

Popit Power

Outside of the power-ups you have yet to invent, the most awe-inspiring power-up might be the Popit Power. This tool lets you bring the power of Create Mode into gameplay. But, as some dude's uncle once said, "With great power comes great responsibility." This tool quite literally has the potential to tear your levels apart, so be careful what you let players do with it.

By expanding the level a bit, you can add race alternatives for all four adventures. Rather than give each a button, use the Popit Power to let players connect the available buttons to the hero of their choice.

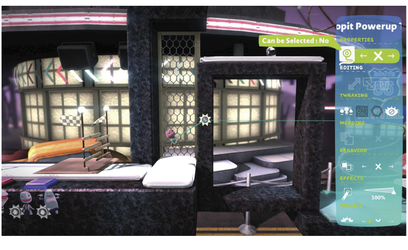

For this example, only the Popit Cursor is made available, but the full range of Popit Tools and Goodies can be activated from within the Tweak menu.

Popit Powerup Tweaker

Even with just the most minimal tools made available, there are still a lot of options when you open up the Popit. The Popit Powerup Tweaker works to try to help direct creative tool use toward your level's needs, rather than another's destructive desires. When placed on an object, the Popit Powerup Tweaker determines which powers create tools have on it in Play Mode.

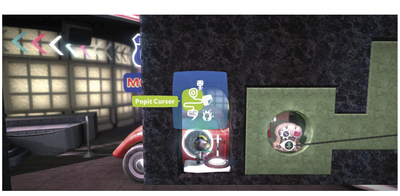

By placing this on one of the level elements and making it non-selectable (while also selecting the use of a Rigid Connection), this object and all those glued to it are no longer affected in Play Mode.

Popit Cursor Sensor

This Sensor works much like a Grab Sensor, but rather than looking for the plushy squeeze of a sack person, it is set to detect the ethereal embrace of the Popit Cursor.

To demonstrate this handy tool, da Vinci has been equipped with the Sensor and is ready to help. As soon as he is selected, the Dissolve all around him dissolves, and the walls electrify. It is up to you to guide him through the maze with the Popit Cursor for some fabulous prizes.

Create: What's New And Shiny

Creature Sensors

A few novel Creature Sensors have also been added to the bunch. With these at your disposal, your level of detection is really very extraordinary.

Sackpocket Item Sensor

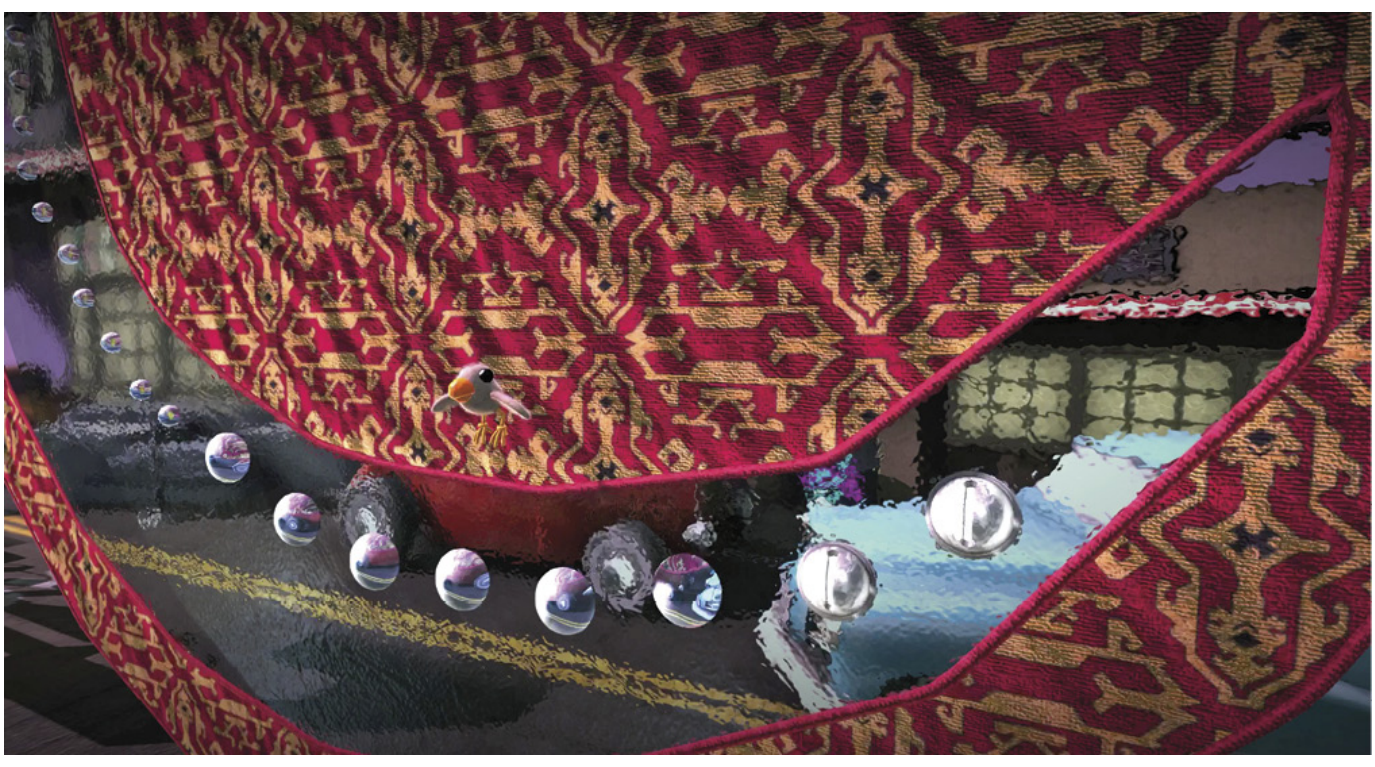

Returning to the race challenge, you decide that there really is no reason to let a helpless sack person shock themselves to the point of popping. By placing a little blockade that can only be removed if the passerby is equipped with the custom Shock Absorber power-up, you can save countless millions from an electrifying end.

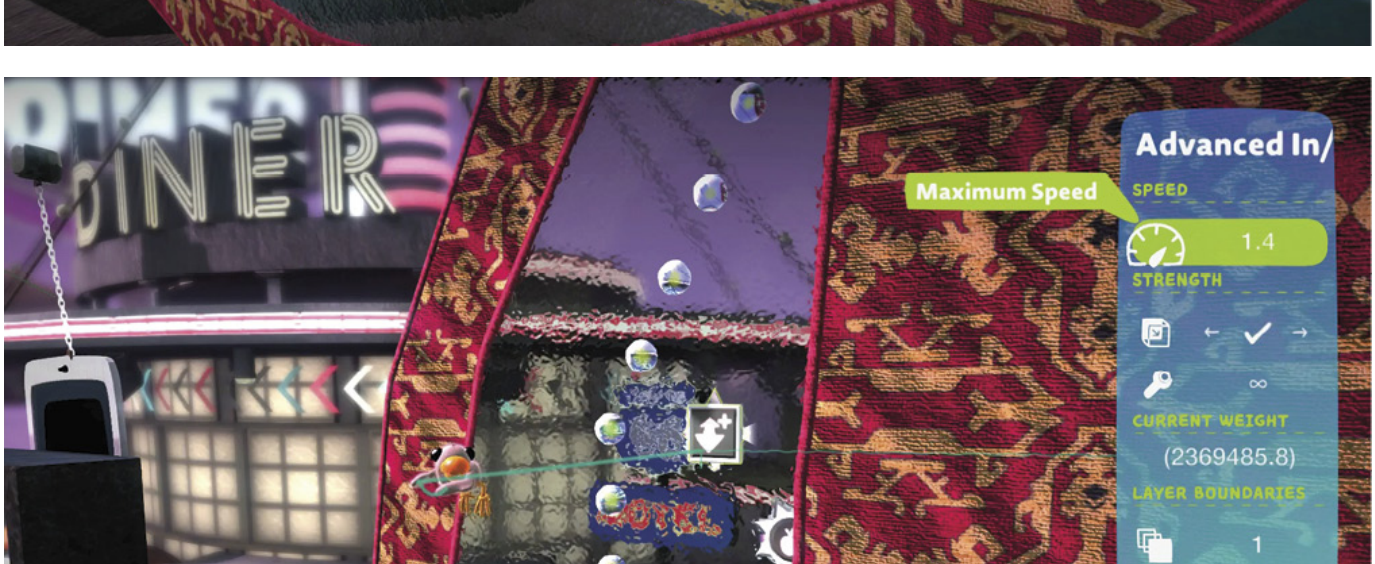

State Sensor

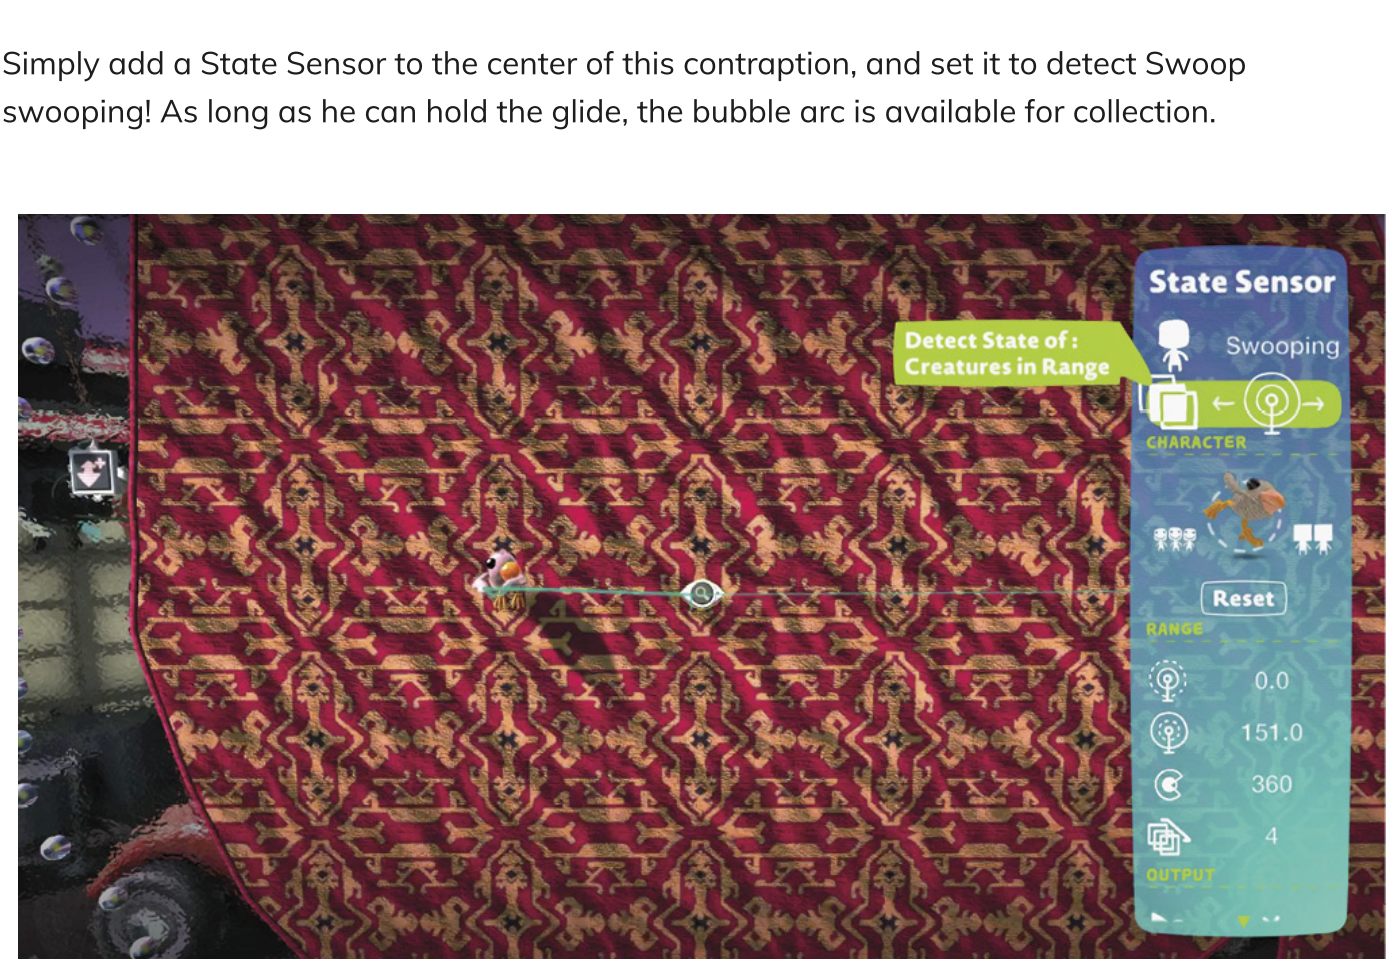

In the area of specifics, the State Sensor reigns supreme. From standing to sneaking, from walking to running, from jumping to falling, from grabbing to... well, you get the point, this Sensor can sense which character you are and exactly what you are doing.

By creating two large circles out of any material (one flat and one a single layer), you can make a fun challenge for Swoop. Cut a crescent from the front segment, creating a window to the back. Glue Score Bubbles, followed by Prize Bubbles, and finally a few Collectabells onto the back element following the arc. Using the same technique as with the gem cart in the cave, an Advanced In/Out Mover and an Anti-Gravity Tweaker can be used to move the now bubble-adorned back circle between layers.

Simply add a State Sensor to the center of this contraption, and set it to detect Swoop swooping! As long as he can hold the glide, the bubble arc is available for collection.

Create: What's New And Shiny

Animators

As long as you are in Manglewood, you should make a little movie. And like all good shows, this one is ending with a big musical number. Thank goodness these bakery-fresh Tweakers are hot off the rack and here to help. It's time to bring out a few of the Creator Curators who have been so helpful in the story to give you a hand in this last segment.

Character Rotator Tweaker

To start with, you need a big opening. The spotlights are set and the fog is rising, but if this is going to be really dramatic, these Creators are going to have to show off some superstar signature moves. They should start facing away, and then turn to the audience in a charismatic twirl.

The Character Rotator Tweaker is just the thing to help. Try it out on Marlon. To start, open his Sackbot Circuitboard, and place a Rotator Tweaker on it.

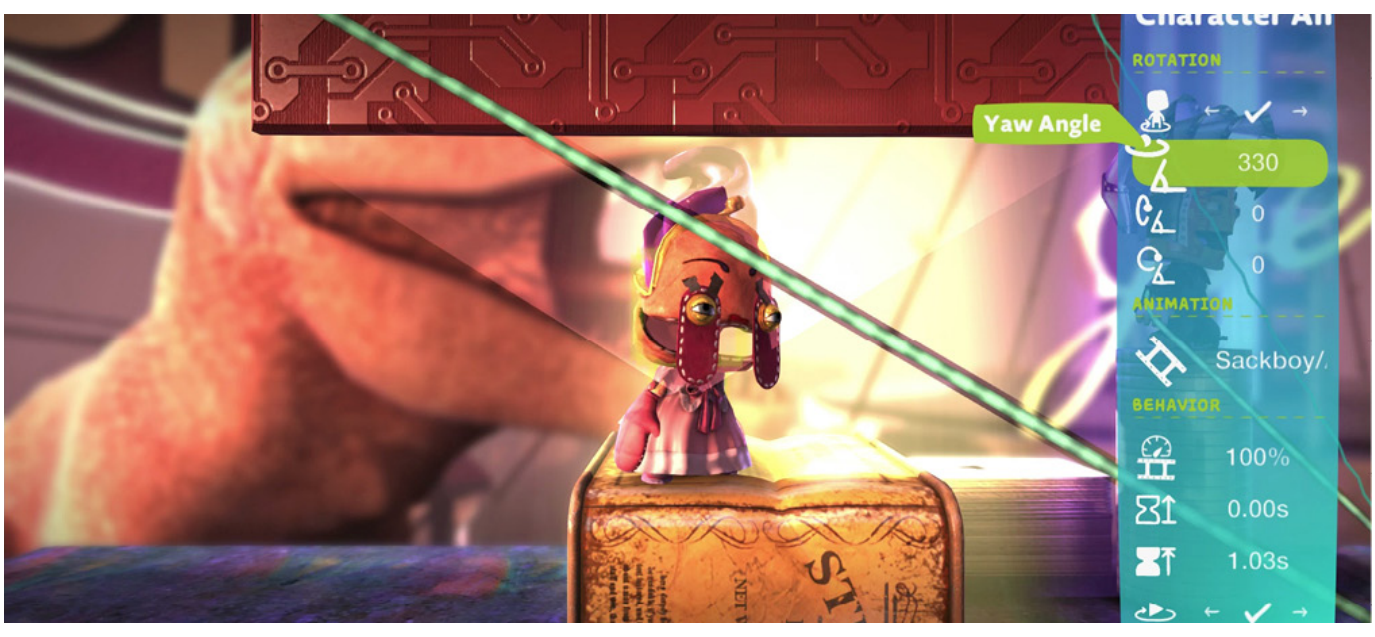

Okay, now that he is spinning, what you need next is control. By attaching a Player Sensor to center stage and adjusting the Character Rotator Tweaker, Marlon does a nice double take spin when your sack person enters.

Character Animation Tweaker

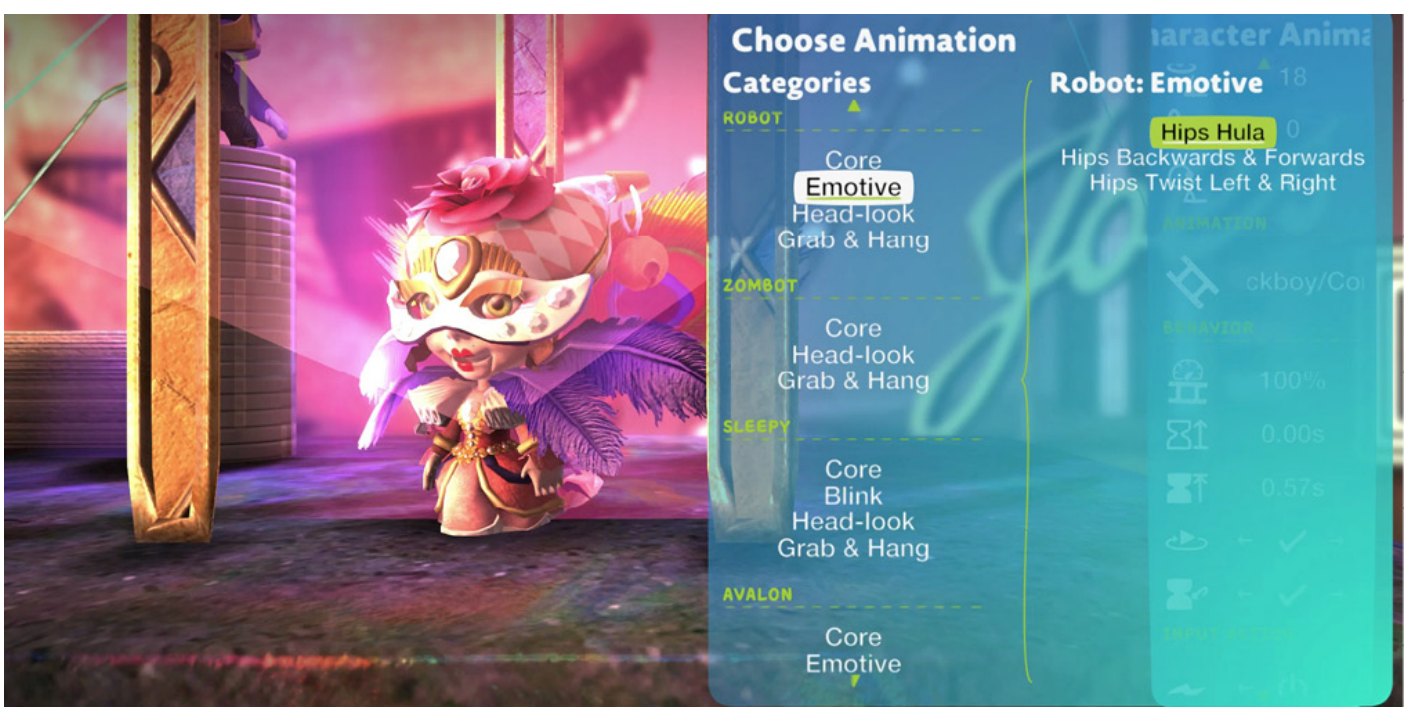

Now the music is pumping, so it must be time for the big dance number. That means the time to use the Character Animation Tweaker has finally come. Opening the Sackbot Circuitboard for both Nana Pud and Pinky allows you to place Character Animation Tweakers on both of them. Connect the same Player Sensor to all of them once they are down.

You can adjust the Yaw Angle so that they pivot in toward your sack person once in center stage.

Now, use the Animation option to pick a good dance move from the many choices.

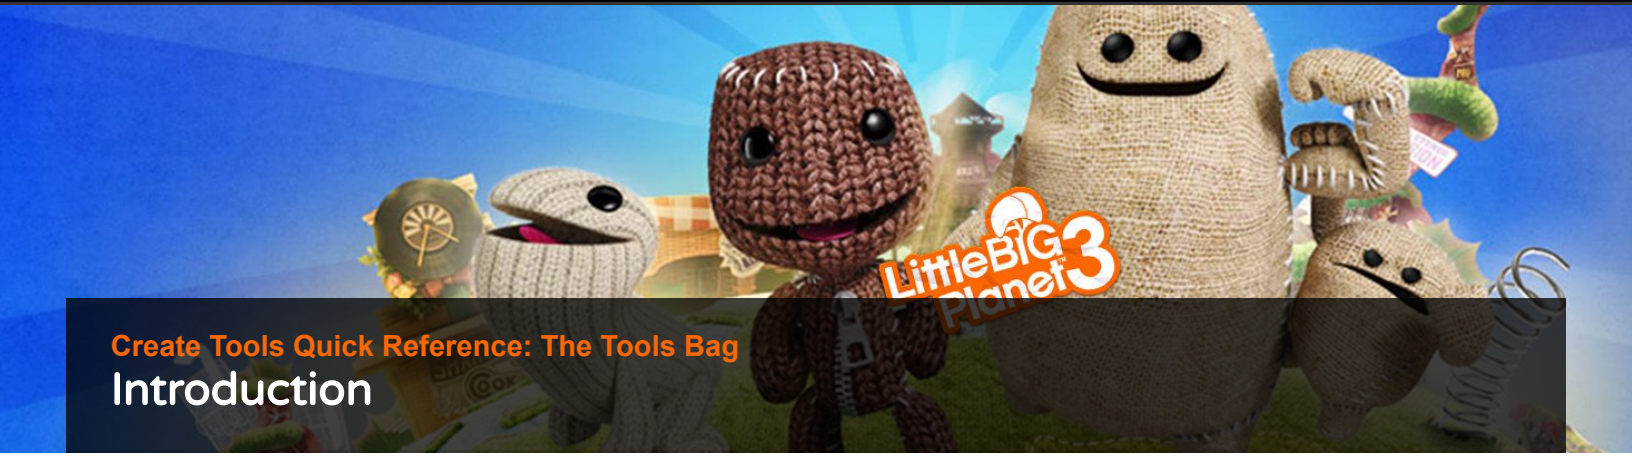

Create: What's New And Shiny

Go Forth and Make!

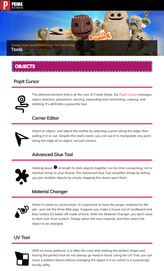

You are equipped with the basics, you know the new tools, and you have tables upon tables of Tweak menus — it's time to get building! What you have seen here and in the main game is just a taste of what is waiting for you. The edict has never been more true: it is time to Play, Create, and Share!

Create Tools Quick Reference: The Tools Bag

Introduction

Go ahead and dog-ear this section immediately. As you enter the wonderful world of creation, the last thing you should be hampered by is trying to remember what does what and how. This chapter offers a simple breakdown of every Create Mode doodad and bobble. Each entry covers how an item can be used and how it can be tweaked. Think of it as offline storage for your bustling brain!

OBJECTS

Pupil Cursor

The ethereal element that is at the core of Create Mode, the Pupil Cursor manages object selection, placement, resizing, expanding and contracting, copying, and deleting. It's definitely a powerful tool.

Corner Editor

Select an object, and adjust the outline by selecting a point along the edge, then pulling it to an ideal position. This tool gives more choice out of uniformed quad tiles, and can be used to create more unique shapes.

Advanced Glue Tool

Holding down ⇧ or right-click on any object to together out to free constructing, not to be confused with the regular glue tool, which simply stacks the object on top of another. This tool is for creating more unique shapes.

Material Changer

When it comes to construction, it's important to have the proper material for the job - you can't use the same material for a flying machine as you would for a boat and then realize it's better off made of rocks. With the Material Changer, you don't need to worry about that. Simply select the new material, and then select the object to be changed.

UV Tool

With so many options, it is often the case that making the perfect shape and texture for your build does not always go hand in hand. Using the UV Tool, you can now adjust the texture without changing the object in its, which is especially helpful for custom models.

Capture Object

Come to love your creations to perfection? Use the Capture Object tool to take a snapshot that you can name and save gift to a Prize Bubble. The right-click tool will allow you to edit the Prize Bubble's name, description, and upload objects that have been saved to the Capture Object.

Slice N Dice

After plopping down a big chunk of material, it might become necessary to break it down a little without reducing any of its mass. Use the Slice 'N Dice tool to select the material and then choose how to slice it. The two parts are now separate, although they can still supported by Glue.

Dephysicalize

The ghostly apparition of a tool removes all physical properties of an object. It can help reduce the load of your build, and it's also great for special effects. Do not confuse this with Anchor, which prevents and even the fixed floor can stop the effects of gravity.

Rail Editor

Whenever you feel the need to put a few extra bends in a Bendy Rail, the Rail Editor is the tool for you. Select a Bendy Rail, and then select, or remove, a point to add more bends to your rail.

STICKERS AND DECORATIONS

Sticker & Decoration Edit Tool

It's extraordinary easy to get overly caught up with slapping stickers and Decorations only willy, but the Sticker & Decoration Edit Tool to take a step back in order to fix, move, and delete such accessories.

Sticker Cutter

Sometimes, you just want to add some detail and volume to a sticker. The Sticker Cutter tool allows you to cut a sticker in half, and then move the excess material at an object and leaving only the shape of the stickers placed on it.

Paint

There are definitely a lot of stickers to collect in a BrickPlanet! It but they all have one thing in common: you did not make them. That oversight ends now. This tool allows you to make custom stickers that can be shaped onto build Decorations.

Once in the canvas, use ⌘ + double-click or ⌘ + drag to between the next and another application options. Click on the ⌘ + click and drag to paint. ⌘ and ⌘ + click are your friends ready to get playtime! In speak. Saving and reusing this inside (as well as many advanced tools) is a topic for the Paint Tool Tutorial.

Sticker Scrubber

While you are looking for a bottle of bleach rather than a pair of tweezers, remember to bring the Sticker & Decoration Edit Tool to the Sticker Scrubber. With this tool, a tap ⌘ over anything removes all stickers and Decorations in one go.

HAZARDS

The Danger Tools

Add a little peril to your levels using our assortment of Danger Tools. Choose from Electricity, Fire, Poison, Radiation, Spikes, Toxic Waste, and Water. Each hazard has its own unique effect that you can apply to any object. Then you'll trigger the Area Control to determine when the hazard is activated.

CAMERAS

Game Camera

Beauty is said to be in the eye of the beholder, so give beholding players a nice camera. Use the Game Camera where players can engage to alter the view system Camera's perspective. Adjust the angle and zoom to frame the perfect picture of your creation.

Game Camera Adjustments

ADJUSTMENT	ADJUSTMENT ACTION	EFFECT
Basic Settings	Angle & Zoom	Set how close the Game Camera is to the action and from which angle it is viewed.
	Zone	Use this set the in-object the position and the angle that is viewed. Select Add Zone to add a new zone. Select Edit Zone to edit the zone. Select Remove Zone to delete the zone.
Movement	Adjust Player Tracking	Determine how the camera follows the player. Select Free Look to allow the player to look around freely. Select Fixed Angle to keep the camera at a fixed angle. Select Follow Behind to keep the camera behind the player.
	Limit Space	Define where, within a zone, the camera is allowed to be placed.
	Camera Wake	Determine how slowly the camera is alert before the between clip.
Triggers	Require All Players	Determine if the camera is set to all players or just the first entered zone to trigger it.
	Add Action	Set the type of action that is activated when the player enters the zone.
	Depth of Field Blurs	Set the level of background focus from 0% (full clarity) to 100% (full blur).
Focus	Depth of Field Scope	Set the level of background focus from 0% (full clarity) to 100% (full blur).
	Focus on Players	Set whether the camera's focus is on the player or a specific object.
Visuals	Use 3 Timeline Colors	Modify three colors, the camera tracks players against depth.
	Visibility to Play Mode	Determine whether or not the Game Camera can be seen in Play Mode.

Movie Camera

Spice up parts of your level with cinematic precision by preloadin the most dramatic moments. Your players trigger the Movie Camera to direct a cinematic movie moment in the midst of a level.

Movie Camera Adjustments

ADJUSTMENT	ADJUSTMENT ACTION	EFFECT
Basic Settings	Angle & Zoom	Set how close the Movie Camera is to the action and from which angle it is viewed.
	Zone	Use this set the in-object the position and the angle that is viewed. Select Add Zone to add a new zone. Select Edit Zone to edit the zone. Select Remove Zone to delete the zone.
Transition	Transition Type	Set the transition effect between the Movie Camera and the player's camera. Choose from Fade, Fade Color, Fade White, and Cut.
	Fade Duration	Set the duration of both Fade and Fade Color transition effects.
	Fade Color	Modify the Fade Color.
Brightness	Brightness	Determine the brightness of the Movie Camera. Toggle between On and Off. Select Adjust Brightness to set the level.
Movement	Adjust Player Tracking	Determine how the Movie Camera follows the player.
	Limit Space	Modify Offset, Arrow, camera effects are relative to the object it is attached to.
	Camera Wake	Determine how slowly the camera is alert before the between clip.
Timing	Transition Timing	Set, in seconds, the time your transition takes.
	Hold Time	Set the Hold Time for a Fade while the camera is active. Available Hold Time options are 1 to 10 seconds.
Triggers	Depth of Field Blurs	Set the level of background focus from 0% (full clarity) to 100% (full blur).
	Depth of Field Scope	Set the level of background focus from 0% (full clarity) to 100% (full blur).
	Disable Controllers	Toggle whether or not players can control their last people while the Movie Camera is active.
	Hooked	Determine if the Movie Camera is hooked to the player or not. Toggle between On and Off.
	Require All Players	Determine if the camera triggers or not all players must be in the Movie Camera zone.
	Sequence	Modify Sequence whether or not players can play the Movie Camera sequence.
Visuals	Use 3 Timeline Colors	Modify three colors, the camera tracks players against depth.
	Visibility to Play Mode	Determine whether or not the Movie Camera can be seen in Play Mode.

Snapshot Camera

Give players a chance to capture moments for posterity as they frolic through your level. It sure is cool when entering a region that triggers the Snapshot Camera to take a picture- perfect memory is taken and deposited under My Pictures.

Snapshot Camera Adjustments

ADJUSTMENT	ADJUSTMENT ACTION	EFFECT
Basic Settings	Angle & Zoom	Set how close the Snapshot Camera is to the action and from which angle it is viewed.
	Zone	Use this set the in-object the position and the angle that is viewed. Select Add Zone to add a new zone. Select Edit Zone to edit the zone. Select Remove Zone to delete the zone.
Triggers	Add Action	Set the type of action that is activated when the player enters the zone.
	Countdown	Set the amount of time in seconds players have before the picture is taken.
	Require All Players	Determine if the camera triggers or not all players must be in the zone.
Visuals	Visibility to Play Mode	Determine whether or not the Snapshot Camera can be seen in Play Mode.

ADVENTURING

Object Saver

For levels with multiple parts or staged progression, this tool is invaluable. Stop it at anything, and that object's location and state are saved between plays.

Object Saver Adjustments

ADJUSTMENT	ADJUSTMENT ACTION	EFFECT
Properties	Enable in Play Mode	Toy/No

Quest Tracker

As the primary questing tool, the Quest Tracker is responsible for all state changes, activation, completion, or deactivation of a quest or its objectives in the Quest Sequencer. Use the Quest Tracker to add items to create a quest in order to use this and the other Adventure tools.

Quest Tracker Adjustments

ADJUSTMENT	ADJUSTMENT ACTION	EFFECT
Basic Settings	Select Quest	Select available quests created in the Global Staff menu.
	Objective Title	Add an in-object to assign the most recent selected object and its objective. Select Add Objective to add a new objective. Select Remove Objective to delete the objective.
	Trigger On Prompt	Toy/No
	Use Checkpoint Saves	Set Checkpoint A, Level, etc.
Visuals	Checkpoint and Quest Visibility	Set/Switch Undefined and Celtic Visible.

Quest Sensor

The Quest Sensor senses the current state of a quest and activates when set progresses a level.

Quest Sensor Adjustments

ADJUSTMENT	ADJUSTMENT ACTION	EFFECT
Basic Settings	Quest Title	Select from available quests created in the Global Staff menu.
	Objective Title	Select from available objectives created in the Global Staff menu.
Trigger	Select Sensor	Select Sensor Activate, Complete, and Inactive.
	Tracked Quests Only	Yes / No
Output	Invert Output	Yes / No
Visuals	Checkpoint and Quest Visibility	Set / Switch / Celtic / Switch and Celtic / Hidden.
	Level	Adjust Sensor Color.

Quest Marker

Create waypoints associated with individual quests under objectives that are visible when using the Tackle Hat' option of the Dispenser.

Quest Marker Adjustments

ADJUSTMENT	ADJUSTMENT ACTION	EFFECT
Basic Settings	Select Quest	Select from available quests created in the Global Staff menu.
	Objective Title	Select an objective under the most recent selected quest.
Visuals	Checkpoint and Quest Visibility	Set/Switch Undefined and Celtic Visible.

DYNAMIC THERMOSTAT

CONDITIONAL CRAFTING

Conditional crafting allows you to build stuff using the
This option is found in the Global Staff Actions of your Plush. The
Conditional crafting is a tool that allows you to craft objects under certain conditions.
No amount of content that you can build into your level!

Load Linker

The Load Linker works very much like the Advanced Use Tool, except that rather than linking objects to be used in the level, it links objects to be loaded in the level. This becomes most important when you begin working with several linked elements.

Preloader

Ever sent out to help a little more: moving people puts your closest up at your Preloader. Use the Preloader to load objects in the level before they are needed. This is a great tool for creating large levels. When one of these is activated, it loads a preset portion of your level, ensuring that it is ready to go when players arrive. Use the Preloader in conjunction with the Player Teleporter or another

instantaneously travel to the

The Preloader can be triggered by Sensor. When more is attached, then it functions like a Player Sensor.

Preloader Adjustments

ADJUSTMENT	ADJUSTMENT ACTION	EFFECT
Preload Zone	Add Zone	Use these options to add a zone to the Preloader.

	Color	Adjust Sensor Color.

Standard Knife

Knife Information	
Knife Name	Standard Knife
Description	Standard knife issued to all Vault Dwellers. Can be used for hunting, crafting, or self-defense. Reliable and durable.
Rarity	Common
Value	50 Caps
Weight	1.0 lbs
Damage	15 Base Damage
Attack Speed	Medium (1.2 attacks per second)
Range	Melee (Close Range)
Critical Chance	5%
Critical Damage	1.5x
Durability	100 Durability
Repair	Can be repaired with Metal Scrap
Special Effects	None
Crafting	Can be crafted at a Workbench with 2 Metal Scrap and 1 Leather
Upgrades	Can be upgraded with Sharpening Stone (+5 Damage)
Location	Found in Vault 101 Armory, Vendor Inventory
Notes	Standard issue knife for all Vault Dwellers. Perfect for beginners.

Combat Knife

Knife Information	
Knife Name	Combat Knife
Description	Military-grade combat knife with serrated edge. Designed for close-quarters combat and survival.
Rarity	Uncommon
Value	150 Caps
Weight	1.5 lbs
Damage	25 Base Damage
Attack Speed	Medium (1.2 attacks per second)
Range	Melee (Close Range)
Critical Chance	10%
Critical Damage	2.0x
Durability	150 Durability
Repair	Can be repaired with Metal Scrap
Special Effects	Bleed: 5 damage per second for 3 seconds
Crafting	Can be crafted at a Workbench with 3 Metal Scrap, 1 Leather, and 1 Spring
Upgrades	Can be upgraded with Sharpening Stone (+5 Damage), Bleed Enhancement (+2 Bleed Damage)
Location	Found in Raider Camps, Vendor Inventory
Notes	Military-grade combat knife. Excellent for close-quarters combat.

Survival Knife

Knife Information	
Knife Name	Survival Knife
Description	Multi-purpose survival knife with built-in tools. Perfect for wilderness survival and crafting.
Rarity	Uncommon
Value	200 Caps
Weight	2.0 lbs
Damage	20 Base Damage
Attack Speed	Medium (1.2 attacks per second)
Range	Melee (Close Range)
Critical Chance	8%
Critical Damage	1.8x
Durability	200 Durability
Repair	Can be repaired with Metal Scrap
Special Effects	Tool Bonus: +10% crafting speed when crafting tools
Crafting	Can be crafted at a Workbench with 2 Metal Scrap, 1 Leather, 1 Wood, and 1 Flint
Upgrades	Can be upgraded with Sharpening Stone (+5 Damage), Tool Enhancement (+15% crafting speed)
Location	Found in Wasteland Camps, Vendor Inventory
Notes	Multi-purpose survival knife. Excellent for crafting and wilderness survival.

Switchblade

Knife Information	
Knife Name	Switchblade
Description	Concealed blade knife with quick deployment. Perfect for stealth and surprise attacks.
Rarity	Uncommon
Value	175 Caps
Weight	0.8 lbs
Damage	18 Base Damage
Attack Speed	Fast (1.5 attacks per second)
Range	Melee (Close Range)
Critical Chance	12%
Critical Damage	2.0x
Durability	120 Durability
Repair	Can be repaired with Metal Scrap
Special Effects	Stealth Bonus: +20% damage when attacking from stealth
Crafting	Can be crafted at a Workbench with 2 Metal Scrap, 1 Spring, and 1 Leather
Upgrades	Can be upgraded with Sharpening Stone (+5 Damage), Stealth Enhancement (+10% stealth damage)
Location	Found in Underworld Camps, Vendor Inventory
Notes	Concealed blade knife. Excellent for stealth and surprise attacks.

Hunting Knife

Knife Information	
Knife Name	Hunting Knife
Description	Specialized hunting knife with skinning blade. Perfect for hunting and processing game.
Rarity	Uncommon
Value	125 Caps
Weight	1.2 lbs
Damage	22 Base Damage
Attack Speed	Medium (1.2 attacks per second)
Range	Melee (Close Range)
Critical Chance	7%
Critical Damage	1.6x
Durability	180 Durability
Repair	Can be repaired with Metal Scrap
Special Effects	Skinning Bonus: +50% meat yield when skinning animals
Crafting	Can be crafted at a Workbench with 2 Metal Scrap, 1 Leather, and 1 Wood
Upgrades	Can be upgraded with Sharpening Stone (+5 Damage), Skinning Enhancement (+25% meat yield)
Location	Found in Hunting Camps, Vendor Inventory
Notes	Specialized hunting knife. Excellent for hunting and processing game.

Machete

Knife Information	
Knife Name	Machete
Description	Large machete with wide blade. Perfect for clearing vegetation and close combat.
Rarity	Uncommon
Value	100 Caps
Weight	2.5 lbs
Damage	30 Base Damage
Attack Speed	Slow (0.8 attacks per second)
Range	Melee (Close Range)
Critical Chance	5%
Critical Damage	1.5x
Durability	250 Durability
Repair	Can be repaired with Metal Scrap
Special Effects	Cleave: Hits 2 enemies in front of you
Crafting	Can be crafted at a Workbench with 3 Metal Scrap and 1 Leather
Upgrades	Can be upgraded with Sharpening Stone (+5 Damage), Cleave Enhancement (+1 additional target)
Location	Found in Jungle Areas, Vendor Inventory
Notes	Large machete with wide blade. Excellent for clearing vegetation and close combat.

Tactical Knife

Knife Information	
Knife Name	Tactical Knife
Description	Military-grade tactical knife with serrated edge. Designed for close-quarters combat and survival.
Rarity	Rare
Value	300 Caps
Weight	1.8 lbs
Damage	28 Base Damage
Attack Speed	Medium (1.2 attacks per second)
Range	Melee (Close Range)
Critical Chance	15%
Critical Damage	2.0x
Durability	300 Durability
Repair	Can be repaired with Metal Scrap
Special Effects	Bleed: 8 damage per second for 4 seconds
Crafting	Can be crafted at a Workbench with 4 Metal Scrap, 2 Leather, and 1 Spring
Upgrades	Can be upgraded with Sharpening Stone (+5 Damage), Bleed Enhancement (+3 Bleed Damage)
Location	Found in Military Bases, Vendor Inventory
Notes	Military-grade tactical knife. Excellent for close-quarters combat and survival.

Throwing Knife

Knife Information	
Knife Name	Throwing Knife
Description	Balanced throwing knife with perfect weight distribution. Designed for accurate throwing.
Rarity	Uncommon
Value	75 Caps
Weight	0.5 lbs
Damage	12 Base Damage
Attack Speed	Fast (1.5 attacks per second)
Range	Thrown (Medium Range)
Critical Chance	10%
Critical Damage	1.8x
Durability	50 Durability
Repair	Cannot be repaired
Special Effects	Thrown: Can be thrown at enemies
Crafting	Can be crafted at a Workbench with 1 Metal Scrap
Upgrades	Can be upgraded with Sharpening Stone (+5 Damage)
Location	Found in Training Areas, Vendor Inventory
Notes	Balanced throwing knife. Perfect for accurate throwing.

Pocket Knife

Knife Information	
Knife Name	Pocket Knife
Description	Small pocket knife with folding blade. Perfect for everyday carry and light tasks.
Rarity	Common
Value	25 Caps
Weight	0.3 lbs
Damage	8 Base Damage
Attack Speed	Fast (1.5 attacks per second)
Range	Melee (Close Range)
Critical Chance	3%
Critical Damage	1.3x
Durability	75 Durability
Repair	Can be repaired with Metal Scrap
Special Effects	None
Crafting	Can be crafted at a Workbench with 1 Metal Scrap
Upgrades	Can be upgraded with Sharpening Stone (+5 Damage)
Location	Found in Vendor Inventory, Starting Equipment
Notes	Small pocket knife. Perfect for everyday carry and light tasks.

Bowie Knife

Knife Information	
Knife Name	Bowie Knife
Description	Large bowie knife with wide blade. Perfect for hunting and close combat.
Rarity	Uncommon
Value	150 Caps
Weight	2.0 lbs
Damage	26 Base Damage
Attack Speed	Medium (1.2 attacks per second)
Range	Melee (Close Range)
Critical Chance	8%
Critical Damage	1.7x
Durability	220 Durability
Repair	Can be repaired with Metal Scrap
Special Effects	Bleed: 6 damage per second for 3 seconds
Crafting	Can be crafted at a Workbench with 3 Metal Scrap, 1 Leather, and 1 Wood
Upgrades	Can be upgraded with Sharpening Stone (+5 Damage), Bleed Enhancement (+2 Bleed Damage)
Location	Found in Hunting Camps, Vendor Inventory
Notes	Large bowie knife. Excellent for hunting and close combat.

Karambit

Knife Information	
Knife Name	Karambit
Description	Curved karambit knife with claw blade. Perfect for close-quarters combat and slashing attacks.
Rarity	Rare
Value	250 Caps
Weight	1.0 lbs
Damage	24 Base Damage
Attack Speed	Fast (1.5 attacks per second)
Range	Melee (Close Range)
Critical Chance	12%
Critical Damage	2.0x
Durability	150 Durability
Repair	Can be repaired with Metal Scrap
Special Effects	Bleed: 7 damage per second for 4 seconds
Crafting	Can be crafted at a Workbench with 3 Metal Scrap, 1 Leather, and 1 Spring
Upgrades	Can be upgraded with Sharpening Stone (+5 Damage), Bleed Enhancement (+3 Bleed Damage)
Location	Found in Underworld Camps, Vendor Inventory
Notes	Curved karambit knife. Excellent for close-quarters combat and slashing attacks.

Butterfly Knife

Knife Information	
Knife Name	Butterfly Knife
Description	Balisong butterfly knife with trained blade. Perfect for flipping tricks and close combat.
Rarity	Uncommon
Value	125 Caps
Weight	0.6 lbs
Damage	16 Base Damage
Attack Speed	Fast (1.5 attacks per second)
Range	Melee (Close Range)
Critical Chance	10%
Critical Damage	1.8x
Durability	100 Durability
Repair	Can be repaired with Metal Scrap
Special Effects	Flipping Tricks: Can perform flipping tricks
Crafting	Can be crafted at a Workbench with 2 Metal Scrap, 1 Spring, and 1 Leather
Upgrades	Can be upgraded with Sharpening Stone (+5 Damage)
Location	Found in Training Areas, Vendor Inventory
Notes	Balisong butterfly knife. Perfect for flipping tricks and close combat.

Sword

Sword Information	
Sword Name	Sword
Description	Standard sword with balanced blade. Perfect for close combat and dueling.
Rarity	Uncommon
Value	200 Caps
Weight	3.0 lbs
Damage	35 Base Damage
Attack Speed	Medium (1.0 attacks per second)
Range	Melee (Medium Range)
Critical Chance	8%
Critical Damage	1.8x
Durability	300 Durability
Repair	Can be repaired with Metal Scrap
Special Effects	None
Crafting	Can be crafted at a Workbench with 4 Metal Scrap and 1 Leather
Upgrades	Can be upgraded with Sharpening Stone (+5 Damage)
Location	Found in Vendor Inventory, Quest Rewards
Notes	Standard sword with balanced blade. Perfect for close combat and dueling.

Katana

Katana Information	
Katana Name	Katana
Description	Traditional katana with curved blade. Perfect for precise strikes and close combat.
Rarity	Rare
Value	350 Caps
Weight	2.5 lbs
Damage	32 Base Damage
Attack Speed	Fast (1.5 attacks per second)
Range	Melee (Medium Range)
Critical Chance	15%
Critical Damage	2.0x
Durability	250 Durability
Repair	Can be repaired with Metal Scrap
Special Effects	Bleed: 8 damage per second for 4 seconds
Crafting	Can be crafted at a Workbench with 4 Metal Scrap, 1 Leather, and 1 Spring
Upgrades	Can be upgraded with Sharpening Stone (+5 Damage), Bleed Enhancement (+3 Bleed Damage)
Location	Found in Underworld Camps, Vendor Inventory
Notes	Traditional katana with curved blade. Excellent for precise strikes and close combat.

Axe

Axe Information	
Axe Name	Axe
Description	Standard axe with sharp blade. Perfect for chopping wood and close combat.
Rarity	Common
Value	100 Caps
Weight	4.0 lbs
Damage	40 Base Damage
Attack Speed	Slow (0.8 attacks per second)
Range	Melee (Medium Range)
Critical Chance	5%
Critical Damage	1.5x
Durability	400 Durability
Repair	Can be repaired with Metal Scrap
Special Effects	None
Crafting	Can be crafted at a Workbench with 3 Metal Scrap and 1 Wood
Upgrades	Can be upgraded with Sharpening Stone (+5 Damage)
Location	Found in Vendor Inventory, Quest Rewards
Notes	Standard axe with sharp blade. Perfect for chopping wood and close combat.

Battle Axe

Battle Axe Information	
Battle Axe Name	Battle Axe
Description	Large battle axe with wide blade. Perfect for heavy damage and close combat.
Rarity	Uncommon
Value	250 Caps
Weight	5.0 lbs
Damage	50 Base Damage
Attack Speed	Slow (0.7 attacks per second)
Range	Melee (Medium Range)
Critical Chance	8%
Critical Damage	2.0x
Durability	500 Durability
Repair	Can be repaired with Metal Scrap
Special Effects	Cleave: Hits 2 enemies in front of you
Crafting	Can be crafted at a Workbench with 5 Metal Scrap and 1 Wood
Upgrades	Can be upgraded with Sharpening Stone (+5 Damage), Cleave Enhancement (+1 additional target)
Location	Found in Vendor Inventory, Quest Rewards
Notes	Large battle axe with wide blade. Excellent for heavy damage and close combat.

Hammer

Hammer Information	
Hammer Name	Hammer
Description	Standard hammer with heavy head. Perfect for crafting and close combat.
Rarity	Common
Value	75 Caps
Weight	3.5 lbs
Damage	35 Base Damage
Attack Speed	Slow (0.8 attacks per second)
Range	Melee (Medium Range)
Critical Chance	5%
Critical Damage	1.5x
Durability	350 Durability
Repair	Can be repaired with Metal Scrap
Special Effects	None
Crafting	Can be crafted at a Workbench with 3 Metal Scrap and 1 Wood
Upgrades	Can be upgraded with Sharpening Stone (+5 Damage)
Location	Found in Vendor Inventory, Quest Rewards
Notes	Standard hammer with heavy head. Perfect for crafting and close combat.

Spear

Spear Information	
Spear Name	Spear
Description	Standard spear with long shaft. Perfect for thrusting attacks and close combat.
Rarity	Uncommon
Value	150 Caps
Weight	4.0 lbs
Damage	30 Base Damage
Attack Speed	Medium (1.0 attacks per second)
Range	Melee (Long Range)
Critical Chance	8%
Critical Damage	1.8x
Durability	300 Durability
Repair	Can be repaired with Metal Scrap
Special Effects	None
Crafting	Can be crafted at a Workbench with 3 Metal Scrap and 1 Wood
Upgrades	Can be upgraded with Sharpening Stone (+5 Damage)
Location	Found in Vendor Inventory, Quest Rewards
Notes	Standard spear with long shaft. Perfect for thrusting attacks and close combat.

Trident

Trident Information	
Trident Name	Trident
Description	Three-pronged trident with sharp points. Perfect for thrusting attacks and close combat.
Rarity	Rare
Value	300 Caps
Weight	4.5 lbs
Damage	38 Base Damage
Attack Speed	Medium (1.0 attacks per second)
Range	Melee (Long Range)
Critical Chance	12%
Critical Damage	2.0x
Durability	350 Durability
Repair	Can be repaired with Metal Scrap
Special Effects	Bleed: 6 damage per second for 3 seconds
Crafting	Can be crafted at a Workbench with 4 Metal Scrap and 1 Wood
Upgrades	Can be upgraded with Sharpening Stone (+5 Damage), Bleed Enhancement (+2 Bleed Damage)
Location	Found in Underworld Camps, Vendor Inventory
Notes	Three-pronged trident with sharp points. Excellent for thrusting attacks and close combat.

Pipe Wrench

Pipe Wrench Information	
Pipe Wrench Name	Pipe Wrench
Description	Heavy pipe wrench with adjustable jaw. Perfect for crafting and close combat.
Rarity	Common
Value	50 Caps
Weight	3.0 lbs
Damage	25 Base Damage
Attack Speed	Slow (0.8 attacks per second)
Range	Melee (Medium Range)
Critical Chance	5%
Critical Damage	1.5x
Durability	250 Durability
Repair	Can be repaired with Metal Scrap
Special Effects	None
Crafting	Can be crafted at a Workbench with 2 Metal Scrap and 1 Spring
Upgrades	Can be upgraded with Sharpening Stone (+5 Damage)
Location	Found in Vendor Inventory, Quest Rewards
Notes	Heavy pipe wrench with adjustable jaw. Perfect for crafting and close combat.

Crowbar

Crowbar Information	
Crowbar Name	Crowbar
Description	Heavy crowbar with curved end. Perfect for prying and close combat.
Rarity	Common
Value	75 Caps
Weight	4.0 lbs
Damage	30 Base Damage
Attack Speed	Slow (0.8 attacks per second)
Range	Melee (Medium Range)
Critical Chance	5%
Critical Damage	1.5x
Durability	300 Durability
Repair	Can be repaired with Metal Scrap
Special Effects	None
Crafting	Can be crafted at a Workbench with 3 Metal Scrap and 1 Spring
Upgrades	Can be upgraded with Sharpening Stone (+5 Damage)
Location	Found in Vendor Inventory, Quest Rewards
Notes	Heavy crowbar with curved end. Perfect for prying and close combat.

Chainsaw

Chainsaw Information	
Chainsaw Name	Chainsaw
Description	Gas-powered chainsaw with sharp chain. Perfect for cutting wood and close combat.
Rarity	Rare
Value	500 Caps
Weight	12.0 lbs
Damage	60 Base Damage
Attack Speed	Very Fast (2.0 attacks per second)
Range	Melee (Medium Range)
Critical Chance	10%
Critical Damage	2.0x
Durability	200 Durability
Repair	Can be repaired with Metal Scrap and Fuel
Special Effects	Bleed: 10 damage per second for 5 seconds
Crafting	Can be crafted at a Workbench with 5 Metal Scrap, 1 Engine, and 1 Fuel
Upgrades	Can be upgraded with Sharpening Stone (+5 Damage), Bleed Enhancement (+3 Bleed Damage)
Location	Found in Vendor Inventory, Quest Rewards
Notes	Gas-powered chainsaw with sharp chain. Excellent for cutting wood and close combat.

Light Saber

Light Saber Information	
Light Saber Name	Light Saber
Description	Energy light saber with glowing blade. Perfect for close combat and dueling.
Rarity	Legendary
Value	1000 Caps
Weight	1.0 lbs
Damage	50 Base Damage
Attack Speed	Fast (1.5 attacks per second)
Range	Melee (Medium Range)
Critical Chance	15%
Critical Damage	2.0x
Durability	500 Durability
Repair	Can be repaired with Energy Cell
Special Effects	Energy Damage: +10 Energy Damage
Crafting	Can be crafted at a Workbench with 5 Energy Cell, 1 Circuit Board, and 1 Crystal
Upgrades	Can be upgraded with Energy Cell (+5 Energy Damage), Circuit Board (+10 Energy Damage)
Location	Found in Vendor Inventory, Quest Rewards
Notes	Energy light saber with glowing blade. Excellent for close combat and dueling.

Sword

Sword Information	
Sword Name	Sword
Description	Standard sword with balanced blade. Perfect for close combat and dueling.
Rarity	Uncommon
Value	200 Caps
Weight	3.0 lbs
Damage	35 Base Damage
Attack Speed	Medium (1.0 attacks per second)
Range	Melee (Medium Range)
Critical Chance	8%
Critical Damage	1.8x
Durability	300 Durability
Repair	Can be repaired with Metal Scrap
Special Effects	None
Crafting	Can be crafted at a Workbench with 4 Metal Scrap and 1 Leather
Upgrades	Can be upgraded with Sharpening Stone (+5 Damage)
Location	Found in Vendor Inventory, Quest Rewards
Notes	Standard sword with balanced blade. Perfect for close combat and dueling.

Katana

Katana Information	
Katana Name	Katana
Description	Traditional katana with curved blade. Perfect for precise strikes and close combat.
Rarity	Rare
Value	350 Caps
Weight	2.5 lbs
Damage	32 Base Damage
Attack Speed	Fast (1.5 attacks per second)
Range	Melee (Medium Range)

Create Tools Quick Reference: The Tools Bag

Music

SOUND OBJECT

Music

During that epic journey around the globe, your sack person listened and grooved to many tunes. Those same songs can now delight the ears of anyone playing your own level. Sample all of the tunes available by hovering over the icon in the Music section of the Tools bag. Once you have found that perfect piece for your level, select the icon, and place the music object anywhere you want it to be heard.

Music Adjustments

ADJUSTMENT TYPE	ADJUSTMENT NAME	EFFECT
Volume	Track Volume	Adjust the volume of the music object. Toggle between 0% and 100%.
Start Point	Start Point	Choose the point where the music begins playback.
Trigger	Trigger Radius	Establishes the radius a sack person must be in to activate music object.
	Layer Detection Range	Establishes the maximum layer distance a sack person may be from the music object in order to activate it. Toggle between 0 and 16.
Visuals	Visible in Play Mode	Determines whether or not the music object is visible in the level.

Music-Interactive

Among all the songs that grace *LittleBigPlanet 3*, the Creator Curator's themes are special in their own right. Those generous denizens of Craftverse have allowed you to further tweak their trademark themes.

Music-Interactive Adjustments

ADJUSTMENT TYPE	ADJUSTMENT NAME	EFFECT
Mixer	Various Instruments	Adjust the volume for each instrument making up the music object. Toggle between 0% and 100%.
Start Point	Start point	Choose the point where the music begins playback.
Trigger	Trigger Radius	Establishes the radius a sack person must be in to activate music object.
	Layer Detection Range	Establishes the maximum layer distance a sack person may be from the music object in order to activate it. Toggle between 0 and 16.
Visuals	Visible in Play Mode	Determines whether or not the music object is visible in the level.

Music-Cinematic

It's important to have the right music when letting your players sit back, relax, and relish a tastefully crafted cutscene. Cinematic tunes are perfect for such an occasion.

Music-Cinematic Adjustments

ADJUSTMENT TYPE	ADJUSTMENT NAME	EFFECT
Mixer	Various Instruments	Adjust the volume for each instrument making up the music object. Toggle between 0% and 100%.
Start Point	Start point	Choose the point where the music begins playback.
Trigger	Trigger Radius	Establishes the radius a sack person must be in to activate music object.
	Layer Detection Range	Establishes the maximum layer distance a sack person may be from the music object in order to activate it. Toggle between 0 and 16.
Visuals	Visible in Play Mode	Determines whether or not the music object is visible in the level.

Music Sequencer

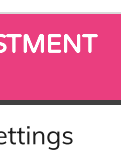

The *LittleBigPlanet 3* song list is epic and all, but sometimes, even those masterpieces don't mesh with every level you create. Why not take a crack at composing your own with the brand-new Music Sequencer? Simply place it into your level like you would with any other song to get your composition started.

Music Sequencer Adjustments

ADJUSTMENT TYPE	ADJUSTMENT NAME	EFFECT
Basic Settings	Sequencer Name	Enter a name for your tune.
Volume	Number of Volume Sliders	Set the number of volume sliders. Toggle between 1 and 6.
	Channel #	Adjust the volume slider for each channel. Toggle between 0% and 100%.
Trigger	Trigger Radius	Establishes the radius a sack person must be in to activate the music object.
Behavior	Tempo	Adjust the speed of the music. Toggle between 30bpm and 240bpm.
	Swing	Determines the delay and movement of your notes. Toggle between 0% and 100%.
	Loop	Toggle whether or not the track repeats.
Effects	Echo Time	Change the length of echo time. Toggle between 1.0 and 16.0.
	Echo Feedback	Set the amount of feedback in the echo. Toggle between 0% and 100%.
	Echo Mix	Set the volume of the echo. Toggle between 0% and 100%.
	Reverb Setting	Adjust the echo settings to mimic a room type (Small Room, Room, Bright Plate, Hall, Big Hall, Cathedral).
Visuals	Show Circuitboard	Determines whether or not the Circuitboard is visible.
	Visible in Play Mode	Determines whether or not the Music Sequencer can be seen in Play Mode.
	Color	Set the color of the Music Sequencer to help keep track of it.

Sequencer Instruments

Want a twangy guitar riff for your Western level? How about some beep and bops for your classic arcade game? The Music Sequencer has many unique instruments to play around with. Select one or more instruments from the Music section of the Tools bag. Place the icon onto the Music Sequencer Circuitboard. Once placed, highlight the instrument, and press ■ to bring up a piano roll. Lay down some notes on it, and voila! You have an epic theme song created just for your level.

Instrument Adjustments

ADJUSTMENT TYPE	ADJUSTMENT ACTION	EFFECT
Keys	Input notes	After placing the Instrument on the Sequencer, press I in menu to access the Keys screen. Place notes on piano roll to form a melody or beat for a track. Press I again to access the Tweak menu.
	Sequencer Name	Name your Instruments to distinguish between duplicates.
Mix	Level	Adjust the Instrument's volume level. Toggle between 0% and 100%.
	Pan	Balance the Instrument audio between the left and right speakers. Toggle between 0% and 100%.
	Echo Adjust	Determines the amount of Echo produced. Toggle between 0% and 100%.
	Reverb Send	Determines the strength of the Instrument's reverb. Toggle between 0% and 100%.
Key	Musical Scale	Change the scale of the notes (Major, Minor, Pentatonic, Blues, Chromatic).
	Musical Key	Change the tone of the notes.
Visuals	Color	Set the color of the Instrument to help keep track of it.

BRONZE TROPHIES

Adventurous
HEART SOMEONE ELSE'S PUBLISHED COMMUNITY ADVENTURE

Biggy and Smalls
CHANGE INTO TOGGLE

Curator
CREATE A PLAYLIST IN-GAME

Mapper
